European Productivity Agency And Transatlantic Relations 1953-1961

P. Lundin, T. Kaiserfeld

European Productivity Agency And Transatlantic Relations 1953-1961:

The European Productivity Agency and Transatlantic Relations, 1953-1961 Bent Boel, 2003 The European Productivity Agency EPA was initially designed as a means to Americanize Western Europe through the transfer of American techniques know how and ideas to the Old Continent It increasingly became a framework within which the member countries sought European solutions to their problems This study of the EPA sheds new light on the nature of European cooperation and transatlantic relations in the 1950s as well as on the changes these relations underwent during the early postwar period

The Hegemony of Growth Matthias Schmelzer, 2016-05-17 The first comprehensive historical overview of the OECD's role in the concept of economic growth becoming an international norm *The Making of European Consumption* P. Lundin, T. Kaiserfeld, 2015-01-26 American ideals and models feature prominently in the master narrative of post war European consumer societies This book demonstrates that Europeans did not appropriate a homogenous notion of America rather post war European consumption was a process of selective appropriation of American elements

International Cooperation in Cold War Europe Daniel Stinsky, 2021-04-08 Formed in 1947 the United Nations Economic Commission for Europe UNECE was the first postwar international organization dedicated to economic cooperation in Europe Linking the universalism of the UN to European regionalism both Cold War superpowers the USA and the Soviet Union were founding members of the UNECE Building on the League of Nations difficult heritage and in an increasingly challenging political environment the UNECE's mission was to facilitate European cooperation transcending the boundaries set by the Cold War With a number of competitor organizations set against it the UNECE managed to carve out a niche for itself setting norms and standards that still have an impact on the everyday lives of millions in Europe and beyond today Working against an overwhelming geopolitical trend UNECE succeeded in bridging the Cold War divide on several occasions and maintained a broad system of contacts across the Iron Curtain This book provides a unique study of this important but hitherto under researched international organization Incorporating research on the Cold War the history of internationalism and European integration Stinsky weaves these different threads of historical enquiry into a single analytical narrative

Transformations of Retailing in Europe after 1945 Lydia Langer, 2016-02-17 After World War II structures practices and the culture of retailing in most West European countries went through a period of rapid change The post war economic boom the emergence of a mass consumer society and the adaptation of innovations which already had been implemented in the USA during the interwar period revolutionized the world of getting and spending But the implementation of self service and the supermarket the spread of the department store and the mail order business were not only elements of a transatlantic catch up process of Americanization of retailing National patterns of the retail trade and specific cultures of consumption remained crucial and long term processes of change starting in the 1920s or 1930s also had an impact on the transformation of retailing in post war Europe This volume presents a series of case studies looking at transformations of

retailing in several European countries offering new insights into the structural preconditions of the emerging mass consumer societies and also into the consequences consumerism had on the practices of retailing Constant Disconnection Kenzie Burchell, 2024-08-20 The weight of constant digital connection is the default condition of working life home life and everyday personal life driving us to engage more with platforms than with people a new state of constant disconnection that we cannot escape Overflowing email inboxes deluges of mobile phone notifications and torrents of social media posts the flow of communication in its abundance is today's individualized interface for interpersonal and professional practices Communication technologies and their use are both the needle and the thread of the wider social tapestry of everyday contemporary life This ever changing communication environment is where the neoliberal economic policies of the West and the commercial imperatives of the platform and data mining industries meet It is where the contradictions they produce can be felt day to day by citizens turned users How does it feel to live at the pressure points of intersecting economic realities and why does it matter Drawing on extensive sociological research Burchell examines how individuals try to manage connection as participation in everyday life and how on a larger scale the ever expanding knowledge communication and data driven economies depend on the very pressures that result from our disparate communication needs With so much time spent managing the pressures of our communication environment we often overlook the way media technologies produce systemic tensions that are reshaping how we interact with each other and what we understand to be social connection today

Sixties Ireland Mary E. Daly, 2016-03-17 This provocative new history of Ireland during the long 1960s exposes the myths of Ireland's modernisation Mary E Daly questions traditional interpretations which see these years as a time of prosperity when Irish society led by a handful of key modernisers abandoned many of its traditional values in its search for economic growth Setting developments in Ireland in a wider European context Daly shows instead that claims for the economic transformation of Ireland are hugely questionable Ireland remained one of the poorest countries in western Europe until the end of the twentieth century Contentious debates in later years over contraception divorce and national identity demonstrated continuities with the past that long survived the 1960s Spanning the period from Ireland's economic rebirth in the 1950s to its entry into the EEC in 1973 this is a comprehensive reinterpretation of a critical period in Irish history with clear parallels for Ireland today **The OECD and the International Political Economy Since 1948** Matthieu

