Events And Plurality The Jerusalem Lectures:

Events and Plurality Fred Landman, 2012-12-06 JERUSALEM LECTURES In 1992 I was a Lady Davis Fellow in the English Department at the Hebrew University of Jerusalem In the context of this Edit Doron asked me to present a series of weekly evening lectures The idea was that I would be talking about my own current research on plurality in an event based theory without the restraints that a nonnal seminar fonnat would im pose i e the idea was that I would actually get to the part where I would talk about my own work At the same time Edit added it would be nice if rather than just presupposing or presenting a neo Davidsonian framework to develop my analysis of plurality I could provide a more general setting of the problems by discussing in some depth the architecture of event arguments and thematic roles In particular Terry Parsons book Par sons 1990 had appeared relatively recently and there was real interest among the audience in discussing Parsons arguments for events and roles

Events and Grammar Susan Rothstein, 2013-12-01 In recent years the study of events and their role as implicit arguments of predicates has been at the center of much important work in semantics and the syntax semantics interface This volume brings together fourteen original studies by leading scholars in semantics and the syntax semantics interface covering a broad spectrum of research into the role of events in grammar The papers extensively address the following topics among others event arguments and thematic argument structure the role of events in verbal aspectual distinctions events and the distinction between stage and individual level predicates the role of events in the analysis of plurality and scope relations the mass count distinction and propositional attitudes

Structuring Events Susan Rothstein, 2008-04-15 Structuring Events presents a novel semantic theory of lexical aspect for anyone interested in the study of verb meanings Provides an introduction to aspectual classes and aspectual distinctions Utilizes case studies to present a novel semantic theory of lexical aspect and compare it with alternative theories Useful for students and scholars in semantics and syntax as well as the neighboring fields of pragmatics and philosophy of language

Verbal Plurality and Distributivity Patricia Cabredo Hofherr, Brenda Laca, 2012-10-01 This volume brings together novel analyses of verbal plurality and distributivity The contributions draw on a wide range of new empirical data from languages as diverse as Arabic Cusco Quechua European Portuguese Hausa Karitiana Modern Hebrew and Russian The introductory chapter gives an overview of the central issues that underlie much recent research on the semantics of event plurality The papers on verbal plurality explore the interaction between verbal plurality and plural arguments in Arabic and European Portuguese the semantics of additive particles in Modern Hebrew the semantics of a range of pluractional markers in Cusco Quechua and the morphological variability of pluractional markers cross linguistically The papers on distributivity examine the syntax and semantics of reduplicated numerals in Karitiana and adnominal distributive markers This volume will be of interest to researchers and students in syntax formal semantics and language typology

Modifying Adjuncts Ewald Lang, Claudia Maienborn, Cathrine Fabricius-Hansen, 2013-02-06 Unlike the notion of argument that is central to modern linguistic

theorizing the phenomena that are commonly subsumed under the complementary notion adjunct so far have not attracted the attention they deserve In this volume leading experts in the field present current approaches to the grammar and pragmatics of adjuncts The contributions scrutinize i a the argument adjunct distinction specify conditions of adjunct placement discuss compositionality issues and propose new analyses of event related modification They are meant to shed new light on an area of linguistic structure that is deemed to be notoriously overlooked

Chinese Lexical Semantics

Jia-Fei Hong, Qi Su, Jiun-Shiung Wu, 2018-11-25 This book constitutes the thoroughly refereed post workshop proceedings of the 19th Chinese Lexical Semantics Workshop CLSW 2018 held in Chiayi Taiwan in May 2018 The 50 full papers and 19 short papers included in this volume were carefully reviewed and selected from 150 submissions They are organized in the following topical sections Lexical Semantics Applications of Natural Language Processing Lexical Resources Corpus

