

TECHNICAL EVALUATION REPORT

EVALUATION OF THE SSL MSE *PLUS*™ RETAINING WALL SYSTEM

Prepared by the
Highway Innovation Technology
Evaluation Center (HITEC), a service
center of the Civil Engineering
Research Foundation (CERF).

CERF REPORT #40441
August 1999

Evaluation Of The Ssl Mse Plus Retaining Wall System

**Highway Innovative Technology
Evaluation Center (U.S.)**

Evaluation Of The Ssl Mse Plus Retaining Wall System:

Evaluation of the SSL MSE Plus Retaining Wall System Highway Innovative Technology Evaluation Center (U.S.),2001-01-01 Prepared by the Highway Innovative Technology Evaluation Center HITEC a CERF service center This report describes a HITEC evaluation designed to determine the basic capabilities and limitations of the MSE Plus System manufactured by SSL LLC for use as a mechanically stabilized earth retaining system The evaluation was conducted based on material design construction performance and quality assurance information outlined in the HITEC Protocol The MSE Plus System features rectangular segmental precast concrete facing panels and galvanized welded wire grid type soil reinforcement

Evaluation of the Keysystem I Retaining Wall Highway Innovative Technology Evaluation Center (U.S.),2000-01-01 Prepared by the Highway Innovative Technology Evaluation Center HITEC a CERF Innovation Center This report describes an evaluation to determine the capabilities and limitations of the KeySystem I Retaining Wall System a mechanically stabilized earth structure developed designed and supplied by Keystone Retaining Wall Systems Inc The evaluation was conducted based on design construction performance and quality assurance information outlined in the HITEC Protocol KeySystem I features modular block facing to which KeyStrips are attached KeyStrips are structural welded wire grid type reinforcement produced from high strength steel

Summary of Evaluation Findings for the Testing of Seismic Isolation and Energy Dissipating Devices Highway Innovative Technology Evaluation Center (U.S.),1999-01-01 Prepared by the Highway Innovative Technology Evaluation Center HITEC a CERF Service Center his report summarizes the results of an evaluation that was designed to test the performance of 11 seismic isolators and dampers The devices were tested for stability response during earthquake simulations and fatigue and weathering effects

Evaluation of the Inter-Lok Retaining Wall System Highway Innovative Technology Evaluation Center (U.S.),2002-01-01 Prepared by the Highway Innovative Technology Evaluation Center HITEC a CERF IIEC Innovation Center This report describes a HITEC evaluation designed to determine the basic capabilities and limitations of the INTER LOK System for use as a technically viable precast mechanically stabilized earth retaining wall system The evaluation was conducted based on design construction performance and quality assurance information outlined in the HITEC Protocol The INTER LOK System features a cross shaped segmental precast concrete facing panel connected to metallic rebar and anchor plate type of soil reinforcement attached to the facing panels by a keyplate that interlocks with the facing panels

Evaluation of the Maccaferri Terramesh System Retaining Wall Highway Innovative Technology Evaluation Center (U.S.),2002-01-01 Prepared by the Highway Innovative Technology Evaluation Center HITEC a CERF IIEC Innovation Center This report describes a HITEC evaluation designed to determine the basic capabilities and limitations of the Terramesh Retaining Wall System for use as a technically viable mechanically stabilized earth retaining wall system The evaluation was conducted based on material design construction performance and quality assurance maininformation outlined in the HITEC Protocol The

Terramesh System supplied by Maccaferri Inc features a Gabion basket facing of various configurations and metal double twisted grid type of soil reinforcement which is manufactured integrally with the basket facing blocks

Evaluation of the Trevipark Automated Parking System Highway Innovative Technology Evaluation Center (U.S.),2001-01-01 Prepared by the Civil Engineering Innovative Technology Evaluation Center a CERF innovation center serving the engineering and construction industries This report presents a CEITEC evaluation of the Trevipark automated parking system which was developed designed and supplied by TREVI S p A of Cesena Italy The evaluation is designed to determine the benefits and limitations of Trevipark for use as a technically viable automated vehicle parking system The evaluation focused on data collection site inspections and analyses The Trevipark system consists of a cylindrical enclosure with a central elevator system to park and store vehicles in a radial pattern This proprietary system is intended to provide safe and secure parking for lower cost smaller site and space requirements less retrieval time and other advantages

