Poletti, Daniela Sicurelli, 2018-05-07 This book critically engages with a long tradition of scholarly work that conceives of the European Union as a peculiar international actor that pursues a value based normatively oriented and development friendly agenda in its relations with international partners The EU is a pivotal player in international trade relations holding formidable power in trade but also exercising substantial power through trade Trade policy therefore represents a strategic field for the EU to shape its image as a healthy economy and a global power In this field the EU has declared a twofold ambitious goal namely that of fostering economic growth in Europe while at the same time promoting development and growth abroad both in developed and developing countries In other words the EU aims to increase its competitiveness in world trade while acting as an ethical and normative power Here Poletti and Sicurelli explore the tension between these two roles **Europe, Canada and the Comprehensive Economic and Trade Agreement** Kurt Hübner, 2011-04-01 The Great

Hoekman, Will Martin, Carlos Alberto Primo

Braga, 2009-04-15 The multilateral trade system rests on the principle of nondiscrimination Unilateral trade preferences granted by developed countries can help beneficiary countries but can create tensions between preferred developing countries typically beneficiaries from pre existing colonial regimes and other developing countries There is also concern

about the potential erosion of these preferences through trade liberalization in the importing countries an issue that has been important in the current negotiations under the Doha Development Agenda of the World Trade Organization Trade Preference Erosion provides the information needed to make informed assessments of the benefits of trade preferences for developing countries the risks associated with the erosion of these benefits and policy options for dealing with these problems The authors provide detailed analyses of specific preference programs and undertake cross country disaggregated analyses of the impact of preferences at the product level Understanding the likely impacts of these programs and how those impacts are distributed is a precondition for formulating appropriate policy responses The authors argue that such responses need to go beyond trade policies and need to include a focus on enhancing the competitiveness and supply side capacity of developing countries This book is a useful and informative guide for policy makers non governmental organizations and others who wish to better understand the debate on the magnitude and impact of preference erosion *European Free Trade System and Policy Handbook* International Business Publications, USA.,2009-03-20 European Free Trade Association EFTA Handbook *International Trade, Distribution And Development: Empirical Studies Of Trade Policies* Paul Brenton,2014-08-18 International Trade Distribution and Development brings together a collection of papers that have sought to assess empirically the impacts of policy measures affecting trade The carefully selected papers analyze the impact of trade barriers and their removal with a focus on distributional consequences and economic development Grounded in rigorous empirical analysis this book covers a range of policy issues such as impacts of trade on wages non tariff barriers trade preferences export survival and carbon labelling An invaluable reference for readers seeking to understand the impact of trade policies the book also seeks to shed light on future research especially for research on developing countries
