Iron Age In Lowland Britain:

The Iron Age in Lowland Britain D.W. Harding, 2014-11-13 This book was written at a time when the older conventional diffusionist view of prehistory largely associated with the work of V Gordon Childe was under rigorous scrutiny from British prehistorians who still nevertheless regarded the Arras culture of eastern Yorkshire and the Belgic cemeteries of south eastern Britain as the product of immigrants from continental Europe Sympathetic to the idea of population mobility as one mechanism for cultural innovation as widely recognized historically it nevertheless attempted a critical re appraisal of the southern British Iron Age in its continental context Subsequent fashion in later prehistoric studies has favoured economic social and cognitive approaches and the cultural historical framework has largely been superseded Routine use of radiocarbon dating and other science based applications and new field data resulting from developer led archaeology have revolutionized understanding of the British Iron Age and once again raised issues of its relationship to continental Europe

The Routledge Handbook of the Bioarchaeology of Human Conflict Christopher Knüsel, Martin Smith, 2013-12-17 If human burials were our only window onto the past what story would they tell Skeletal injuries constitute the most direct and unambiguous evidence for violence in the past Whereas weapons or defenses may simply be statements of prestige or status and written sources are characteristically biased and incomplete human remains offer clear and unequivocal evidence of physical aggression reaching as far back as we have burials to examine Warfare is often described as senseless and as having no place in society Consequently its place in social relations and societal change remains obscure The studies in The Routledge Handbook of the

Bioarchaeology of Human Conflict present an overview of the nature and development of human conflict from prehistory to recent times as evidenced by the remains of past people themselves in order to explore the social contexts in which such injuries were inflicted A broadly chronological approach is taken from prehistory through to recent conflicts however this book is not simply a catalogue of injuries illustrating weapon development or a narrative detailing progress in warfare but rather provides a framework in which to explore both continuity and change based on a range of important themes which hold continuing relevance throughout human development
