 Thomas A. Crumm,2010 Tom Crumm thinks the American auto industry can regain the world leadership it once enjoyed in
 design manufacturing and sales of world class quality vehicles and profitability There are nearly a million American jobs at
 stake and when the ideas in this book spread to component and other industries it becomes fuel for discussion of a
 turnaround of America s industrial sector and a turnaround of the economy General Motor s CEO Roger Smith was a
 visionary and fully realized that change was needed at GM Tom Crumm played a vital role in the rethinking that was to help
 the company steer a new course as a strategic planner he was deeply involved in the creation of the Saturn project in 1985
 Many lessons may be learned from Saturn s rise and fall that could be used to further the understanding of how the American
 manufacturing sector can be restored to its world class position These include corporate culture and leadership or the lack of
 it the integration of technology and workers employee empowerment and labor relations supplier relations and vertical
 integration and sales philosophy and customer satisfaction The biggest threat to a worker s job is an unprofitable company
 Accordingly the adversarial relationship with the company was not in the best long term interest of union members The union
 had to change as well as the company This point and the whole discussion will be of compelling interest to all who want to
 know what happened to America s auto making capability Others have recently tried to explain what went wrong in the auto
 industry Crash Course by Paul Ingrassia for instance shows that the author had extraordinary access to behind the scenes
 meetings and conversations but he has little to say about engineering manufacturing or product development This book
 addresses just those practical areas where productive change can be made Business Review ,1993-07 Capital
