linked essays Excommunication pursues this elusive topic by looking at mediation in the face of banishment exclusion and heresy and by contemplating the possibilities of communication with the great beyond First Galloway proposes an original theory of mediation based on classical literature and philosophy using Hermes Iris and the Furies to map out three of the most prevalent modes of mediation today mediation as exchange as illumination and as network Then Thacker goes boldly beyond Galloway s classification scheme by examining the concept of excommunication through the secret link between the modern horror genre and medieval mysticism Charting a trajectory of examples from H P Lovecraft to Meister Eckhart Thacker explores those instances when one communicates or connects with the inaccessible dubbing such modes of mediation haunted or weird to underscore their inaccessibility Finally Wark evokes the poetics of the infuriated swarm as a queer politics of heresy that deviates from both media theory and the traditional left He posits a critical theory that celebrates heresy and that is distinct from those that now venerate Saint Paul Reexamining commonplace definitions of media mediation and communication Excommunication offers a glimpse into the realm of the nonhuman to find a theory of mediation adequate to our present condition

Zones of Focused Ambiguity in Siri Hustvedt's Works Johanna Hartmann, Christine Marks, Hubert Zapf, 2016-05-10 This collection comprises essays from various interdisciplinary perspectives e g literary scholarship intermediality art history psychoanalysis philosophy and medicine to analyze and interpret the fictional and non fictional works by Siri Hustvedt an author whose reputation and public presence have been growing steadily in the 21st century and who is recognized as one of the most widely read and appreciated contemporary American writers In her significance and stature as a public intellectual she is not merely an American writer but a transnational cosmopolitan author who develops new forms not only of literary narrative but of interdisciplinary thought and

writing bringing together otherwise separated genres and branches of knowledge in a broad spectrum between literature and philosophy historiography and art psychoanalysis and neuroscience narrative and medicine The present volume is structured into the parts Literary Creation and Communication Psychoanalysis and Philosophy Medicine and Narrative Vision Perception and Power and Trauma Memory and the Ambiguities of Self and closes with an interview of Siri Hustvedt by Susanne Becker in which Hustvedt elucidates her personal conception of her own creative processes of writing Small Press ,1997 State of the art in Biometrics Jucheng Yang,Loris Nanni,2011-07-27 Biometric recognition is one of the most widely studied problems in computer science The use of biometrics techniques such as face fingerprints iris and ears is a solution for obtaining a secure personal identification However the old biometrics identification techniques are out of date This goal of this book is to provide the reader with the most up to date research performed in biometric recognition and describe some novel methods of biometrics emphasis on the state of the art skills The book consists of 15 chapters each focusing on a most up to date issue The chapters are divided into five sections fingerprint recognition face recognition iris recognition other biometrics and biometrics security The book was reviewed by editors Dr Jucheng Yang and Dr Loris Nanni We deeply appreciate the efforts of our guest editors Dr Girija Chetty Dr Norman Poh Dr Jianjiang Feng Dr Dongsun Park and Dr Sook Yoon as well as a number of anonymous reviewers *Self-Deception's Puzzles and Processes* Jason Kido Lopez,2016-08-16 The contemporary literature on self deception was born out of Jean Paul Sartre s work on bad faith lying to oneself As time has progressed the conception of self deception has moved further and further away from Sartre s conception of bad faith In *Self Deception s Puzzles and Processes A Return to a Sartrean View* Jason Kido Lopez argues that this departure is a mistake and that we should return to thinking about self deception in a Sartrean fashion in which we are self deceived when we intentionally use the strategies and methods of interpersonal deception on ourselves Since literally tricking ourselves cannot work we will always see through our own self deception after all self deception merely consists of the attempt to trick ourselves in this way Other scholars have rejected this notion of self deception historically dismissing it as paradoxical Lopez argues first that it isn t paradoxical and he further suggests that moving away from this notion of self deception has caused the contemporary literature on the topic to be littered with disparate and conflicting theories Indeed there are a great many ways to avoid the allegedly paradoxical Sartrean notion of self deception and the resulting plethora of accounts lead to a fragmented picture of self deception If however the Sartrean view isn t paradoxical then there was no need for the host of contradictory theories and most researchers on self deception have missed what was originally so intriguing about self deception that it like bad faith is the process of literally trying to trick oneself into believing what is false or unwarranted *Self Deception s Puzzles and Processes* will be of great interest to students and scholars of epistemology philosophy of mind psychology and continental philosophy and to anyone else interested in the problems of self deception

The Architect's Oracle

Tiffani Manuella, 2024-12-10

1506 Rome reverberates with the creation of St Peter's Basilica. Hidden within the rising edifice, a young woman Elara Moretti lives a double life. Disguised as the apprentice Elio, she infiltrates Donato Bramante's workshop, her architectural genius masked by a necessary deception. But Elara uncovers more than architectural brilliance; she finds a hidden language of esoteric symbols woven into the basilica's design, a prophecy foretelling a cataclysmic event timed to the completion of the dome. Driven by her INTJ nature, Elara embarks on a perilous investigation. Her secret knowledge becomes a heavy burden, a weight shared only with the stars and the silent stones. As the dome ascends towards heaven, so does the danger, threatening not only the nascent basilica but the entire city. Elara must convince the skeptical authorities, including the formidable Bramante himself, before it's too late. Complicating her mission is Lorenzo Bellini, a Vatican astronomer whose discerning gaze sees more than the apprentice's facade. Their shared fascination with the cosmos and the terrestrial kindles a dangerous attraction, a delicate dance amidst impending doom. Is Lorenzo a potential ally or a threat to Elara's carefully guarded secret? Elara's quest plunges her into the labyrinthine corridors of the Vatican, a world of whispering secrets and hidden agendas. She navigates dusty archives and clandestine meetings, uncovering a conspiracy stretching back centuries. Aided by the reclusive scholar Silas Moreau and the unwavering artisan Iris Russo, Elara must decipher the prophecy's true meaning before Rome meets its foretold destruction. But the prophecy is more intricate than she imagined, revealing a corruption within the very heart of the Church. As the dome nears completion, Elara faces her ultimate challenge: Can she expose the conspirators and avert not just a physical disaster but a symbolic one that threatens to reshape the religious landscape of Europe? The fate of St Peter's of Rome and of Elara herself hangs precariously in the balance, a testament to the power of one woman who dared to defy the constraints of her time.