Leimgruber, Matthias Schmelzer, 2017-12-11 This book explores the history of the Organization for Economic Co operation and Development OECD and its place within capitalist development Since 1948 the OECD and its forerunner the Organization for European Economic Cooperation OEEC worked on almost every subject of interest to national governments ranging from economic growth to education PISA rankings statistics to the environment With varying success the OEEC OECD thus played a key role as a warden of the West and of capitalist development However it has remained one of the least understood international organizations Bringing together a number of case studies by scholars from around the world this

first source based volume on the history of the OEEC OECD in global governance offers not only a new understanding of the Organization's key areas of activities but also its multiple relations to member states other international organizations and private networks The volume thus critically re-examines postwar international history most importantly decolonization and the Cold War through the prism of one international organization in its various contexts

Organizing the 20th-Century World Karen Gram-Skjoldager, Haakon Andreas Ikonomou, Torsten Kahlert, 2020-11-12 International Organizations play a pivotal role on the modern global stage and have done this book argues since the beginning of the 20th century This volume offers the first historical exploration into the formative years of international public administrations covering the birth of the League of Nations and the emergence of the second generation that still shape international politics today such as the UN NATO and OECD Centring on Europe where the multilateralization of international relations played out more intensely in the mid 20th century than in other parts of the world it demonstrates a broad range of historiographical and methodological approaches to institutions in international history The book argues that after several turns cultural linguistic material transnational international history is now better equipped to restate its core questions of policy and power with a view to their institutional dimensions Making use of new approaches in the field this book develops an understanding of the specific powers and roles of IO administrations by delving into their institutional make up

The Project-State and Its Rivals Charles S. Maier, 2023-05-16 A new and original history of the forces that shaped the twentieth and twenty first centuries We thought we knew the story of the twentieth century For many in the West after the two world conflicts and the long cold war the verdict was clear democratic values had prevailed over dictatorship But if the twentieth century meant the triumph of liberalism as many intellectuals proclaimed why have the era's darker impulses ethnic nationalism racist violence and populist authoritarianism revived The Project State and Its Rivals offers a radical alternative interpretation that takes us from the transforming challenges of the world wars to our own time Instead of the traditional narrative of domestic politics and international relations Charles S Maier looks to the political and economic impulses that propelled societies through a century when territorial states and transnational forces both claimed power engaging sometimes as rivals and sometimes as allies Maier focuses on recurring institutional constellations project states including both democracies and dictatorships that sought not just to retain power but to transform their societies new forms of imperial domination global networks of finance and the international associations foundations and NGOs that tried to shape public life through allegedly apolitical appeals to science and ethics In this account which draws on the author's studies over half a century Maier invites a rethinking of the long twentieth century His history of state entanglements with capital the decline of public projects and the fragility of governance explains the fraying of our own civic culture but also allows hope for its recovery

Transnational Anti-Communism and the Cold War Stéphanie Roulin, Giles Scott-Smith, 2014-04-22 How was anti communism organised in the West This book covers the agents aims and arguments of various transnational anti communist activists during the

Cold War Existing narratives often place the United States and especially the CIA at the centre of anti communist activity The book instead opens up new fields of research transnationally

A World More Equal Sandrine Kott, 2024-02-06 The post World War II period is typically seen as a time of stark division an epochal global conflict between the United States and the Soviet Union But beneath the surface the postwar era witnessed a striking degree of international cooperation The United Nations and its agencies as well as regional organizations international nongovernmental organizations and private foundations brought together actors from conflicting worlds fostering international collaboration across the geopolitical and ideological divisions of the Cold War Diving into the archives of these organizations and associations Sandrine Kott provides a new account of the Cold War that foregrounds the rise of internationalism as both an ideology and a practice She examines cooperation across boundaries in international spaces emphasizing the role of mid-sized powers including Eastern European and neutral countries Kott highlights how the need to address global inequities became a central concern as officials and experts argued that economic inequality imperiled the creation of a lasting peace International organizations gave newly decolonized and Third World countries a platform to challenge the global distribution of power and wealth and they encouraged transnational cooperation in causes such as human rights and women's rights Assessing the failure to achieve a new international economic order in the 1970s Kott adds new perspective on the rise of neoliberalism A truly global study of the Cold War through the lens of international organizations *A World More Equal* also shows why the internationalism of this era offers resources for addressing social and global inequalities today