Evaluation of the Tricon Retained Soil Wall System Highway Innovative Technology Evaluation Center (U.S.),2002-01-01 Prepared by the Highway Innovative Technology Evaluation Center a CERF IIEC Innovation Center This report describes a HITEC evaluation designed to determine the basic capabilities and limitations of the Tricon System for use as a technically viable precast mechanically stabilized earth retaining wall system The evaluation considered material design construction performance and quality assurance information outlined in the HITEC Protocol

Evaluation of SSET: The Sewer Scanner and Evaluation Technology Civil Engineering Research Foundation,2001-01-01 Prepared by CEITEC a CERF innovation center serving the engineering and construction industries This report describes an evaluation of Sewer Scanner and Evaluation Technology SSET designed to determine the basic capabilities and limitations of SSET for use as a technically viable technology for inspecting sewer pipes The evaluation focused on the performance and in service demonstration of SSET The technology involves digital scanning to obtain a flat unfolded image of the pipeline s interior This evaluation includes field demonstrations performed at 13 municipal public works agencies throughout North America Subsequent to this evaluation SSET was modified to include a fisheye lens camera and fiber optic gyroscope which replaced the rotating mechanical scanner and mechanical gyroscope The evaluation confirmed the operability of SSET and its viability in data presentation A degree of enhancement was recognized with additional features most notably the ability to produce a digital report of the sewer pipe to identify vertical deflection in pipes and to deliver easily comprehensible and manageable results The evaluation also revealed that SSET cannot reproduce all the features typically available from closed circuit television CCTV inspection Such features include the ability to clearly see corrosion infiltration rates and ovality The limitations in applicability were determined and an economic comparison of SSET and CCTV is provided

Environmental Technical Verification Report for Ammonia Recovery Process Environmental Technology Evaluation Center (U.S.),2000-01-01 Prepared by the Environmental Technology Evaluation Center EvTEC a CERF Service Center This report describes the nature and scope of an

environmental evaluation of ThermoEnergy Corporation's Ammonia Recovery Process ARP System a method for recycling ammonia in wastewater The data in this report were collected over a three month pilot study Tests found that the ARP system is capable of removing 75 99% of the ammonia in the waste stream in a domestic wastewater treatment plant The ARP System uses a series of absorption evaporation and crystallization steps to convert ammonia in wastewater into a commercial fertilizer ammonium sulfate The evaluation results clearly indicate that the ARP process is capable of achieving significant ammonia reduction under a range of environmental conditions **Evaluation Findings of the MX 30**

Pavement Marking Retroreflectometer Highway Innovative Technology Evaluation Center (U.S.),2000-01-01 Prepared by the Highway Innovative Technology Evaluation Center HITEC a CERF service center This report presents the results of a detailed evaluation of the MX 30 pavement marking 30 meter retroreflectometer The evaluation is designed to test the measurement bias repeatability and reproducibility of handheld and mobile retroreflectometers produced by several manufacturers

Environmental Technology Verification Report for the Plasma Enhanced Melter ,2003-01-01 Prepared by the Environmental Technology Evaluation Center EvTEC a service center of CERF IIEC This Technology Verification report describes the nature and scope of the environmental evaluation of the performance of the Plasma Enhanced Melter PEM system for waste treatment The evaluation was conducted through a cooperative program established in 1998 between the Washington State Department of Ecology Integrated Environmental Technology Inc Allied Technology Group and the Civil Engineering Research Foundation The goal of this report is to provide potential users and purchasers of the PEM system with information they need to make more informed decisions regarding the performance of PEM as an equivalent or alternative to incineration for treating hazardous waste **Book Review Index** ,2003 Vols 8 10 of the 1965 1984 master

cumulation constitute a title index Professional Memoirs, Corps of Engineers, United States Army and Engineer Department at Large ,1999 American Book Publishing Record ,2000 **Highway Design Manual** California.

