Evaluating Educational and Social Programs Blaine R. Worthen, Karl R. White, 2012-12-06 During the past two decades evaluation has come to play an increasingly important role in the operation of educational and social programs by national state and local agencies Mandates by federal funding agencies that programs they sponsored be evaluated gave impetus to use of evaluation Realization that evaluation plays a pivotal role in assuring program quality and effectiveness has maintained the use of evaluation even where mandates have been relaxed With increased use indeed institutionalization of evaluation in many community state and national agencies evaluation has matured as a profession and new evaluation approaches have been developed to aid in program planning implementation monitoring and improvement Much has been written about various philosophical and theoretical orientations to evaluation its relationship to program management appropriate roles evaluation might play new and sometimes esoteric evaluation methods and particular evaluation techniques Useful as these writings are relatively little has been written about simple but enormously important activities which comprise much of the day to day work of the program evaluator This book is focused on some of these more practical aspects that largely determine the extent to which evaluation will prove helpful

Evaluative Research on Social Programs for the Elderly, 1977 Program Evaluation for Social Workers Richard M. Grinnell, Peter Gabor (Sociologist), Yvonne A.

Unrau, 2016 First published in 1994 this text is designed to be used by graduate level social work students in courses on evaluation and program design Over the course of 20 years and 6 editions the goals of the book have remained the same to prepare students to participate in evaluative activities within their organizations to prepare students to become critical producers and consumers of professional evaluative literature and to prepare students for more advanced evaluation courses and texts Grinnell Gabor and Unrau aim to meet these objectives by presenting a unique approach that is realistic practical applied and user friendly While a majority of textbooks focus on program level evaluation some recent books present case level evaluation methods but rely on inferentially powerful but difficult to implement experimental baseline designs This text assumes that neither of these approaches adequately reflects the realities of the field or the needs of students and beginning practitioners Instead Program Evaluation for Social Workers offers a blend of the two that demonstrates how they can complement one another The integration of case level and program level approaches provides an accessible adaptable and realistic framework for students to more easily grasp and implement in the real world
