contemporary philosophical theologian Vincent Brummer In his many books and articles Brummer has demonstrated how the tools of philosophical analysis are not only fruitful but also essential for dealing with the central issues of systematic theology The title of this volume *Meaning and the Christian Faith* highlights two characteristic themes that recur throughout the many writings of Vincent Brummer Much of his work has been devoted to exploring the meaning of the Christian faith and especially of its central claim that God is a personal being whose fellowship believers may enjoy On the other hand Brummer has also shown that religious belief should not be understood as an explanatory theory but rather as a way in which believers understand the meaning of their lives and their experience of the world and direct their lives accordingly Thus in the Christian tradition believers claim that their lives are meaningful because they seek to attain ultimate happiness in the love of God In the introductory sections throughout this volume Vincent Brummer describes how he came to pay attention to the various themes dealt with in his writings and explains why he came to deal with them in the ways he did

Paradox and Perception Carol L. Graham, Eduardo Lora, 2010-09-01 The quality of life concept of quality of life is a broad one It incorporates basic needs but also extends beyond them to include capabilities the livability of the environment and life appreciation and happiness Latin America's diversity in culture and levels of development provide a laboratory for studying how quality of life varies with a number of objective and subjective measures These measures range from income levels to job insecurity and satisfaction to schooling attainment and satisfaction to measured and self assessed health among others Paradox and Perception greatly improves our understanding of the determinants of well being in Latin America based on a broad quality of life concept that challenges some standard assumptions in economics including those about the relationship between happiness and income The authors analysis builds upon a number of new approaches in economics particularly those related to the study of happiness and finds a number of paradoxes as the region's respondents evaluate their well being These include the paradox of unhappy growth at the macroeconomic level happy peasants and frustrated achievers at the microlevel and surprisingly high levels of satisfaction with public services among the region's poorest They also have important substantive links with several of the region's realities such as high levels of income inequality volatile macroeconomic performance and low expectations of public institutions and faith in the capacity of the state to deliver Identifying these perceptions paradoxes and their causes will contribute to the crafting of better public policies as well as to our understanding of why populist politics still pervade in much of the region
