Irresistible Empire:

Irresistible Empire Victoria De Grazia, 2009-07 The most significant conquest of the twentieth century may well have been the triumph of American consumer society over Europe's bourgeois civilization It is this little understood but world shaking campaign that unfolds in de Grazia's account of how the American standard of living defeated the European way of life and achieved the global cultural hegemony that is both its great strength and its key weakness today Tracing the peculiar alliance that arrayed New World salesmanship statecraft and standardized goods against the Old World's values of status craft and good taste de Grazia describes how all alternative strategies fell before America's consumer oriented capitalism first the bourgeois lifestyle then the Third Reich's command consumption and finally the grand experiment of Soviet style socialist planning From publisher description

Creating the Nazi Marketplace S. Jonathan Wiesen, 2010-11-22 When the Nazis came to power in 1933 they promised to build a vibrant consumer society But they faced a dilemma They recognized that consolidating support for the regime required providing Germans with the products they desired At the same time the Nazis worried about the degrading cultural effects of mass consumption and its association with Jewish interests This book examines how both the state and private companies sought to overcome this predicament Drawing on a wide range of sources advertisements exhibition programs films consumer research and marketing publications the book traces the ways National Socialists attempted to create their own distinctive world of buying and selling At the same time it shows how corporate leaders and everyday Germans navigated what S Jonathan Wiesen calls the Nazi marketplace A groundbreaking work that combines cultural intellectual and business history *Creating the Nazi Marketplace* offers an innovative interpretation of commerce and ideology in the Third Reich

Italy in the International System from Détente to the End of the Cold War Antonio Varsori, Benedetto Zaccaria, 2017-11-10 This edited collection offers a new approach to the study of Italy's foreign policy from the 1960s to the end of the Cold War highlighting its complex and sometimes ambiguous goals due to the intricacies of its internal system and delicate position in the fault line of the East West and North South divides According to received opinion during the Cold War era Italy was more an object rather than a factor in active foreign policy limiting itself to paying lip service to the Western alliance and the European integration process without any pretension to exerting a substantial international influence Eleven contributions by leading Italian historians reappraise Italy's international role addressing three complex and intertwined issues namely the country's political diplomatic dimension the economic factors affecting Rome's international stance and Italy's role in new approaches to the international system and the influence of political parties cultures in the nation's foreign policy

Italian graphic design Chiara Barbieri, 2024-07-02 Italian graphic design offers a new perspective on the subject by exploring the emergence and articulation of graphic design practice from the interwar period through to the appearance of an international graphic design discourse in the 1960s The book asks how graphic designers learned their trade and investigates the ways in which they organised and made their

practice visible while negotiating their collective identity with neighbouring practices such as typography advertising and industrial design Attention is drawn to everyday design practice educational issues mediating channels networks design exchange organisational strategies and discourses on modernism Drawing on a wide range of primary sources and placing an emphasis on visual analysis this book provides a model for a contextualised graphic design history as an integral part of the history of design and visual culture *The American Marshall Plan Film Campaign and the Europeans* Maria

Fritsche, 2018-02-08 The US government launched the European Recovery Programme otherwise known as the Marshall Plan in order to save war torn Europe from collapse in 1948 Yet while much is known about the economic side of the Marshall Plan the extensive film campaign that accompanied it has been largely overlooked until now *The American Marshall Plan Film Campaign and the Europeans* is the first book to explore the use of the Marshall Plan films and importantly their distribution and reception across Europe The study examines every available film the 170 that remain from the 200 estimated to have been made and looks at how they were designed to instil hope argue the case for economic restructuring and persuade the Europeans of the superiority of the liberal capitalist system The book goes on to reason that the films served as a powerful weapon in the cultural Cold War but that the European audiences were by no means passive victims of the US propaganda effort Maria Fritsche discusses the Marshall Plan films in the context of countries across Western Northern and Southern Europe covering the majority of the 17 European countries that participated in the Plan in the process The book incorporates 70 images and utilises a vast number of archival sources to explore the strategies the US adopted to sway the minds of the Europeans the problems they encountered in the process and not least the varied responses of the European audiences It is a vital study for any scholar or student keen to know more about postwar recovery in Europe the legacy of the Second World War or America's relationship with Europe in the 20th century **Consuming Behaviours** Erika

