*Freeform Optics for LED Packages and Applications* Kai Wang, Shen Liu, Xiaobing Luo, Dan Wu, 2017-08-24 A practical introduction to state of the art freeform optics design for LED packages and applications. By affording designers the freedom to create complex aspherical optical surfaces with minimal or no aberrations, freeform design transcends the constraints imposed by hundreds of years of optics design and fabrication. Combining unprecedented design freedom with precise light irradiation control, freeform optics design is also revolutionizing the design and manufacture of high quality LED lighting. The first and only book of its kind, *Freeform Optics for LED Packages and Applications* helps put readers at the forefront of the freeform optics revolution. Designed to function as both an authoritative review of the current state of the industry and a practical introduction to advanced optical design for LED lighting, this book makes learning and mastering freeform optics skills simpler and easier than ever before with real world examples and case studies systematically describing an array of algorithms and designs from new freeform algorithms to design methods to advanced optical designs. Coding for all freeform optics algorithms covered makes it easier and more convenient to start developing points of freeform optics and construct lenses or reflectors right away. Case studies of a range of products including designs for a freeform optics LED bulb, an LED spotlight, LED street lights, an LED BLU, and many more. *Freeform Optics for LED Packages and Applications* is must reading for optical design engineers and LED researchers as well as advanced level students with an interest in LED lighting. It is also an indispensable working resource design practitioners within the LED lighting industry.

LED Lighting T. Q. Khan, P. Bodrogi, Q. T. Vinh, H. Winkler, 2015-02-09 Promoting the design application and evaluation of visually and electrically effective LED light sources and luminaires for general indoor lighting as well as outdoor and vehicle lighting, this book combines the knowledge of LED lighting technology with human perceptual aspects for lighting scientists and engineers. After an introduction to the human visual system and current radiometry, photometry, and color science, the basics of LED chip and phosphor technology are described, followed by specific issues of LED radiometry and the optical, thermal, and electric modeling of LEDs. This is supplemented by the relevant practical issues of pulsed LEDs, remote phosphor LEDs, and the aging of LED light sources. Relevant human visual aspects closely related to LED technology are described in detail for the photopic and the mesopic range of vision, including color rendering, binning, whiteness, circadian issues, as well as flicker perception, brightness, visual performance, conspicuity, and disability glare. The topic of LED luminaires is discussed in a separate chapter, including retrofit LED lamps, LED based road and street luminaires, and LED luminaires for museum and school lighting. Specific sections are devoted to the modularity of LED luminaires, their aging, and the planning and evaluation methods of new LED installations. The whole is rounded off by a

summary and a look towards future developments      *Urban Lighting, Light Pollution and Society* Josiane Meier,Ute Hasenöhl,Katharina Krause,Merle Pottharst,2014-10-24 After decades in the shadows urban lighting is re emerging as a matter of public debate Long standing truths are increasingly questioned as a confluence of developments affects lighting itself and the way it is viewed Light has become an integral element of place making and energy saving initiatives alike Rapidly evolving lighting technologies are opening up new possibilities but also posing new challenges to planners and awareness is growing that artificial illumination is not purely benign but can actually constitute a form of pollution As a result public policy frameworks incentives and initiatives are undergoing a phase of innovation and change that will affect how cities are lit for years to come The first comprehensive compilation of current scientific discussions on urban lighting and light pollution from a social science and humanities perspective *Urban Lighting Light Pollution and Society* contributes to an evolving international debate on an increasingly controversial topic The contributions draw a rich panorama of the manifold discourses connected with artificial illumination in the past and present from early attempts to promote new lighting technologies in the late 19th and early 20th centuries to current debates on restricting its excessive usage in public space and the protection of darkness By bringing together a cross section of current findings and debates on urban lighting and light pollution from a wide variety of disciplines it reflects that artificial lighting is multifaceted in its qualities utilisation and interpretation Including case studies from the United States Europe and the UK *Urban Lighting Light Pollution and Society* is one of the first to take a serious assessment of light pollution and places and is a valuable resource for planners policy makers and students in related subjects      **Citizen Science** Susanne Hecker,Muki Haklay,Anne Bowser,Zen Makuch,Johannes Vogel,Aletta Bonn,2018-10-15 Citizen science the active participation of the public in scientific research projects is a rapidly expanding field in open science and open innovation It provides an integrated model of public knowledge production and engagement with science As a growing worldwide phenomenon it is invigorated by evolving new technologies that connect people easily and effectively with the scientific community Catalysed by citizens wishes to be actively involved in scientific processes as a result of recent societal trends it also offers contributions to the rise in tertiary education In addition citizen science provides a valuable tool for citizens to play a more active role in sustainable development This book identifies and explains the role of citizen science within innovation in science and society and as a vibrant and productive science policy interface The scope of this volume is global geared towards identifying solutions and lessons to be applied across science practice and policy The chapters consider the role of citizen science in the context of the wider agenda of open science and open innovation and discuss progress towards responsible research and innovation two of the most critical aspects of science today      **Intelligent Transportation Systems and Winter Operations in Japan** ,2003 The Federal Highway Administration American Association of State Highway and Transportation Officials and National Cooperative Highway Research Program sponsored a scanning study of Japan to investigate advanced technologies for winter

maintenance operations and implementation of those advances in Japan's intelligent transportation system ITS architecture. The U.S. delegation visited Hokkaido, Japan, to review advances in winter operations procedures, winter maintenance equipment development, and road weather data collection. The team also observed that significant advances are being made in Japan on improving communication systems and protocols used between road weather information system sensors and operations centers.

**Theory and Applications of Dependable Computer Systems** Wojciech Zamojski, Jacek Mazurkiewicz, Jarosław Sugier, Tomasz Walkowiak, Janusz Kacprzyk, 2020-05-21. This book presents selected papers from the Fifteenth International Conference on Dependability of Computer Systems DepCoS RELCOMEX, which illustrate the diversity of theoretical problems in analysis of performability, reliability, and security of contemporary computer systems. Covering also methodologies and practical tools involved in this field, it is a valuable reference resource for scientists, researchers, practitioners, and students who are dealing with these subjects. Established in 2006, DepCoS RELCOMEX is an annual conference series organized by Wrocław University of Science and Technology. It focuses on the dependability and performability of contemporary computer systems, topics that can provide solutions to new challenges in evaluation of their reliability and efficiency. Since they are probably the most complex technical systems ever engineered by humans, the organization of modern computer systems cannot be modelled and analysed solely as structures; however, complex and distributed, built only on the basis of technical resources. Instead, they should be considered as a unique blend of interacting people, their needs, and behaviours, networks, together with mobile properties, iCloud, organisation, Internet of Everything, and a large number of users dispersed geographically and producing an unimaginable number of applications. This new interdisciplinary approach is developing a continually increasing range of methods which apply also the latest findings in artificial intelligence (AI) and computational intelligence (CI).
