technology learning technology As a once popular song went Something s happening here but it s just not exactly clear The  
world appears to be a smaller less remote place We live in it but we are not necessarily closely tied to it We lack a  
satisfactory understanding of it So we are left with a paradox In an information age information alone will neither inform nor  
improve us as citizens nor our democracy society or in stitutions No improvement will take some effort It is a heavy burden to  
be reflective indeed analytical and disciplined but only constructively constrained by different perspectives The science

As D R Sarewitz a former geologist now congressional staffer and an author put it After all the important and often  
controversial policy dilemmas posed by issues such as nuclear energy toxic waste disposal global climate change or biotech

considerations with other criteria that are explicitly nonscientific ethics esthetics equity ideology Trade offs must be made in
