**Irascible Genius** Maboth Moseley, B.V. Bowden, 1964-01-01      *Irascible Genius* Maboth Moseley, 1970      **Irascible Genius. A Life of Charles Babbage, Inventor, Etc. [With Plates, Including Portraits.]** Maboth MOSELEY, Charles Babbage, 1964      Charles Babbage Bruce Collier, James MacLachlan, 2000-09-28 Traces the life and work of the man whose nineteenth century inventions led to the development of the computer      *Complexities* Bettye Anne Case, Anne M. Leggett, 2016-05-31 Sophie Germain taught herself mathematics by candlelight huddled in her bedclothes Ada Byron Lovelace anticipated aspects of general purpose digital computing by more than a century Cora Ratto de Sadosky advanced messages of tolerance and equality while sharing her mathematical talents with generations of students This captivating book gives voice to women mathematicians from the late eighteenth century through to the present day It documents the complex nature of the conditions women around the world have faced and continue to face while pursuing their careers in mathematics The stories of the three women above and those of many more appear here each one enlightening and inspiring The earlier parts of the book provide historical context and perspective beginning with excursions into the lives of fifteen women born before 1920 Included are histories of collective efforts to improve women's opportunities in research mathematics In addition a photo essay puts a human face on the subject as it illustrates women's contributions in professional associations More than eighty women from academe government and the private sector provide a rich m lrange of insights and strategies for creating workable career paths while maintaining rewarding personal lives The book discusses related social and cultural issues and includes a summary of recent comparative data relating to women and men in mathematics and women from other sciences First person accounts provide explicit how tos many narratives demonstrate great determination and perseverance Talented women vividly portray their pleasure in discovering new mathematics The senior among them speak out candidly interweaving their mathematics with autobiographical detail At the beginning of a new century women at all stages of their careers share their outlooks and experiences Clear engaging and meticulously researched *Complexities* will inspire young women who are contemplating careers in mathematics and will speak to women in many fields of endeavor and walks of life      *Milestones in Analog and Digital Computing* Herbert Bruderer, 2021-01-04 This Third Edition is the first English language edition of the award winning Meilensteine der Rechentechnik illustrated in full color throughout in two volumes The Third Edition is devoted to both analog and digital computing devices as well as the world's most magnificent historical automatons and select scientific instruments employed in astronomy surveying time measurement etc It also features detailed instructions for analog and digital mechanical calculating machines and instruments and is the only such historical book with comprehensive technical glossaries of terms not found in print or in online dictionaries The book also includes a very extensive bibliography based on the literature of numerous countries around the world Meticulously researched the author conducted a worldwide survey of science technology and art museums

with their main holdings of analog and digital calculating and computing machines and devices historical automatons and selected scientific instruments in order to describe a broad range of masterful technical achievements Also covering the history of mathematics and computer science this work documents the cultural heritage of technology as well     **Ada's Legacy** Robin Hammerman, Andrew L. Russell, 2015-10-01 Ada's Legacy illustrates the depth and diversity of writers thinkers and makers who have been inspired by Ada Lovelace the English mathematician and writer The volume which commemorates the bicentennial of Ada's birth in December 1815 celebrates Lovelace's many achievements as well as the impact of her life and work which reverberated widely since the late nineteenth century In the 21st century we have seen a resurgence in Lovelace scholarship thanks to the growth of interdisciplinary thinking and the expanding influence of women in science technology engineering and mathematics Ada's Legacy is a unique contribution to this scholarship thanks to its combination of papers on Ada's collaboration with Charles Babbage Ada's position in the Victorian and Steampunk literary genres Ada's representation in and inspiration of contemporary art and comics and Ada's continued relevance in discussions around gender and technology in the digital age With the 200th anniversary of Ada Lovelace's birth on December 10 2015 we believe that the timing is perfect to publish this collection of papers Because of its broad focus on subjects that reach far beyond the life and work of Ada herself Ada's Legacy will appeal to readers who are curious about Ada's enduring importance in computing and the wider world     William Stanley Jevons and the Making of Modern Economics Harro Maas, 2005-04-04 This book examines William Stanley Jevons's role in revolutionizing nineteenth century economics

Victorians and Numbers Lawrence Goldman, 2022 A defining feature of Victorian Britain was its fascination with statistics and this study shows how data influenced every aspect of Victorian culture and thought from the methods of natural science and the struggle against disease to the development of social administration and the arguments and conflicts between social classes     *Jacquard's Web* James Essinger, 2007-03-29 Traces the 200 year evolution of the principles of Jacquard's knitting machines to the information revolution of the twentieth century and the desk top computer of today From cover p 4

