Everest Kangshung Face:

Everest Stephen Venables, 1989 *The American alpine journal*. 32.1990 [Anonymus AC00174691], 1990 **Everest** Stephen Venables, 1996 Every day the path up the South Col route to the summit of Everest becomes a little more worn by the tread of dozens of package tour climbers but few dare to try the East or Kangshung Face a sheer avalanche swept wall of snow and ice only first conquered in 1983 Five years later Stephen Venables intensified the challenge by leading three unknown American climbers up the East Face this time without oxygen The question to most climbing experts wasn't whether they would summit but whether they would live They nearly didn't *Everest Alone at the Summit* is Venables rousing account of one of the greatest feats of twentieth century mountaineering a triumph over doubt the elements and the limits of human endurance that has never been repeated Climbers or not all will be interested in this mountaineering thriller of a tiny band pulling off an incredible victory an account so stirring it will be put down only to obtain a moment's breather *American Alpine Journal* *Fallen Giants* Maurice Isserman, Stewart Angus Weaver, Dee Molenaar, 2010-01-01 In the first comprehensive history of Himalayan mountaineering in 50 years the authors offer detailed original accounts of the most significant climbs since the 1890s and they compellingly evoke the social and cultural worlds that gave rise to those expeditions *Himalaya* Philip Parker, 2012-11-30 At some 1500 miles long and 250 miles at its widest the Himalaya range is home to the fourteen greatest mountain peaks on the planet each of which towers over 8 000 metres Celebrated by the region's early ancient kingdoms many of these peaks remain sacred in both the Hindu and Buddhist religions and have additionally inspired western explorers and adventurers for some 300 years *Himalaya* examines the geographical origins of the region its earliest peoples and the onward western discovery and exploration commencing with the Jesuits progressing through myriad nineteenth century gentlemen surveyors culminating in Edmund Hillary and Tensing Norgay's ascent of Everest in 1953 and continuing to the present day with extreme mountaineers and adventure tourists However the book does not solely deal with the attempts to summit the majestic Everest Its broader brief and chronological structure allows the inclusion of narrative and journal extracts from the equally heroic pioneering ascents of Himalayan peaks including K2 1954 Nanga Parbat 1953 Annapurna 1950 Kangchenjunga 1955 and Lhotse 1956 as well as subsequent new frontiers peaks routes and mountaineering techniques The volume includes specially commissioned pieces where legendary climbers reflect on their intrepid experiences and heroism on the highest mountains on earth These accounts are set beside stunning commissioned cartography historical photographs newly shot stills of ephemera and artifacts as well as the most recent Himalayan work from some of the world's leading adventure photographers **Colliding Continents** Mike Searle, 2013-03-28 The crash of the Indian plate into Asia is the biggest known collision in geological history and it continues today The result is the Himalaya and Karakoram one of the largest mountain ranges on Earth The Karakoram has half of the world's highest mountains and a reputation as being one of the most remote and savage ranges of all In this beautifully

illustrated book Mike Searle a geologist at the University of Oxford and one of the most experienced field geologists of our time presents a rich account of the geological forces that were involved in creating these mountain ranges Using his personal accounts of extreme mountaineering and research in the region he pieces together the geological processes that formed such impressive peaks **A Day to Die For** Graham Ratcliffe,2011-02-03 On the night of 10 11 May 1996 eight climbers

perished in what remains the worst disaster in Everest s history Following the tragedy numerous accounts were published with Jon Krakauer s Into Thin Air becoming an international bestseller But has the whole story been told A Day to Die For reveals the full startling facts that led to the tragedy Graham Ratcliffe the first British climber to reach the summit of Mount Everest twice was a first hand witness having spent the night on Everest s South Col at 26 000 ft sheltering from the deadly storm For years he has shouldered a burden of guilt feeling that he and his teammates could have saved lives that fateful night His quest for answers has led to discoveries so important to an understanding of the disaster that he now questions why these facts were not made public sooner History is dotted with high profile disasters that both horrify and capture the attention of the public but very rarely is our view of them revised to such devastating effect **The Alpine Journal** ,1923

Fire and Stone Priscilla Long,2016 The questions that drive Priscilla Long s Fire and Stone are the questions asked by the painter Paul Gauguin in the title of his 1897 painting Where Do We Come From What Are We Where Are We Going These questions look beyond everyday trivialities to ponder the essence of our origins Using her own story as a touchstone Long explores our human roots and how they shape who we are today Her personal history encompasses childhood as an identical twin on a dairy farm on the Eastern Shore of Maryland the turmoil social change and music of the 1960s the suicide of a sister and a life in art in the Pacific Northwest Here memoir extends the threads of the writer s individual and very personal life to science to history and to ancestors both literary and genetic back to the Neanderthals Long uses profoundly poetic personal essays to draw larger connections and to ask compelling questions about identity Framed by four distinctive sections Fire and Stone transcends genre and evolves into a sweeping elegy on what it means to be human
