The Explicit and the Implicit in Language and Speech Liudmila Liashchova,2018-10-16 Our ability to acquire a language one of the most complex semiotic systems is stunning However to describe and explain even a small fraction of this system and of this ability is a great challenge This book brings together modified papers of seventeen university scholars from Belarus Germany Russia and Lithuania originally presented at an international conference held in Minsk Belarus in 2017 on different hidden and implicit aspects of language and the ways of disclosing and explicating them Language is understood by them differently as a cognitive ability a specific semiotic structure interwoven with culture and a discourse This book will be of great interest to a wide range of linguist theoreticians specialists in applied linguistics and the general reader with an

interest in understanding what exactly language is **Is That True?** Joel Best, 2021-02-16 Across disciplines critical thinking is praised taught and put into practice But what does it actually mean to think critically In this brief volume sociologist Joel Best examines how to evaluate arguments and the evidence used to support them as he hones in on how to think in the field of sociology and beyond With inimitable style that melds ethnographic verve with dry humor Best examines the ways in which sociologists engage in fuzzy thinking through bias faddish cultural waves spurious reasoning and implicit bias The short chapters cover A general introduction to critical thinking and logic in the social sciences Sociology as an enterprise Key issues in thinking critically about sociological research Challenging questions that confront sociologists and a call for the discipline to meet those challenges Students across disciplines will learn the building blocks of critical thinking in a sociological context and come away with key concepts to put into practice *Bayesian Rationality* Mike Oaksford, Nick Chater, 2007-02-22 For almost 2 500 years the Western concept of what is to be human has been dominated by the idea that the mind is the seat of reason humans are almost by definition the rational animal In this text a more radical suggestion for explaining these puzzling aspects of human reasoning is put forward **Thinking Critically About Abortion** Nathan Nobis, Kristina Grob, 2019-06-19 This book introduces readers to the many arguments and controversies concerning abortion While it argues for ethical and legal positions on the issues it focuses on how to think about the issues not just what to think about them It is an ideal resource to improve your understanding of what people think why they think that and whether their and your arguments are good or bad and why It s ideal for classroom use discussion groups organizational learning and personal reading From the Preface To many people abortion is an issue for which discussions and debates are frustrating and fruitless it seems like no progress will ever be made towards any understanding much less resolution or even compromise Judgments like these however are premature because some basic techniques from critical thinking such as carefully defining words and testing definitions stating the full structure of arguments so each step of the reasoning can be examined and comparing the strengths and weaknesses of different explanations can help us make progress towards these goals When emotions run high we sometimes need to step back and use a passion for calm cool critical thinking This helps us better understand the positions and arguments of people who see things differently from us as well as our own positions and arguments And we can use critical thinking skills help to try to figure out which positions are best in terms of being supported by good arguments after all we might have much to learn from other people sometimes that our own views should change for the better Here we use basic critical thinking skills to argue that abortion is typically not morally wrong We begin with less morally controversial claims adults children and babies are wrong to kill and wrong to kill fundamentally because they we are conscious aware and have feelings We argue that since early fetuses entirely lack these characteristics they are not inherently wrong to kill and so most abortions are not morally wrong since most abortions are done early in pregnancy before consciousness and feeling develop in the fetus Furthermore since the right to life is not the right to someone else s

body fetuses might not have the right to the pregnant woman's body which she has the right to and so she has the right to not allow the fetus use of her body This further justifies abortion at least until technology allows for the removal of fetuses to other wombs Since morally permissible actions should be legal abortions should be legal it is an injustice to criminalize actions that are not wrong In the course of arguing for these claims we 1 discuss how to best define abortion 2 dismiss many common question begging arguments that merely assume their conclusions instead of giving genuine reasons for them 3 refute some often heard everyday arguments about abortion on all sides 4 explain why the most influential philosophical arguments against abortion are unsuccessful 5 provide some positive arguments that at least early abortions are not wrong 6 briefly discuss the ethics and legality of later abortions and more This essay is not a how to win an argument piece or a tract or any kind of apologetics It is not designed to help anyone win debates everybody wins on this issue when we calmly and respectfully engage arguments with care charity honesty and humility This book is merely a reasoned systematic introduction to the issues that we hope models these skills and virtues Its discussion should not be taken as absolute proof of anything much more needs to be understood and carefully discussed always

The History and Theory of Rhetoric James A. Herrick, 2020-12-29 By tracing the traditional progression of rhetoric from the Greek Sophists to contemporary theorists this textbook gives students a conceptual framework for evaluating and practicing persuasive writing and speaking in a wide range of settings and in both written and visual media The book's expansive historical purview illustrates how persuasive public discourse performs essential social functions and shapes our daily worlds drawing on the ideas of some of history's greatest thinkers and theorists The seventh edition includes greater attention to non Western rhetorics feminist rhetorics the rhetoric of science and European and American critical theory Known for its clear writing style and contemporary examples throughout The History and Theory of Rhetoric emphasizes the relevance of rhetoric to today's students This revised edition serves as a core textbook for rhetoric courses in both English and communication programs covering both the historical tradition of rhetoric and contemporary rhetoric studies This edition includes an instructor's manual and practice quizzes for students at www.routledge.com/cw/herrick

Legal Argumentation and Evidence Douglas Walton, 2010-11-01 A leading expert in informal logic Douglas Walton turns his attention in this new book to how reasoning operates in trials and other legal contexts with special emphasis on the law of evidence The new model he develops drawing on methods of argumentation theory that are gaining wide acceptance in computing fields like artificial intelligence can be used to identify analyze and evaluate specific types of legal argument In contrast with approaches that rely on deductive and inductive logic and rule out many common types of argument as fallacious Walton's aim is to provide a more expansive view of what can be considered reasonable in legal argument when it is construed as a dynamic rule governed and goal directed conversation This dialogical model gives new meaning to the key notions of relevance and probative weight with the latter analyzed in terms of pragmatic criteria for what constitutes plausible evidence rather than truth

Perspectives and Approaches Frans H. van Eemeren, Rob Grootendorst, J. Anthony Blair, Charles A.
