The Oxford Handbook of Postwar European History Dan Stone,2012-05-17 The postwar period is no longer current affairs but is becoming the recent past As such it is increasingly attracting the attentions of historians Whilst the Cold War has long been a mainstay of political science and contemporary history recent research approaches postwar Europe in many different ways all of which are represented in the thirty five chapters of this book As well as diplomatic political institutional economic and social history The Oxford Handbook of Postwar European History contains chapters which approach the past through the lenses of gender espionage art and architecture technology agriculture heritage postcolonialism memory and generational change and shows how the history of postwar Europe can be enriched by looking to disciplines such as anthropology and philosophy The Handbook covers all of Europe with a notable focus on Eastern Europe Including subjects as diverse as the meaning of Europe and European identity southern Europe after dictatorship the cultural meanings of the bomb the 1968 student uprisings immigration Americanization welfare leisure decolonization the Wars of Yugoslav Succession and coming to terms with the Nazi past the essays in this Handbook offer an unparalleled coverage of postwar European history that offers far more than the standard Cold War framework Readers will find self contained state of the art analyses of major subjects each written by an acknowledged expert as well as stimulating and novel approaches to newer topics Combining empirical rigour and adventurous conceptual analysis this Handbook offers in one substantial volume a guide to the numerous ways in which historians are now rewriting the history of postwar Europe

Materializing Europe A. Badenoch,A. Fickers,2010-10-27 This book explores the relationships between European integration and material infrastructures Taking transnational infrastructures as the focal point of study the book focuses on the various forms of mediation between the material institutional and discursive levels of European integration and fragmentation in a truly transnational perspective

Constructing Iron Europe Irene Anastasiadou,2011-12-01 Conventional histories portray the development of railway infrastructures as a tool to build empires and nation states Recent scholarship however has stressed the importance of a transnational perspective beyond an exclusive focus on the nation state The new perspective enriches both the history of modern Europe and European integration Constructing Iron Europe demonstrates how during the interwar years key players saw railroads as instruments for building a transnational European community Based on new archival research Anastasiadou not only sheds light on patterns of internationalization of railways but also explores the co construction of the national and the European in the case of the Greek railways in the Interbellum period

Integration of Infrastructures in Europe in Historical Comparison Gerold Ambrosius,Christian

Henrich-Franke,2015-12-08 This book compares the cross border integration of infrastructures in Europe such as post telecommunication and transportation in the 19th century and the period following the Second World War In addition to providing a unique perspective on the development of cross border infrastructures and the international regimes regulating them it offers the first systematic comparison of a variety of infrastructure sectors identifies general developmental trends and supplies theoretical explanations In this regard integration is defined as international standardization network building and the establishment of international organizations to regulate cross border infrastructures *Internationalists in*

European History Jessica Reinisch,David Brydan,2021-01-28 Representing a crucial intervention in the history of internationalism transnationalism and global history this edited collection examines a variety of international movements organisations and projects developed in Europe or by Europeans over the course of the 20th century Reacting against the old Eurocentrism much of the scholarship in the field has refocussed attention on other parts of the globe This volume attempts to rethink the role played by ideas people and organisations originating or located in Europe including some of their consequential global impact The chapters cover aspects of internationalism such as the importance of language communication and infrastructures of internationalism ways of grappling with the history of internationalism as a lived experience and the roles of European actors in the formulation of different and often competing models of internationalism It demonstrates that the success and failure of international programmes were dependent on participants ability to communicate across linguistic but also political cultural and economic borders By bringing together commonly disconnected strands of European history and history from below this volume rebalances and significantly advances the field and promotes a deeper understanding of internationalism in its many historical guises The volume is conceived as a way of thinking about internationalism that is relevant not just to scholars of Europe but to international and global history more generally

Encyclopedia of Historians and Historical Writing Kelly Boyd,2019-10-09 The Encyclopedia of Historians and Historical Writing contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama Over 300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day including individuals from related disciplines like Jürgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate Additionally the Encyclopedia includes some 200 essays treating the development of national regional and topical historiographies from the Ancient Near East to the history of sexuality In addition to the Western tradition it includes substantial assessments of African Asian and Latin American historians and debates on gender and subaltern studies **A Political History of Big Science** Katharina C.

