Is It Floating:

Is it Floating? Fred Biddulph, Jeanne Biddulph, 1992 Examines both animate and inanimate items to see whether they float

At the Desert's Green Edge Amadeo M. Rea, 1997-11 The Akimel O odham or Pima Indians of the northern Sonoran Desert continue to make their home along Arizona's Gila River despite the alarming degradation of their habitat that has occurred over the past century The oldest living Pimas can recall a lush riparian ecosystem and still recite more than two hundred names for plants in their environment but they are the last generation who grew up subsisting on cultivated native crops or wild foraged plants Ethnobiologist Amadeo M Rea has written the first complete ethnobotany of the Gila River Pima and has done so from the perspective of the Pimas themselves At the Desert's Green Edge weaves the Pima view of the plants found in their environment with memories of their own history and culture creating a monumental testament to their traditions and way of life Rea first discusses the Piman people environment and language then proceeds to share their botanical knowledge in entries for 240 plants that systematically cover information on economic botany folk taxonomy and linguistics The entries are organized according to Pima life form categories such as plants growing in water eaten greens and planted fruit trees All are anecdotal conveying the author's long personal involvement with the Pimas whether teaching in their schools or learning from them in conversations and interviews At the Desert's Green Edge is an archive of otherwise unavailable plant lore that will become a benchmark for botanists and anthropologists Enhanced by more than one hundred brush paintings of plants it is written to be equally useful to nonspecialists so that the Pimas themselves can turn to it as a resource regarding their former lifeways More than an encyclopedia of facts it is the Pimas own story a witness to a changing way of life in the Sonoran Desert

Sight Unseen Carol Rainey, Budd Hopkins, 2003-09-23 The New York Times bestselling author of Witnessed Intruders and Missing Time three groundbreaking

books on the UFO phenomenon returns with astonishing evidence that other worldly beings are a very real and growing part of our lives In Sight Unseen Budd Hopkins and coauthor Carol Rainey show how fascinating discoveries in modern science support the plausibility of the UFO phenomenon Featuring sixteen never before published cases Sight Unseen probes two newly uncovered patterns in alien abduction cases of UFO invisibility and reports of genetically altered alien beings who interact with humans during their routine lives The invisibility accounts detailed by Hopkins include numerous daylight abductions in densely populated urban areas all apparently unseen and accomplished through a technology of invisibility Two air force non coms are snatched from the tarmac of a busy military airfield An Australian family is levitated up into a hovering craft while the father remains paralyzed on the ground with a camera to his eye The resulting evidence on film is discussed in terms of our own scientific advances In the second series of cases abductees report encounters with beings who appear human but apparently possess paranormal powers and stunted emotional ranges Three young women unknown to each other are mysteriously summoned to job interviews In ordinary office settings they encounter human looking beings who lead them into baffling UFO abduction experiences A Wisconsin farmer meets Damoe a man with odd behavior who closely resembles his son Damoe eventually reveals himself as an accomplice of UFO occupants in a startling abduction of the farmer and his wife Five year old Jen is abducted at night to a nearby playground There she must teach the techniques and skills of play to twelve seemingly identical quasi human children Along with these bizarre first person stories told by credible people Hopkins and Rainey explore cutting edge advances in our own technologies and scientific theories that show how these new UFO patterns could have a concrete basis in contemporary science Included are an examination of cloaking devices for aircraft mind control technologies and teleportation achieved in the lab Perhaps the most compelling argument to support these cases lies in the startling and controversial new science of transgenics that actually allows for the creation of alien human beings

A Taste of God T. van den Hoogen,2011 In the course of the 20th century a new worldview has arisen in Western society and culture that is defined in this book as immanent mysticism Several major philosophers are sensitive to such a sense of immanent mysticism The same sensitivity is noticeable in the works of poets painters and other artists It expresses the desire for transforming the way to meaningful living A Taste of God shows that theological research programs are innovated by insights from aesthetics and studies of spirituality The book s research indicates that contemporary Western culture requires a reframing of foundational theology Series Nijmegen Studies in Theology Vol 3