Planning in Cold War Europe Michel Christian, Sandrine Kott, Ondrej Matejka, 2018-10-08 The idea of planning economy and engineering social life has often been linked with Communist regimes will of control However the persuasion that social and economic processes could and should be regulated was by no means limited to them Intense debates on these issues developed already during the First World War in Europe and became globalized during the World Economic crisis During the Cold War such discussions fuelled competition between two models

of economic and social organisation but they also revealed the convergences and complementarities between them This ambiguity so often overlooked in histories of the Cold War represents the central issue of the book organized around three axes First it highlights how know how on planning circulated globally and were exchanged by looking at international platforms and organizations The volume then closely examines specificities of planning ideas and projects in the Communist and Capitalist World Finally it explores East West channels generated by exchanges around issues of planning which functioned irrespective of the Iron Curtain and were exported in developing countries The volume thus contributes to two fields undergoing a process of profound reassessment the history of modernisation and of the Cold War

Return to Normalcy Or a New Beginning Joachim Lund, Per Øhrgaard, 2008 At the end of the Second World War in 1945 the countries of Western Europe found themselves at crossroads How should they react to the challenges posed by the peace Germany's defeat and the newly won freedom This book presents accounts and interpretations of the immediate postwar situation in leading Western European countries and regions

The American Marshall Plan Film Campaign and the Europeans Maria Fritsche, 2018-02-08 The US government launched the European Recovery Programme otherwise known as the Marshall Plan in order to save war torn Europe from collapse in 1948 Yet while much is known about the economic side of the Marshall Plan the extensive film campaign that accompanied it has been largely overlooked until now The American Marshall Plan Film Campaign and the Europeans is the first book to explore the use of the Marshall Plan films and importantly their distribution and reception across Europe The study examines every available film the 170 that remain from the 200 estimated to have been made and looks at how they were designed to instil hope argue the case for economic restructuring and persuade the Europeans of the superiority of the liberal capitalist system The book goes on to reason that the films served as a powerful weapon in the cultural Cold War but that the European audiences were by no means passive victims of the US propaganda effort Maria Fritsche discusses the Marshall Plan films in the context of countries across Western Northern and Southern Europe covering the majority of the 17 European countries that participated in the Plan in the process The book incorporates 70 images and utilises a vast number of archival sources to explore the strategies the US adopted to sway the minds of the Europeans the problems they encountered in the process and not least the varied responses of the European audiences It is a vital study for any scholar or student keen to know more about postwar recovery in Europe the legacy of the Second World War or America's relationship with Europe in the 20th century

Solidarity with Solidarity Idesbald Goddeeris, 2012-07-10 The Polish crisis in the early 1980s provoked a great deal of reaction in the West Not only governments but social movements were also touched by the establishment of the Independent Trade Union Solidarnosc in the summer of 1980 the proclamation of martial law in December 1981 and Solidarnosc's underground activity in the subsequent years In many countries campaigns were set up in order to spread information raise funds and provide the Polish opposition with humanitarian relief and technical assistance Labor movements especially stepped into the limelight A number

of Western European unions were concerned about the new international tension following the Soviet invasion of Afghanistan and the new hard line policy of the US and saw Solidarnosc as a political instrument of clerical and neo conservative cold warriors This book analyzes reaction to Solidarnosc in nine Western European countries and within the international trade union confederations It argues that Western solidarity with Solidarnosc was highly determined by its instrumental value within the national context Trade unions openly sided with Solidarnosc when they had an interest in doing so namely when Solidarnosc could strengthen their own program or position But this book also reveals that reaction in allegedly reluctant countries was massive albeit discreet pragmatic and humanitarian rather than vocal emotional and political

The Shock of America David Ellwood, 2012-07-19 An ambitious original book describing a century of Europe coping with America its inventions personalities films armies business and politics These decades reveal how much emotional energy Europeans invested in finding their own ways to reconcile tradition and modernity under the pressure of the ever evolving American challenge
