Conflict and Cooperation in the Gulf Region Joseph Kostiner, 2009-01-22 This book analyzes four main episodes of conflict and defense which have affected the region during the last three decades the Iran Iraq war 1980 1988 which effected the Gulf Cooperation Council GCC from a close neighborly distance the Iraq Kuwait war 1990 1991 which constituted an attempt to invade the GCC and eliminate one of its member states Kuwait And the subsequent attempts to reestablish a regional inter state stability in the Gulf during the mid 1990s approximately and the war of Islamic terrorism notably al Qaeda against Saudi Arabia leading up to 2005 Each episode was driven by inimical interests and evolved as a destabilizing influence on the Gulf states At the same time each conflict resulted in a paradoxical combination rivalry and cooperation among the GCC states themselves A perpetual sequence of conflict and cooperation thus developed *Iran's Reconstruction Jihad* Eric

Lob, 2020-02-27 The first full length study to examine the significance of the critical but neglected Iranian organization and ministry Reconstruction Jihad *Constructing Regional Security* W. Durch, 2016-04-30 In this book William Durch examines conventional weapons proliferation since World War II the role of arms transfers in fueling regional conflict and prospects for curbing the global arms trade Noting that supply side arms control efforts which seek to constrain the companies and countries that produce and distribute major conventional weapons have a poor international track record Durch argues for a broader approach that tries to get at the demand side of the equation Addressing the political and regional dynamics that impel arms acquisitions he looks at how arms control might be combined with confidence and security building measures to contain demand and how value based arms trade control measures like codes of conduct could be implemented in stepwise fashion consistent with US national interests in regional stability **India and Iran in Contemporary Relations** R. Sidda

Goud, Manisha Mookherjee, 2014-04-20 This edited book is an outcome of the International Conference on India and Iran in Contemporary Relations organized by the Centre for Indian Ocean Studies Osmania University in cooperation with the Iran Consulate General at Hyderabad in India in November 2013 The book addresses the India Iran bilateral relations dating back to the beginning of the Indo Aryan civilization in the 7th Century B C to the current global controversy over the Iranian nuclear programme and India's stand on the issue of sanctions imposed by the United States The book highlights besides economic and commercial ties the strong cultural relations The volume analyses in depth the new areas of cooperation and conflict the extra regional powers energy and nuclear security and economic and trade cooperation This book will be of considerable interest to students and scholars of international relations sociology politics and economics *Arms Control and Iranian Foreign Policy* Bobi Pirseyedi, 2012-10-12 Since 2003 when the world learned that the Islamic Republic of Iran had succeeded in secretly developing a capability to enrich uranium and separate plutonium the question of Iran's nuclear program has ranked high on the international political and arms control agenda This book studies the IRI's diplomatic operations in the issue area of arms control and demonstrates how arms control diplomacy has formed an integral part of the

IRI's foreign policy during the various phases of its history. Furthermore, it fills a gap in the research literature on Iran's foreign and security policies by providing the first comprehensive account of Iranian arms control diplomacy under the Islamic regime. This book aims at reconstructing Iran's diplomatic operations in four distinct thematic areas of arms control: conventional, chemical, biological, and nuclear arms control. It also looks at the diplomatic means by which the IRI's leadership has tried to achieve its arms control objectives. This text also seeks to identify and examine the individual objectives that have guided Iranian policy choices in the domain of arms control. Finally, it places the reconstructed Iranian objectives into a broader context by elaborating on the fundamental values or foreign policy goals that the IRI's arms control objectives have served. This highly informative and thought-provoking volume will be valuable reading for students, researchers, and academics as well as for commentators and policy makers interested in Middle East studies, Iranian studies, international relations, and arms control.

Global Rogues and Regional Orders Il Hyun Cho, 2016. *Global Rogues and Regional Orders* examines the relationship between nuclear proliferation and regional order in East Asia and the Middle East, looking at what factors shape the perceptions and responses of relevant regional actors to North Korea and Iran, why some of these regional actors cooperate with the United States while others do not, and the consequences of shifting relations among these countries.

