Evaluating Family Mental Health History Epidemiology And Treatment Issues:

Evaluating Family Mental Health John J. Schwab, Judith J. Stephenson, John F. Ice, 2013-11-11 At the time of this writing there is much uncertainty about the form of this country's future healthcare system and the role of psychiatry and other mental health disciplines in that system Current experience with various managed healthcare programs is not encouraging Most often patients with severe psychiatric disturbances receive at best some form of crisis intervention or brief treatment Marital and family approaches to treatment receive even less support This discouraging socioeconomic context makes the work of John Schwab and his colleagues even more important than it would be in more favorable times Their message is clear The family is crucial to an understanding of psychiatric disorders and must often be the major focus in the treatment of these disorders This book is unique in its direct reflection of the senior author's long term professional interests the family epidemiology and history A careful reading provides family therapists and researchers with wonderful opportunities to examine the ways in which history socioeconomic and political contexts and epidemiology can be used to increase understanding of the family This history of the family is unusually thorough in particular I found fascinating the information about early Egyptian families 3000 B C and their accordant high status of women **Family Functioning**

John J. Schwab, Helen Gray-Ice, Florence R. Prentice, 2006-04-18 The family that most fundamental of human groups is currently perceived to be changing in response to social biological cultural and technological developments in our postmodern society While the observed changes in families have been considered by some sociologists to be evidence of adaptation and therefore normal the authors of this volume consider them maladaptive Viewing society from the point of view of clinical psychiatry they point to greatly increased numbers of children born to single mothers soaring rates of divorce a statistically confirmed increase in mental disorders increase in reported incest high rates of depression in younger people and escalation of the amount of reported family violence as evidence that the family as a social institution is in crisis and can either move toward renewed vitality or continued deterioration Perceiving a need to obtain information about family functioning that might lead to the increased stability and well being of this critically important type of system Dr John Schwab and his associates designed and carried out a research program that began with a thorough review of relevant literature beginning with LePlay's study of 300 families in the 1850s and including important recent statistical studies They found that although these studies represent advances in understanding the family system some serious problems with the research remain one of which is confounding variables such as family function and mental or substance abuse disorders so that if a family member has a problem such as drug abuse the family is classified as dysfunctional **Adolescent Substance Abuse** Yifrah Kaminer, 2013-06-29 This volume provides a unique and advantageous perspective to the trainees and practitioners in the adolescent substance abuse field It offers a sophisticated perspective on addiction treatment techniques developed in recent years with a sensitivity to the social and developmental needs of the adolescent Marc Galanter from the

The American Psychiatric Association Publishing Textbook of Suicide Risk Assessment and Management Liza H. Gold, Richard L. Frierson, 2020-03-08 Charged with updating the preeminent text on suicide the new editors of *The American Psychiatric Association Publishing Textbook of Suicide Risk Assessment and Management* opted not to simply revise existing chapters but instead to steer a bold course expanding reconfiguring and remaking the third edition to reflect the latest research nomenclature and clinical innovations The editorial team and contributors two thirds of whom are new to this edition have taken the intersection of suicide with both mental health and psychosocial issues as their organizing principle exploring risk assessment and epidemiology in special populations such as elderly patients college students military personnel and the incarcerated as well as patients with a variety of psychological disorders including bipolar spectrum personality depressive anxiety posttraumatic stress and other disorders and schizophrenia In addition the book discusses treatment options such as cognitive behavioral therapy dialectical behavioral therapy and pharmacotherapy and settings such as emergency services outpatient inpatient and civil commitment in detail with clinical cases to contextualize the material The new and revised content is extensive A chapter on the influence of sleep and sleep disorders on suicide risk has been included that considers possible mechanisms for this link and discusses practical ways of assessing and managing sleep disorders to mitigate suicide risk Nonsuicidal self injury the prevalence of which is particularly high among youth is addressed in detail differentiating it from and comparing it to suicide attempts discussing risk assessment considering safety interventions examining treatment options and exploring suicide contagion No text on suicide would be complete without a serious exploration of the role of social media and the internet The book presents an update on current research as it pertains to social networking and behavior information access and artificial intelligence and software and includes suggestions for clinicians treating patients at risk for suicide Physician assisted dying PAD also referred to as aid in dying is arguably a form of suicide and the book includes a thoughtful chapter considering the ethical and practical implications of PAD the murky professional and legal obligations that may arise the demographics of these patients the settings and conditions under which PAD may occur and the role of the attendant clinicians A number of pedagogical features are included to help the reader learn and remember the material including key clinical concepts and abundant case examples Its diverse range of perspectives broad relevance to a wide variety of clinicians and absolutely authoritative coverage makes this new edition of *The American Psychiatric Association Publishing Textbook of Suicide Risk*

Assessment and Management a worthy and indispensable successor **Clinical Child Psychiatry** William M. Klykylo, Jerald Kay, 2006-01-04 Clinical Child Psychiatry Second Edition is the successor of the successful textbook edited by Drs Klykylo and Kay in 1998 This book comprises a textbook of current clinical practice in child and adolescent psychiatry It is midway in size between the small handbooks that provide mainly a list of disorders and treatments and the large often multi volume texts that are comprehensive but not easily accessible **Child and Adolescent Behavioral Health** Edilma L.

Yearwood, Geraldine S. Pearson, Jamesetta A. Newland, 2021-03-23 Research has shown that a range of adult psychiatric disorders and mental health problems originate at an early age yet the psychiatric symptoms of an increasing number of children and adolescents are going unrecognized and untreated there are simply not enough child psychiatric providers to meet this steadily rising demand It is vital that advanced practice registered nurses APRNs and primary care practitioners take active roles in assessing behavioral health presentations and work collaboratively with families and other healthcare professionals to ensure that all children and adolescents receive appropriate treatment Child and Adolescent Behavioral Health helps APRNs address the mental health needs of this vulnerable population providing practical guidance on assessment guidelines intervention and treatment strategies indications for consultation collaboration referral and more Now in its second edition this comprehensive and timely resource has been fully updated to include DSM 5 criteria and the latest guidance on assessing diagnosing and treating the most common behavioral health issues facing young people New and expanded chapters cover topics including eating disorders bullying and victimization LGBTQ identity issues and conducting research with high risk children and adolescents Edited and written by a team of accomplished child psychiatric and primary care practitioners this authoritative volume Provides state of the art knowledge about specific psychiatric and behavioral health issues in multiple care settings Reviews the clinical manifestation and etiology of behavioral disorders risk and management issues and implications for practice research and education Offers approaches for interviewing children and adolescents and strategies for integrating physical and psychiatric screening Discusses special topics such as legal and ethical issues cultural influences the needs of immigrant children and child and adolescent mental health policy Features a new companion website containing clinical case studies to apply concepts from the chapters Designed to specifically address the issues faced by APRNs Child and Adolescent Behavioral Health is essential reading for nurse practitioners and clinical nurse specialists particularly those working in family pediatric community health psychiatric and mental health settings Second Place in the Child Health Category 2021 American Journal of Nursing Book of the Year Awards **Child & Adolescent Mental Health: Theory & Practice** Margaret Thompson, Christine Hooper, Michael Cooper, Christine M.
