Caudill, 2018-04-06 A scientific look at the biological bases of human nutrition Covering advanced nutrition with a comprehensive easy to understand approach Biochemical Physiological and Molecular Aspects of Human Nutrition 4th Edition focuses on nutrition at the molecular cellular tissue and whole body levels Written by Martha Stipanuk Marie Caudill and a team of nutrition experts the text addresses nutrients by classification and describes macronutrient function from digestion to metabolism This edition includes the most current recommendations from the Dietary Guidelines for Americans plus coverage of the historical evolution of nutrition and information on a wide range of vitamins minerals and other food components More than 20 expert contributors provide the latest information on all areas of the nutrition sciences Thinking Critically sections within boxes and at the end of chapters help in applying scientific knowledge to real life situations Common Abbreviations for the entire book are listed alphabetically on the inside back cover for easy reference Nutrition Insight boxes discuss hot topics and take a closer look at basic science and everyday nutrition Clinical Correlation boxes show the connection between nutrition related problems and their effects on normal metabolism Food Sources boxes summarize and simplify data from the USDA National Nutrient Database on the amount and types of foods needed to reach the recommended daily allowances for vitamins and minerals DRIs Across the Life Cycle boxes highlight the latest data from the Institute of Medicine on dietary reference intakes for vitamins and minerals including coverage of infants children adult males and females and pregnant and lactating women Historical Tidbit boxes provide a historical context to key nutritional findings NEW Thoroughly updated art program helps to clarify complex concepts NEW Select bolded summary headings enable students to efficiently review information and recognize major messages NEW Content updated throughout incorporates the latest research and findings including extensively revised coverage of lipids lipoproteins cholesterol fatty acids and triacylglycerol metabolism NEW Improved writing style makes the material more concise direct and accessible NEW Additional boxes tables and critical thinking questions break up the narrative and reinforce key concepts Hormones, Receptors and Cellular Interactions in Plants C. M. Chadwick, D. R. Garrod, 1986-02-06 This book takes a broad look at the current status of research on receptors in higher and lower plants It starts with a discussion of some hormone receptors auxins ethylene and gibberellin in higher plants and then considers the role of cyclic AMP and its receptors in the slime mould Dictyostelium The Receptors P. Michael Conn, 2014-05-10 The Receptors Volume II deals with receptors for somatostatin vitamin D insulin and animal viruses as well as for the 2 adrenergic and Ah systems The significance of translational modifications of receptor ligands is discussed along with the mechanisms of receptor ligand interactions The role of receptors in development and their regulation by tumors are also considered Comprised of 12 chapters this volume begins with a detailed account of the vitamin D receptor paying particular attention to

its biochemical and physical properties as well as its mechanism of action The discussion then turns to experimental discrimination between alternative mechanistic models for the receptor mediated stimulation of adenylate cyclase the role of microaggregation in hormone receptor effector interactions and the biology and biochemistry of the Ah receptor Subsequent chapters explore the interactions of animal viruses with cell surface receptors insulin receptors determination of the size of neurotransmitter receptors by radiation inactivation target size analysis and protein glycosylation and receptor ligand interactions This book will be a valuable resource for students and practitioners in fields ranging from cell biology and biochemistry to physiology endocrinology and pharmacology