Hidden Iran Ray Takeyh, 2025-06-25. A leading expert explains why we fail to understand Iran and offers a new strategy for redefining this crucial relationship. For more than a quarter of a century, few countries have been as resistant to American influence or understanding as Iran. The United States and Iran have long eyed each other with suspicion, all too eager to jump to conclusions and slam the door. What gets lost along the way is a sense of what is actually happening inside Iran and why it matters. With a new hard-line Iranian president making incendiary pronouncements and pressing for nuclear developments, the consequences of not understanding Iran have never been higher. Ray Takeyh, a leading expert on Iran's politics and history, has written a groundbreaking book that demystifies the Iranian regime and shows how the fault lines of Iran's domestic politics serve to explain its behavior. In *Hidden Iran*, he explains why this country has so often confounded American expectations and why its outward hostility does not necessarily preclude the normalization of relations. Through a clearer understanding of the competing claims of Muslim theology, republican pragmatism, and factional competition, he offers a new paradigm for managing our relations with this rising power.

The Greater Middle East in Global Politics Mehdi Amineh, 2007-10-30. This anthology unites in one volume two studies of the Greater Middle East in global politics, each conceptual and empirical. First, it is a historical comparative study of politics and societies in selected Greater Middle Eastern countries from Napoleon's invasion of Ottoman Egypt in 1798 up until today. It addresses development and change in these societies as results of the complex interactions between external developments, the rise and expansion of European industrialized powers, and internal developments, the disintegration of Islamic Empires, their transformation into nation states, and their efforts to industrialize and modernize. Second, it is an empirical case study of states and societies of the Greater

Middle East in global politics addressing themes such as nationalism revolution political Islam democracy globalization regionalism revolution war energy and conflict and cooperation The book is comprised of three parts and nineteen chapters Contributors include Mehdi Parvizi Amineh Simon Bromley Robert M Cutler Louisa Dris A t Hamadouche S N Eisenstadt Femke Hoogeveen Henk Houweling B M Jain Mehran Kamrava Roger Kangas Fred H Lawson Prithvi Ram Mudiam Nilgun Onder Wilbur Perlot Richard Pomfret Kurt W Radtke Mirzohid Rahimov Eva Patricia Rakel and Yahia H Zoubir

Saudi-Iranian Relations Since the Fall of Saddam Frederic Wehrey, Theodore W. Karasik, Alireza Nader, Jeremy J. Ghez, Lydia Hansell, 2009-03-17 This book surveys how Saudi Iranian relations have unfolded in the Persian Gulf Iraq Lebanon and Palestine since 2003 identifying the sources of rivalry and cooperation between the two powers Understanding and leveraging this relationship will be a critical part of U S efforts to promote stability after the drawdown of U S forces in Iraq and to manage the regional impact of Iran s nuclear ambitions

Crude Awakenings Steve A. Yetiv, 2010-12-15 The real story of global oil over the past twenty five years is not about the spillover effects of Palestinians fighting Israelis or terrorist attacks on U S forces in Saudi Arabia and Yemen or Iraq s stormy relationship with Kuwait It is not even about periodic small and large scale U S attacks on Iraq Rather the real story is about longer term developments that have changed the international relations of the Middle East politics at the global level and world oil markets These developments have increased oil stability from the Introduction Thirty years after OPEC shattered world markets for oil the Western world remains profoundly dependent on foreign particularly Middle Eastern sources of petroleum U S political rhetoric is suffused with claims about the vulnerability caused by this dependence Hence many political analysts assume that a search for stability of petroleum supplies is an important element of contemporary American foreign policy Steve A Yetiv argues that common assumptions about oil markets are wrong Although prices remain volatile Yetiv s account portrays a world market in petroleum products far more benign and predictable than the one to which we are accustomed In *Crude Awakenings* he identifies and analyzes real and potential threats to the global energy supply including wars revolutions coups dangerous alliances oil embargoes Islamic radicalism and transnational terrorism However he also shows how some of these threats have been mitigated and how global oil security has been reinforced