Rappaport, Sandra Trudgen Dawson, Mark J. Crowley, 2020-05-26 In twentieth century Britain consumerism increasingly defined and redefined individual and social identities New types of consumers emerged the idealized working class consumer the African consumer and the teenager challenged the prominent position of the middle and upper class female shopper Linking politics and pleasure *Consuming Behaviours* explores how individual consumers and groups reacted to changes in marketing government control popular leisure and the availability of consumer goods From football to male fashion tea to savings banks leading scholars consider a wide range of products ideas and services and how these were marketed to the British public through periods of imperial decline economic instability war austerity and prosperity The development of mass consumer society in Britain is examined in relation to the growing cultural hegemony and economic power of the United States offering comparisons between British consumption patterns and those of other nations Bridging the divide between historical and cultural studies approaches *Consuming Behaviours* discusses what makes British consumer culture distinctive while acknowledging how these consumer identities are inextricably a product of both Britain's domestic history and its

relationship with its Empire with Europe and with the United States

Transformations of Retailing in Europe after

1945 Lydia Langer, 2016-02-17 After World War II structures practices and the culture of retailing in most West European countries went through a period of rapid change The post war economic boom the emergence of a mass consumer society and the adaptation of innovations which already had been implemented in the USA during the interwar period revolutionized the world of getting and spending But the implementation of self service and the supermarket the spread of the department store and the mail order business were not only elements of a transatlantic catch up process of Americanization of retailing National patterns of the retail trade and specific cultures of consumption remained crucial and long term processes of change starting in the 1920s or 1930s also had an impact on the transformation of retailing in post war Europe This volume presents a series of case studies looking at transformations of retailing in several European countries offering new insights into the structural preconditions of the emerging mass consumer societies and also into the consequences consumerism had on the practices of retailing

Companion to the History of Advertising Robert Crawford, Jackie Dickenson, 2025-08-18 With expansive global coverage from an international range of experts this unique volume critically examines the stakeholders and influences on the production dissemination and consumption of advertising from its early history via the development of mass advertising to the emergence of the digital age Advertising has been and remains one of the most visible and influential forms of communication globally and the advertising industry is valued in the hundreds of billions worldwide While its size reach and influence have attracted considerable scholarly attention the insights from its historical growth and development are less well understood yet provide invaluable insights This authoritative reference volume provides not only a critical overview of the state of current knowledge and research in advertising history but also a global overview of the industry s growth and development This Companion is a comprehensive source of current scholarship and debate on the history of advertising for advanced students educators and researchers in advertising marketing communication and media studies and will provide an invaluable one stop literature resource for academics and informed professionals alike *Our Frontier Is the World* Mischa Honeck, 2018-05-15 Mischa Honeck s *Our Frontier Is the World* is a provocative account of how the Boy Scouts echoed and enabled American global expansion in the twentieth century The Boy Scouts of America BSA has long been a standard bearer for national identity The core values of the organization have since its founding in 1910 shaped what it means to be an American boy and man As Honeck shows those masculine values had implications that extended far beyond the borders of the United States Writing the global back into the history of one of the country s largest youth organizations *Our Frontier Is the World* details how the BSA operated as a vehicle of empire from the Progressive Era up to the countercultural moment of the 1960s American boys and men wearing the Scout uniform never simply hiked local trails to citizenship they forged ties with their international peers camped in foreign lands and started troops on overseas military bases Scouts traveled to Africa and even sailed to icy Antarctica hoisting the American flag and standing as models of loyalty obedience and bravery Through scouting America s complex engagements with the world were presented as honorable and playful masculine adventures abroad Innocent fun and earnest commitment to doing a good turn of course were not the whole story Honeck argues that the good natured Boy Scout was a ready means for soft power abroad and gentle influence where American

values and democratic capitalism were at stake In other instances the BSA provided a pleasant cover for imperial interventions that required coercion and violence At Scouting's global frontiers the stern expression of empire often lurked behind the smile of a boy

