Essential Guide to Food Additives Mike Saltmarsh, 2019-08-01 Food additives have played and still play an essential role in the food industry Additives span a great range from simple materials like sodium bicarbonate essential in the kitchen for making cakes to mono and diglycerides of fatty acids an essential emulsifier in low fat spreads and in bread It has been popular to criticise food additives and in so doing to lump them all together but this approach ignores their diversity of history source and use This book includes food additives and why they are used safety of food additives in Europe additive legislation within the EU and outside Europe and the complete listing of all additives permitted in the EU The law covering food additives in the EU which was first harmonised in 1989 has been amended frequently since then but has now been consolidated with the publication of Regulations 1331 2008 and 1129 2011 This 4th edition of the Guide brings it up to date with the changes introduced by this legislation and by the ongoing review of additives by EFSA Providing an invaluable resource for food and drink manufacturers this book is the only work covering in detail every additive its sources and uses Those working in and around the food industry students of food science and indeed anyone with an interest in what is added to their food will find this a practical book full of fascinating details

Saltmarsh's Essential Guide to Food Additives Mike Saltmarsh, 2020-10-30 Food additives play a vital role in allowing food manufacturers to provide the range of foods that are available in the developed countries of the world Additives cover a considerable range from the recognisable sodium bicarbonate used to make cakes in the domestic kitchen to mono and di acetyltartaric esters of mono and diglycerides of fatty acids used as emulsifiers in commercial bread production They include curcumin the yellow colour in turmeric beeswax and citric acid the acid in citrus fruit as well as substances prepared synthetically It has long been fashionable in the media to criticise additives and in so doing to lump them all together but this ignores their diversity

their vital role in food production and preservation and the extensive testing they have undergone before being approved. This book outlines why additives are used, the testing regime within Europe and a complete listing of all additives permitted within the EU. The law covering food additives in the EU which was harmonised in 1989 has been revised a number of times, most recently by the publication of Regulations 1333/2008 and 1129/2011. These Regulations have been amended a number of times with additives being removed or added. This fifth edition of the Guide brings it up to date with a revision of every chapter to reflect the current situation. Providing an invaluable resource for food and drink manufacturers, this book is the only work covering in detail every additive, its sources and uses. Those working in and around the food industry, students of food science and indeed anyone with an interest in what is in their food will find this a practical book full of fascinating details.

The Economical European Guide Carl Wilson, 1913. Food and Health in Europe Aileen Robertson, 2004-01-28. Poor nutrition, foodborne disease and lack of secure access to good food make an important contribution to the burden of disease and mortality in the WHO European Region. Better diets, food safety and food security will not only reduce or prevent suffering to individuals and societies but also help cut costs to health care systems and bring social and economic benefits to countries. People's chances for a healthy diet depend less on individual choices than on what food is available and whether it is affordable. Policies to benefit health through good food and nutrition must extend beyond the health sector to include sectors ranging from agriculture and food processing, manufacturing and trade to transport, retailing, catering and advertising. Food and nutrition policies should be coordinated so that public health is given due priority in the making of food policies by non-health sectors. This publication discusses in depth the components of food and nutrition policies and the evidence of supporting them. It highlights the urgent need for integrated multisectoral food and nutrition policies to encourage the sustainable production of food, its safety and the provision of food of high nutritional quality for all.