Power, Islam, and Political Elite in Iran Eva Rakel, 2008-11-30 The Iranian Islamic revolution brought about a political system based on a combination of state institutions that derive their legitimacy from Islamic law and republican institutions legitimized by the people As there are no legal political parties in the Islamic Republic of Iran political factions represent the varying ideological and material interests of members of the political elite and their supporters This book analyzes the rivalries between the political factions and their related state institutions and the impact of the dynamics of factionalism on domestic economic and socio cultural and foreign policy formulation It shows that tensions inherent to the structure of state institutions and factional rivalries slow down the process of democratization and economic reforms in the Islamic Republic of Iran

Annual Book Markaz al-Imārāt

lil-Dirāsāt wa-al-Buḥūth al-Istirātijīyah,2008 *National Security Imperatives and the Neorealist State* Michael S. Grogan,2000 This thesis argues that pragmatic neorealist interests reducing Iran s international isolation opening avenues for economic cooperation and commercial exchange restoring religious and cultural links and safeguarding the mutually advantageous relationships with influential powers in the region are the true foundations of Iranian national security and foreign policy decisionmaking Iran s imperative has been and still is focused on the pragmatic national security interests of the nation state model vice the ideological potential for spreading its brand of Islamic revolution abroad The causes of these Islamic revolutionary groups no matter how noble in the Iranian leaderships eye do not outweigh the more classic nation state decisionmaking process that the Iranian government undergoes when it determines the best course of action on an issue of foreign policy and or national security realpolitik It is the neorealist approach which always wins out in national security matters of a state Presented are four case studies of Iranian relations with Azerbaijan Turkey Israel and four Persian Gulf States the United Arab Emirates Bahrain Oman and Saudi Arabia What each reveals is an Islamic Iran s whose policy decisions and actions compelled by the rational state model of neorealism and not ideology *Saudi Clerics and Shi'a Islam* Raihan Ismail,2016-02-05 The Saudi ulama are known for their strong opposition to Shi a theology Shi a communities in Saudi Arabia and external Shi a influences such as Iran and Hezbollah Their potent hostility combined with the influence of the ulama within the Saudi state and the Muslim world has led some commentators to blame the Saudi ulama for what they see as growing sectarian conflict in the Middle East However there is very little understanding of what reasoning lies behind the positions of the ulama and there is a significant gap in the literature dealing with the polemics directed at the Shi a by the Saudi religious establishment In *Saudi Clerics and Shi'a Islam* Raihan Ismail looks at the discourse of the Saudi ulama regarding Shiism and Shi a communities analysing their sermons lectures publications and religious rulings The book finds that the attitudes of the ulama are not only governed by their theological convictions regarding Shiism but are motivated by political events involving the Shi a within the Saudi state and abroad It also discovers that political events affect the intensity and frequency of the rhetoric of the ulama at any given time **Revolution and War** Stephen M. Walt,2013-08-09 Revolution within a state almost invariably leads to intense security competition between states and often to war In *Revolution and War* Stephen M Walt explains why this is so and suggests how the risk of conflicts brought on by domestic upheaval might be reduced in the future In doing so he explores one of the basic questions of international relations What are the connections between domestic politics and foreign policy Walt begins by exposing the flaws in existing theories about the relationship between revolution and war Drawing on the theoretical literature about revolution and the realist perspective on international politics he argues that revolutions cause wars by altering the balance of threats between a revolutionary state and its rivals Each state sees the other as both a looming danger and a vulnerable adversary making war seem both necessary and attractive Walt traces the dynamics of this argument through detailed studies of the French Russian and

Iranian revolutions and through briefer treatment of the American Mexican Turkish and Chinese cases He also considers the experience of the Soviet Union whose revolutionary transformation led to conflict within the former Soviet empire but not with the outside world An important refinement of realist approaches to international politics this book unites the study of revolution with scholarship on the causes of war