Multiracial Britishness Vivian Kong, 2023-11-02 What does it mean to be British To answer this *Multiracial Britishness* takes us to an underexplored site of Britishness the former British colony of Hong Kong Vivian Kong asks how colonial hierarchies the racial and cultural diversity of the British Empire and global ideologies complicate the meaning of being British Using multi lingual sources and oral history Kong traces the experiences of multiracial residents in 1910-45 Hong Kong Guiding us through Hong Kong's global networks and the colony's co existing exclusive and cosmopolitan social spaces this book uncovers the long history of multiracial Britishness Kong argues that Britishness existed in the colony in multiple hyphenated forms as a racial category but also as privileges a means of survival and a form of cultural and national belonging This book offers us an important reminder that multiracial inhabitants of the British Empire were just as active in the making of Britishness as the British state and white Britons

The Ashgate Research Companion to Modern Imperial Histories John Marriott, 2016-03-23 Written by leading scholars this collection provides a comprehensive and authoritative overview of modern empires Spanning the era of modern imperial history from the early sixteenth century to the present it challenges both the rather insular focuses on specific experiences and gives due attention to imperial formations outside the West including the Russian Japanese Mughal Ottoman and Chinese The companion is divided into three broad sections Part I Times surveys the three main eras of modern imperialism The first was that dominated by the settlement impulse with migrants many voluntarily and many more by force making new lives in the colonies This impulse gave way most especially in the nineteenth century to a period of busy and rapid expansion which was less likely to promote new settlement and in which colonists more frequently saw their sojourn in colonial lands as temporary and related to the business mostly of governance and trade Lastly in the twentieth century in particular empires began to fail and to fall Part II Spaces studies the principal imperial formations of the modern world Each chapter charts the experience of a specific empire while at the same time placing it within the complex patterns of wider imperial constellations The individual chapters thus survey the broad dynamics of change within the empires themselves and their relationships with other imperial formations and reflect critically on the ways in which these topics have been approached in the literature In Part III Themes scholars think critically about some of the key features of imperial expansion and decline These chapters are brief and many are provocative They

reflect the current state of the field and suggest new lines of inquiry which may follow from more comparative perspectives on empire. The broad range of themes captures the vitality and diversity of contemporary scholarship on questions of empire and colonialism encompassing political economic and cultural processes central to the formation and maintenance of empires as well as institutions, ideologies and social categories that shaped the lives both of those implementing and those experiencing the force of empire. In these pages the reader will find the slave and the criminal, the merchant and the maid, the scientist and the artist alongside the structures which sustained their lives and their livelihoods. Overall, the companion emphasises the diversity of imperial experience and process. Comprehensive in its scope, it draws attention to the particularities of individual empires rather than over-generalising as if all empires at all times and in all places behaved in a similar manner. It is this contingent and historical specificity that enables us to explore in expansive ways precisely what constituted the modern empire.

Florentine Tuscany William J. Connell, Andrea Zorzi, 2000 Florence has often been studied in the past for its distinctive urban culture and society while insufficient attention has been paid to the important Tuscan territorial state that was created by Florence in the fourteenth and fifteenth centuries. Comprising a handful of formerly independent city states and numerous smaller communities in the plains and mountains, the Florentine empire in Tuscany supplied the markets and fiscal coffers of the Renaissance republic while providing lessons in statecraft that nourished the political thought of Machiavelli and Guicciardini. This volume comprises seventeen original essays representing the new directions being taken by historians of the Florentine Renaissance. It offers new and exemplary approaches towards state building, political vocabulary, political economy, civic humanism, local history and social patronage in what is one of the most interesting and well documented of the states of late medieval and Renaissance Europe.

Imperial Co-operation and Transfer, 1870-1930, 2015-08-27 Conflict and competition between imperial powers has long been a feature of global history but their co-operation has largely been a peripheral concern. *Imperial Co-operation and Transfer 1870-1930* redresses this imbalance providing a coherent conceptual framework for the study of inter-imperial collaboration and arguing that it deserves an equally prominent position in the field. Using a variety of examples from across Asia, Europe and Africa, this book demonstrates the ways in which empires have shared and exchanged their knowledge about imperial governance including military strategy, religious influence and political surveillance. It asks how, when and where these partnerships took place and who initiated them. Not only does this book fill an empirical gap in the study of imperial history, it traces ideas of empire from their conception in imperial contact zones to their implementation in specific contexts. As such, this is an important study for imperial and global historians of all specialisms.