Negative Actions

Jonathan D. Payton, 2021-02-25 Negative actions intentional omissions refrainments etc seem to be genuine actions The standard metaphysical theories of action are event based they treat actions as events of a special kind But it seems that many and perhaps all negative actions are not events but absences thereof In this book I provide a comprehensive treatment of this problem and its solution I trace the appearance that negative actions are mere absences to the widely assumed view that negative action sentences sentences which describe an agent as omitting refraining etc are negative existentials reporting the non occurrence of an event of a certain kind I argue on the contrary that such sentences report the occurrence of an event not the absence of one Moreover I show how these events can be identified with ordinary positive events of the sort we should already have in our ontology In developing these views I provide a comprehensive picture of the metaphysics of negative actions the nature of our thought and talk about them and their place in a theory of action and agency

Semantics - Lexical Structures and Adjectives Claudia Maienborn, Klaus von Heusinger, Paul Portner, 2019-02-19 Discover vital research on the lexical and cognitive meanings of words In this exciting book from a team of world class researchers in depth articles explain a wide range of topics including thematic roles sense relation ambiguity and comparison The authors focus on the cognitive and conceptual structure of words and their meaning extensions such as coercion metaphors and metonymies The book features highly cited material available in paperback for the first time since its publication and is an essential starting point for anyone interested in lexical semantics especially where it meets other cognitive and conceptual research

Parts of a Whole

Lucas Champollion, 2017 This book uses mathematical models of language to explain why there are certain gaps in language things that we might expect to be able to say but can't Lucas Champollion offers a theory that unifies the concepts of aspect plural and mass reference measurement and distributivity to account for these gaps

Plural Logic Alex Oliver, Timothy John Smiley, 2016 Alex Oliver and Timothy Smiley provide a new account of plural logic

They argue that there is such a thing as genuinely plural denotation in logic and expound a framework of ideas that includes the distinction between distributive and collective predicates the theory of plural descriptions multivalued functions and lists

Subatomic quantification Marcin Wągiel, 2021 The goal of this book is to explore the relationship between the cognitive notion of parthood and various grammatical devices expressing this concept in natural language The monograph aims to investigate syntactic constructions and lexical categories e g partitives whole adjectives and multipliers encoding different kinds of part whole structures both in Slavic and non Slavic languages It is envisioned to inspire radical rethinking of the ontology of models accounting for nominal semantics Specifically it provides novel evidence for a mereotopological approach to meaning i e a theory of wholes that captures not only parthood but also topological relations holding between parts This evidence comes from the phenomenon of subatomic quantification i e quantification over parts of referents of concrete count nouns

Pseudo-Noun Incorporation and Differential Object Marking Imke Driemel, 2023-03-07 This book provides a detailed cross linguistic study of pseudo noun incorporation a phenomenon whereby an argument forms a closer than usual relation with the verb Imke Driemel draws on data from Tamil Mongolian Korean Turkish and German and applies diagnostic tests across eleven noun types in each of the languages under consideration What emerges is a coherent effect of pseudo incorporated arguments that maps loss of case marking to obligatory narrow scope lack of binding and control relations and a potentially restricted movement pattern The book provides a unifying theory that is able to capture all properties with a single assumption pseudo incorporation effects result from noun phrases that are made up of a nominal and a verbal category feature implemented in a derivational framework the nominal feature is active early in the derivation being responsible for c selection and nominal modification while the verbal feature is active late and crucially derives the effects we have come to recognize as pseudo noun incorporation One important empirical contribution of this study stems from the observation that pseudo incorporation does not have to be the only reason for optional case marking Tamil and Korean provide evidence that only a subset of optionally case marked noun types also show a correlation with scope binding control and movement constraints This insight enforces the conclusion that the same language can make use of both pseudo noun incorporation and differential object marking

At the Intersection of Language, Logic, and Information Jennifer Sikos, Eric Pacuit, 2019-08-02 The European Summer School in Logic Language and Information ESSLLI is organized every year by the Association for Logic Language and Information FoLLI in different sites around Europe The papers cover vastly different topics but each fall in the intersection of the three primary topics of ESSLLI Logic Language and Computation The 14 papers presented in this volume have been selected among 24 papers presented by talks or posters at the Student Sessions of the 30th edition of ESSLLI held in 2018 in Sofia Bulgaria The Student Session is a forum for PhD and Master students to present their research at the interfaces of logic language and computation It features three tracks Logic and Computation LoCo Logic and Language LoLa and Language and Computation LaCo div

