Bhattacharya,2001-05-31 Within 50 years computers could have capabilities rivaling that of the human brain Effective utilization of such new technologies poses a significant challenge to the computer science community which finds an ever increasing number of complex applications within its technological grasp In addition to increased complexity most if not all of these applications are also accompanied by an inherent increase in the consequences associated with their failure resulting in the construction of increasingly high consequence complex systems Systems that fall within this domain are beyond the ability to construct in a brute force manner There are two major challenges in developing such systems manage complexity and provide sufficient evidence that the system satisfies dependability constraints Society is tacitly relying on the research community to solve these problems on a timetable satisfying the needs of industry While impressive results have been obtained the research community is still to some extent hamstrung by the lack of realistic case study problems against which to benchmark new techniques and approaches The purpose of High Integrity Software is to explore a cross section of some of the most promising areas of research in the construction of high consequence complex systems for example a case study involving the Bay Area Rapid Transit BART system Because of its scope and complexity the BART case study is being recognized by many in the formal methods community as one of the definitive case study problems and as such provides a valuable insight into the challenges that must be faced in the upcoming years High Integrity Software is suitable as a secondary text for a graduate level course and as a reference for researchers and practitioners in industry Auditing Raymond N. **Masters Theses in the Pure and Applied Sciences** Wade H. Shafer, 2012-12-06 Masters Theses in the Pure and Applied Sciences was first conceived published and disseminated by the Center for Information and Numerical Data Analysis and Synthesis CINDAS at Purdue University in 1957 starting its coverage of theses with the academic year 1955 Beginning with Volume 13 the printing and dissemination phases of the activity were transferred to University Microfilms Xerox of Ann Arbor Michigan with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volumes were handled by an international publishing house to assure improved service and broader dissemination Hence starting with Volume 18 Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York and in the same year the coverage was broadened to include Canadian universities All back issues can also be ordered from Plenum We have reported in Volume 32 thesis year 1987 a total of 12 483 theses titles from 22 Canadian and 176 United States universities We are sure that this broader base for these titles reported will greatly enhance the value of this important annual reference work While Volume 32 reports theses submitted in 1987 on occasion certain universities do report theses submitted in previous years but not reported at the time *Use of Services for Family Planning and Infertility, United States, 1982* Gerry E.

Hendershot, Marjorie C. Horn, William D. Mosher, 1988 The 1982 statistics on the use of family planning and infertility services presented in this report are preliminary results from Cycle III of the National Survey of Family Growth NSFG conducted by the National Center for Health Statistics Data were collected through personal interviews with a multistage area probability sample of 7969 women aged 15-44 A detailed series of questions was asked to obtain relatively complete estimates of the extent and type of family planning services received Statistics on family planning services are limited to women who were able to conceive 3 years before the interview date Overall 79% of currently married nonsterile women reported using some type of family planning service during the previous 3 years There were no statistically significant differences between white 79% black 75% or Hispanic 77% wives or between the 2 income groups The 1982 survey questions were more comprehensive than those of earlier cycles of the survey The annual rate of visits for family planning services in

1982 was 1077 visits 1000 women Teenagers had the highest annual visit rate 1581 1000 of any age group for all sources of family planning services combined Visit rates declined sharply with age from 1447 at ages 15 24 to 479 at ages 35 44 Similar declines with age also were found in the visit rates for white and black women separately Nevertheless the annual visit rate for black women 1334 1000 was significantly higher than that for white women 1033 The highest overall visit rate was for black women 15 19 years of age 1867 1000 Nearly 2 3 of all family planning visits were to private medical sources Teenagers of all races had higher family planning service visit rates to clinics than to private medical sources as did black women age 15 24 White women age 20 and older had higher visit rates to private medical services than to clinics Never married women had higher visit rates to clinics than currently or formerly married women Data were also collected in 1982 on use of medical services for infertility by women who had difficulty in conceiving or carrying a pregnancy to term About 1 million ever married women had 1 or more infertility visits in the 12 months before the interview During the 3 years before interview about 1 9 million women had infertility visits For all ever married women as well as for white and black women separately infertility services were more likely to be secured from private medical sources than from clinics The survey design reliability of the estimates and the terms used are explained in the technical notes