Cramer,2020-08-31 This book investigates the political history of Big Science in Europe in the late twentieth century and the early twenty first century characterised by the founding histories of two collaborative single sited facilities namely the European Synchrotron Radiation Facility ESRF in Grenoble France and the European X Ray Free Electron Laser European

XFEL in Schenefeld Germany Under the heading of the other Europe this book presents the history and politics of European Big Science as an alternative road to Western European integration besides the mainstream political integration process of the European Economic Community and the European Union It shows that Big Science has a role to play in European politics and policymaking and that the crucial and unavoidable symbiosis between science technology and politics brings the creation of Big Science projects back to geopolitical realities **European Coasts of Bohemia** Jiri Janac, 2013-08-01 The Danube Oder Elbe Canal promised to create an integrated waterway system across Europe linking Black Sea ports to Atlantic markets and giving landlocked Czech nation its own connections to the ocean The fascinating history of this never completed project European Coasts of Bohemia tells the story of the experts who confronted and contributed to different and often conflicting geopolitical visions of Europe J ra Jan c shows how the canal backers adapted themselves to various political developments such as the break up of the Austrian Hungarian Empire and the integration into the Soviet Bloc while still managing to keep the canal project alive Materialising Identity Judith Schueler, 2008 Since 1882 the Gotthard Railway with its fifteen kilometerlong tunnel under the Gotthard Mountains has provided a crucialinternational link through the Swiss Alps between North WesternEurope and Italy Its symbolic meaning has never sunk into oblivion In Swiss society today references to the railway evoke images of atechnological railway project with allusions to Swiss history alpinenature and national identity Reading this book helps us understandcontemporary discussions about the future of the Gotthard Railway the region in which it lies and the Swiss national identity To illustrate to what extent historical actors co constructedthe railway and Swiss identity the book starts with an engineeringdiscussion about tunneling methods Then it examinesreactions in Switerland to the inauguration of the railway line Subsequently it describes how the railway line was portrayedin travel guides of the belle poque The last chapter capturesthe glory days of the Gotthard myth before and during the SecondWorld War with a focus on novels and plays in which theGotthard Tunnel construction occurs This historical overviewoffers insight into the multiple roles that technology plays in theconstruction of a sense of national identity **Material Fantasies** Milena Veenis, 2012 This study of East German fantasies of material abundance across the border both before and after the fall of communism shows the close and intricate relation between ideology and fantasy in upholding social life In 1989 news broadcasts all over the world were dominated for weeks by images of East Germans crossing the Berlin Wall to West Germany The images representing the fall of communism and the democratic will of the people also showed East Germans excitement at finally being able to enter the western consumer paradise But what exactly had they expected to find on the other side of the Wall Why did they shed tears of joy when for the first time in their lives they stepped inside West German shops And why were they prepared to pay more than 10 percent of their average monthly wage for a pineapple Drawing on fifteen months of research in the fast changing post communist East Germany Veenis unravels the perennial truths about the interrelationships of fantasies of material wealth personal fulfillment and social cohesion She argues persuasively that the far

fetched socialist and capitalist promises of consumption as the road to ultimate well being the partial realization and partial corruption thereof the implicit social and psychological interests underlying the politicized promises in both countries form the breeding ground for the development of materialist cargo cult like fantasies in which material well being came to be seen as the place of fulfillment and ultimate arrival Publisher's website

Eight Eurocentric Historians James Morris Blaut, 2000-08-10 This text examines and critiques the work of a diverse group of Eurocentric historians who have strongly shaped our understanding of world history It provides invaluable insights and tools for readers across a range of disciplines

Peripheral Flows Simone Fari, Massimo Moraglio, 2016-06-22 The main purpose of the eleven contributions to this volume is to reconsider and re-assess the role of cores and peripheries in shaping modern socio-technical systems From this perspective they explore a terrain of highly complex systems mainly operating on the so-called Western model Railways telegraphs motor vehicles and airports were in fact all born in classic cores areas in the West and then spread out into the peripheries The approach in itself is not new but this volume has managed to bring out interestingly innovative elements and viewpoints The contributors are not content with the traditional definitions of peripheries and flows but tend to put them to the test revise them and eventually offer critiques The result is a tempering of the monolithic and traditional concept of a one-way transfer No longer therefore a simple and linear act of adoption but a recourse to adaptation changes in meaning use and perception The volume is a starting point for future explorations on the subject of science and technology studies and takes part in a wider discussion of globalisation global and transnational history
