**Investing in Health** Timothy A. Johnston, Susan Stout, 1999-01-01 World Bank lending for health nutrition and population HNP activities is accelerating The Bank's emphasis has evolved from expanding HNP service delivery capacity to encouraging systemic reform The Bank is now the major source of external finance for the sector in the developing world The policy influence of its nonlending services is potentially significant With the current generation of projects the Bank and its partners are attempting to address underlying constraints to sector performance while remaining cognizant of the difficulty of improving health sector effectiveness and efficiency even in developed countries This volume recommends that the Bank seek to do better not more in the HNP sector improve project monitoring and evaluation and strengthen its ties with the World Health Organization and other interested organizations

**Evaluating Health Projects** Susan Stout, 1997-01-01 This book explores the wave of decentralization that has swept through Latin America and the projected institutional changes within the governments in the region Although it notes the ways in which decentralization implies a critique of past governing patterns the emphasis is on such potential consequences of governmental change as the strengthening of democratic participation in government and the improvement of local public service The book draws upon institutional experiments carried out at the state level to examine which decentralization strategies work best in Latin America It is organized around three major requirements for the success of decentralization Establishing the national fiscal framework Moving government closer to the people Improving municipal service delivery Tables illustrate the shift of revenues and expenditures from central authorities to intermediate levels of government

**Ghana** Shiyen Chao, 1999-01-01 Ghana is an extremely diverse country ethnically culturally ecologically and economically Women and men play different roles undertake different activities and face different constraints Gender based differences in their activities and practices result from existing gender inequalities Because these gender differences are often fundamental to men and women's livelihoods understanding them is essential to designing policies and projects that will effectively reduce gender inequalities and promote sustainable development A growing body of literature indicates that reducing gender inequalities and increasing women's access to productive resources greatly improves both welfare and

economic productivity Despite recent gains in some areas significant gender inequalities continue to limit women's capabilities and constrain their ability to participate in and contribute to Ghana's economy This report examines key gender inequalities and gender based differences in economic activities opportunities and constraints focusing on two broad areas the links between gender economic productivity and poverty and the development of human capital It is the result of the World Bank's recognition of the need to understand gender issues in order to develop strategies to deal with them and support the government's program to develop a gender strategy In addition it is intended to further the dialogue between the Bank the government other donors and nongovernmental organizations NGOs on how to reduce or eliminate gender specific constraints on economic development in Ghana

**Hungary** Mihaly Kopanyi, 2000-01-01 Modernisation of the public sector reforming intergovernmental fiscal relations enhancing the local

capacity to implement local strategies and developing the legislative and institutional framework for efficient delivery of public services are among the biggest challenges in transition economies Hungary has been a pioneer in local government reform and the Hungary Subnational Development Program SNDP proves the value of an integrated approach Measuring and Apportioning Rents from Hydroelectric Power Developments Mitchell P. Rothman, 2000-01-01 Hydro resources are provided by nature The exploitation of such resources can generate significant economic rent to the owners In the past governments have usually claimed ownership of hydroelectric resources and passed on the rents to their state owned utilities which have used them to expand their systems or provide lower tariffs to their consumers With the restructuring of the electric power sector in many countries a more explicit consideration of hydroelectric rents is required Moreover hydropower resources are often owned by more than one party or at least require cooperation between parties to develop them In this context the measurement and apportionment of hydropower rents between cooperating parties becomes important This paper addresses some of the issues involved in cooperative development of water resources especially for hydroelectric generation It promotes a better understanding of the sources of the benefits and attempts to derive an analytical basis for discussions between cooperating parties This volume will be of interest to hydropower resource earning countries hydropower developers and Bank staff **Trade, Global Policy, and the Environment** Per Fredriksson, 1999-01-01

blame for the recent crisis This paper reviews several features of East Asian corporations showing that they have high leverage and concentrated ownership are typically affiliated with business groups and operate in multiple industries These characteristics affected the performance of corporations prior to the crisis as well as their ability to deal with its aftermath Each economy's level of development also affected how these characteristics interacted with firm performance and valuation Finally the concentration of ownership in the hands of a few large families may have influenced economies institutional development