Syntactic Effects of Conjunctivist Semantics

Tim Hunter, 2011 This book explores the syntactic and semantic properties of movement and adjunction in natural language. A precise formulation of minimalist syntax is proposed guided by an independently motivated hypothesis about the composition of neo Davidsonian logical forms in which there is no atomic movement operation and no atomic adjunction operation. The terms movement and adjunction serve only as convenient labels for certain combinations of other primitive operations and as a result the system derives non trivial predictions about how movement and adjunction should interact in particular it yields natural explanatory accounts of the constituency of adjunction structures the possibility of counter cyclic attachment and the prohibitions on extraction from adjoined domains adjunct islands and from moved domains freezing effects. This work serves as a case study in deriving explanations for syntactic patterns from a restrictive theory of semantic composition and in using an explicit grammatical framework to inform rigorous minimalist theorising. Reciprocity in English Florian Haas, 2009-12-16 This book provides the first comprehensive account of how the expression of reciprocity in English has developed and how it is organized in today's language. Combining insights from different strands of research with original corpus based work this study will be of interest to theoretically and descriptively oriented linguists alike.

Handbook of Philosophical Logic Dov M. Gabbay, Franz Guenther, 2011-02-01 Belief Revision Refutation and systems in Propositional Logic A Quantifier Scope in Formal Linguistics and Non deterministic Semantics for Logical Systems. *Weak Referentiality* Ana Aguilar-Guevara, Bert Le Bruyn, Joost Zwarts, 2014-12-15 This volume brings together studies in the domain of weak referentiality the phenomenon that a definite or indefinite noun phrase lacks its usual referential force. Several papers investigate syntactic or semantic properties of indefinite noun phrases such as modality number neutrality narrow scope incorporation predication and case marking and that in a range of languages Arabic Brazilian Portuguese Catalan German Papiamentu Russian. Other papers deal with weakly referential definite noun phrases in various languages Basque Dutch English French involving scrambling modification possession and accessibility. The papers demonstrate a range of empirical methods and theoretical models. This volume will not only be of interest to researchers and students in syntax and semantics but also in psycholinguistics and language typology. **Modification** Marcin Morzycki, 2015-11-12 Modifiers and modification have been a major focus of inquiry for as long as the formal study of semantics has existed and remain at the heart of major theoretical debates in the field. Modification offers comprehensive coverage of a wide range of topics including vagueness and gradability comparatives and degree constructions the lexical semantics of adjectives and adverbs crosscategorical regularities and the relation between meaning and syntactic category. Morzycki guides the reader through the varied and sometimes mysterious phenomena surrounding modification and the ideas that have been proposed to account for them. Presenting disparate approaches in a consistent analytical framework this accessibly written work which includes an extensive glossary of technical terms is essential reading for researchers and students of all levels in linguistics the philosophy of language and psycholinguistics. Adjectives and Adverbs Louise McNally, Christopher Kennedy, 2008-03-27 In

this volume leading researchers present new work on the semantics and pragmatics of adjectives and adverbs and their interfaces with syntax Its concerns include the semantics of gradability the relationship between adjectival scales and verbal aspect the relationship between meaning and the positions of adjectives and adverbs in nominal and verbal projections and the fine grained semantics of different subclasses of adverbs and adverbs Its goals are to provide a comprehensive vision of the linguistically significant structural and interpretive properties of adjectives and adverbs to highlight the similarities between these two categories and to signal the importance of a careful and detailed integration of lexical and compositional semantics The editors open the book with an overview of current research before introducing and contextualizing the remaining chapters The work is aimed at scholars and advanced students of syntax semantics formal pragmatics and discourse It will also appeal to researchers in philosophy psycholinguistics and language acquisition interested in the syntax and semantics of adjectives and adverbs