**Much Ado about Almost Nothing** Hans Camenzind, 2007 A history of electricity and electronics and how the electron at first bothered mankind then gradually became useful and now dominates our lives     Public Science and Public Policy in Victorian England Roy M. MacLeod, 2024-10-28 This book comprises nine essays selected from Roy MacLeod's work on the social history of Victorian science and is concerned with the analysis of science as a responsibility and opportunity for 19th century statecraft It illuminates the origins of environmental regulation the creation of scientific inspectorates the reform of scientific institutions and the association of government with the patronage and support of fundamental research Above all it explores several of the ways in which British scientists became statesmen in disguise negotiating interests and professional goals by association with the interests of the state as provider and agent of efficiency in education and in the application of research     *Brunel* R. Angus Buchanan, 2006-06-19     *Hypatia's Heritage* Margaret Alic, 1986-11-15 A history of women in

science from antiquity through the nineteenth century      **Making Sense** Bill Cope, Mary Kalantzis, 2020-01-30 Explains the multimodal connections of text image space body sound and speech in both old and new computer mediated communication systems      *Metropolis and Province* Ian Inkster, Jack Morrell, 2012-11-12 This collection of case studies focusing on British scientific culture during the first industrial revolution explores the social basis of science in the period and asks why such an extraordinarily rich variety of cultural scientific experience should have flourished at the time The book analyses science and scientific culture in their local contexts both metropolitan and provincial examining where possible the relations between the two and emphasizing the range of scientific associations in London to individual savants in the provinces This book was first published in 1983      **The Most Complex Machine** David J. Eck, 2018-10-08 This introduction to computers presents the fundamental ideas and principles on which modern computers are built While used as a text for courses in computer appreciation as well as introductions to computer science the book has found a wide audience among computer users who wish to understand the basis of the machines that form and transform our society What Computers Do Teaching Silicon to Compute Building a Computer Theoretical Computers Real Computers Programming Subroutines and Recursion Real Programming Languages Applications Cooperating Computers Graphics Artificial Intelligence Answers The text is supplemented by a web site that gives access to other problems and projects      **A History of Mass Communication** Irving Fang, 1997-02-27 This exciting new text traces the common themes in the long and complex history of mass communication It shows how the means of communicating grew out of their eras how they developed how they influenced the societies of those eras and how they have continued to exert their influence upon subsequent generations The book is divided into six periods which are identified as Information Revolutions writing printing mass media entertainment the toolshed which we call home now and the Information Highway In looking at the ways in which the tools of communication have influenced and been influenced by social change A History of Mass Communication provides students of media and journalism with a strong sense of the way their chosen field affects how society functions Providing a broad based approach to media history Dr Fang encourages the reader to take a careful look at where our culture is headed through the tools we use to communicate with one another A History of Mass Communication is not only the most current text on communication history but also an invaluable resource for anyone interested in how methods of communication affect society      **The Philosophical Breakfast Club** Laura J. Snyder, 2012-01-17 A fascinating book about the way four geniuses at Cambridge University revolutionized modern science Newsweek The Philosophical Breakfast Club recounts the life and work of four men who met as students at Cambridge University Charles Babbage John Herschel William Whewell and Richard Jones Recognizing that they shared a love of science as well as good food and drink they began to meet on Sunday mornings to talk about the state of science in Britain and the world at large Inspired by the great 17th century scientific reformer and political figure Francis Bacon another former student of Cambridge the Philosophical Breakfast Club plotted to bring about a new scientific

revolution And to a remarkable extent they succeeded even in ways they never intended Historian of science and philosopher Laura J Snyder exposes the political passions religious impulses friendships rivalries and love of knowledge and power that drove these extraordinary men Whewell who not only invented the word scientist but also founded the fields of crystallography mathematical economics and the science of tides Babbage a mathematical genius who invented the modern computer Herschel who mapped the skies of the Southern Hemisphere and contributed to the invention of photography and Jones a curate who shaped the science of economics were at the vanguard of the modernization of science This absorbing narrative of people science and ideas chronicles the intellectual revolution inaugurated by these men one that continues to mold our understanding of the world around us and of our place within it Drawing upon the voluminous correspondence between the four men over the fifty years of their work Laura J Snyder shows how friendship worked to spur the men on to greater accomplishments and how it enabled them to transform science and help create the modern world The lives and works of these men come across as fit for Masterpiece Theatre Wall Street Journal Snyder succeeds famously in evoking the excitement variety and wide open sense of possibility of the scientific life in 19th century Britain splendidly evoked in this engaging book American Scientist This fine book is as wide ranging and anecdotal as excited and exciting as those long ago Sunday morning conversations at Cambridge The Philosophical Breakfast Club forms a natural successor to Jenny Uglow s The Lunar Men and Richard Holmes s The Age of Wonder Washington Post

**Metals and the Royal Society** D. R. F. West, 2024-11-01 In this book two distinguished metallurgists have traced the role of metallurgical technology in the creation of the scientific revolution and the formation of the Royal Society
