Benink, 1992 The co ordination of regulations in Europe is a process characterized by a huge amount of information in different forms decisions regulations directives recommendations and opinions at various stages of consideration While current developments are debated in the influential media no coherent overview is offered of the European Community co ordination efforts as a whole nor of relationships with other international regulations produced for example in the framework of the Bank for International Settlements BIS Such an overview is essential in order to gain a proper understanding of the consequences for the various countries

European Financial Markets and Institutions Jakob de Haan, Sander Oosterloo, Dirk Schoenmaker, 2009-01-15 Written for undergraduate and graduate students this textbook provides a fresh analysis of the European financial system European Financial Linkages International Monetary Fund, 2010-12-01 We document external investment positions among European Union countries at the start of the financial crisis through the creation of a new database comprising bilateral external financial asset and liabilities excluding reserve assets and derivatives While there are some gaps in the data the overall coverage of reported bilateral net international investment positions IIPs appears satisfactory The dataset provides a richer picture of financial linkages enabling us to map the financing of Euro area imbalances Creditor and debtor positions vis vis the rest of the EU have tended to increase between 2000 and 2008 with capital flowing largely from wealthier to catching up economies This has in particular resulted in an increased interdependency among Euro Area economies

Competition and Profitability in European Financial Services Morten Balling, Frank Lierman, Andy Mullineux, 2006-04-18 Financial services firms play a key role in the European economy The efficiency and profitability of these firms and the competition among them have an impact on allocation of savings financing of investment economic growth the stability of the financial system and the transmission of monetary policy This collection of research contributions includes evaluations of trends in the European financial service industry and examinations of the driving forces of efficiency competition and profitability of financial firms and institutions in Europe The papers have been