Department of Transportation,1990 *Evaluation of the Retained Earth MSE Wall System by Foster Geotechnical, a Division of L.B. Foster Company* Highway Innovative Technology Evaluation Center (U.S.),2005-01-01 Assessing the Long-term Performance of Mechanically Stabilized Earth Walls Travis M. Gerber,2012 Mechanically stabilized earth MSE walls are an important class of infrastructure assets whose long term performance depends on various factors As with most all other classes of assets MSE walls need periodic inspection and assessment of performance To date some agencies have established MSE wall monitoring programs whereas others are looking for guidance tools and funding to establish their own monitoring programs The objective of this synthesis project is to determine how transportation agencies monitor assess and predict the long term performance of MSE walls The information used to develop this synthesis came from a literature review together with a survey and interviews Of the 52 U S and 12 Canadian targeted survey recipients 39 and five respectively responded This synthesis reveals that unlike bridges and pavements MSE walls and retaining walls in general are often

overlooked as assets Fewer than one quarter of state level transportation agencies in the United States have developed some type of MSE wall inventory beyond that which may be captured as part of their bridge inventories Fewer still have the methods and means to populate their inventories with data from ongoing inspections from which assessments of wall performance can be made In the United States there is no widely used consistently applied system for managing MSE walls Wall inventory and monitoring practices vary between agencies This synthesis examines existing practices concerning the nature scope and extent of existing MSE wall inventories It also examines the collection of MSE wall data including the types of performance data collected how they are maintained in wall inventories and databases the frequency of inventory activities and assessment practices relevant to reinforcement corrosion and degradation Later parts of this synthesis discuss how MSE wall performance data are assessed interpreted and used in asset management decisions This synthesis finds that the most well implemented wall inventory and assessment system in the United States is the Wall Inventory Program developed by FHWA for the National Park Service However this system like some others uses condition narratives in a process that can be somewhat cumbersome and subjective Other systems use more direct numeric scales to describe wall conditions and an advantage of such systems is that they are often compatible with those used in assessments of bridges As experience with MSE walls accumulates agencies will likely continue to develop refine and better calibrate procedures affecting design construction condition assessment and asset management decisions One portion of this synthesis is dedicated to summarizing the actions taken thus far by survey respondents to improve the long term performance of their MSE walls Many agencies prescribe the use of a pre approved wall design and or wall supplier Other actions or policies frequently focus on drainage related issues Summary Evaluation of the Stabilized Earth Wall System by TandB Structural Systems,2012-03-01 Evaluation of the KeySystem One Retaining Wall Highway Innovative Technology Evaluation Center (U.S.),2000-01-01 The report describes a HITEC evaluation designed to determine the basic capabilities and limitations of Keysystem I for use as a technically viable precast MSE retaining wall system The evaluation was conducted based on design construction performance and quality assurance information outlined in the HITEC Protocol KeySystem I features modular block facing MBW to which KeyStrips are attached KeyStrips are structural welded wire grid type reinforcement produced from high strength steel **Evaluation of the Keysystem II Retaining Wall by Keystone Retaining Wall Systems, Inc. with TenCate Geosynthetics' Geogrid Reinforcement** Highway Innovative Technology Evaluation Center (U.S.),Keystone Retaining Wall Systems, Inc,TenCate Geosynthetics,2012-01-01

Fuel your quest for knowledge with is thought-provoking masterpiece, **Evaluation Of The Ssl Mse Plus Retaining Wall System** . This educational ebook, conveniently sized in PDF (PDF Size: *), is a gateway to personal growth and intellectual stimulation. Immerse yourself in the enriching content curated to cater to every eager mind. Download now and embark on a learning journey that promises to expand your horizons. .

Evaluation Of The Ssl Mse Plus Retaining Wall System Introduction

In the digital age, access to information has become easier than ever before. The ability to download Evaluation Of The Ssl Mse Plus Retaining Wall System has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Evaluation Of The Ssl Mse Plus Retaining Wall System has opened up a world of possibilities. Downloading Evaluation Of The Ssl Mse Plus Retaining Wall System provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Evaluation Of The Ssl Mse Plus Retaining Wall System has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Evaluation Of The Ssl Mse Plus Retaining Wall System. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Evaluation Of The Ssl Mse Plus Retaining Wall System. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Evaluation Of The Ssl Mse Plus Retaining Wall System, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Evaluation Of The Ssl Mse Plus Retaining Wall System has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading

practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

FAQs About Evaluation Of The Ssl Mse Plus Retaining Wall System Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Evaluation Of The Ssl Mse Plus Retaining Wall System is one of the best book in our library for free trial. We provide copy of Evaluation Of The Ssl Mse Plus Retaining Wall System in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Evaluation Of The Ssl Mse Plus Retaining Wall System. Where to download Evaluation Of The Ssl Mse Plus Retaining Wall System online for free? Are you looking for Evaluation Of The Ssl Mse Plus Retaining Wall System PDF? This is definitely going to save you time and cash in something you should think about.
