book delves into the systemic issues that perpetuate poverty and inequality in the inner city. It examines the impact of mass incarceration, the lack of affordable housing, and the persistent disparities in education, healthcare, and employment opportunities. It explores the role of racism, discrimination, and historical disinvestment in shaping the current realities of these communities. By shedding light on these complex issues, this book seeks to raise awareness, inspire action, and advocate for transformative change. *Finding Hope in the Inner City* is more than just an exposé of the challenges facing these communities; it is a celebration of resilience, a testament to the power of the human spirit. By fostering empathy, understanding, and a shared commitment to change, we can work together to create a more just and equitable society where every individual has the opportunity to thrive, regardless of their zip code. This book is an invitation to embark on a journey of transformation, to witness the indomitable spirit of the human heart, and to be inspired by the unsung heroes who walk among us. It is a powerful reminder that even in the darkest of circumstances, hope can prevail, and change is possible. If you like this book, write a review.

Beyond Hope Stephen J. Costello, 2020-10-12. Drawing on a host of philosophers such as Arthur Schopenhauer, Gabriel Marcel, Josef Pieper, Paul Ricoeur, Viktor Frankl, Eric Voegelin, Bernard Lonergan, Roger Scruton, John Caputo, and Ludwig Wittgenstein, as well as theologians like Hans Urs von Balthasar, Karl Rahner, Hans Küng, Pope Benedict XVI, and Pope Francis, this book argues passionately for the place of hope as the beyond of both a willful or the wishful optimism on the one hand and a world-weary, fatuous pessimism on the other. Drawing on the philosophy of Advaita Vedanta in the concluding chapter, it suggests that only by living from the Self, as distinct from the ego, can we know ultimate peace and experience the bliss of being that is beyond both hope and happiness. These philosophical reflections are both timely, as the publication appears amid the Coronavirus crisis, and wise. It is warmly recommended for its breadth and depth of knowledge. This book will appeal to students of both Eastern and Western philosophy, as well as spiritual seekers.

Framing Age Iris Löffler, Benoît Majerus, Thibault Moulaert, 2017-05-12. Ageing populations have gradually become a major concern in many industrialised countries over the past fifty years, drawing the attention of both politics and science. The target of a raft of health and social policies, older people are often identified as a specific and vulnerable population. At the same time, ageing has become a specialisation in many disciplines: medicine, sociology, psychology, to name but three, and a discipline of its own: gerontology. This book questions the framing of old age by focusing on the relationships between policy making and the production of knowledge. The first part explores how the meeting of scientific expertise and the politics of old age anchors the construction of both individual and collective relationships to the future. Part II brings to light the many ways in which issues relating to ageing can be instrumentalised and ideologised in several public debate arenas. Part III argues that scientific knowledge itself composes with objectivity, bringing ideologies of its own to the table and looks at how this impacts discourse about ageing. In the final part, the contributors discuss how the frames can

themselves be experienced at different levels of the division of labour whether it is by people who work on them legislators or scientists by people working with them professional carers or by older people themselves Unpacking the political and moral dimensions of scientific research on ageing this cutting edge volume brings together a range of multidisciplinary European perspectives and will be of use to all those interested in old age and the social sciences
