Is There Death After Life:

The Myth of an Afterlife Michael Martin, Keith Augustine, 2015-03-12 Because every single one of us will die most of us would like to know what if anything awaits us afterward not to mention the fate of lost loved ones Given the nearly universal vested interest in deciding this question in favor of an afterlife it is no surprise that the vast majority of books on the topic affirm the reality of life after death without a backward glance But the evidence of our senses and the ever gaining strength of scientific evidence strongly suggest otherwise In *The Myth of an Afterlife The Case against Life after Death* Michael Martin and Keith Augustine collect a series of contributions that redress this imbalance in the literature by providing a strong comprehensive and up to date casebook of the chief arguments against an afterlife Divided into four separate sections this collection opens with a broad overview of the issues as contributors consider the strongest evidence of whether or not we survive death in particular the biological basis of all mental states and their grounding in brain activity that ceases to function at death Next contributors consider a host of conceptual and empirical difficulties that confront the various ways of surviving death from bodiless minds to bodily resurrection to any form of posthumous survival Then essayists turn to internal inconsistencies between traditional theological conceptions of an afterlife heaven hell karmic rebirth and widely held ethical principles central to the belief systems supporting those notions In the final section authors offer critical evaluations of the main types of evidence for an afterlife Fully interdisciplinary *The Myth of an Afterlife The Case against Life after Death* brings together a variety of fields of research to make that case including cognitiveneuroscience philosophy of mind personal identity philosophy of religion moralphilosophy psychical research and anomalistic psychology As the definitive casebook of arguments against life after death this collection is required reading for any instructor researcher and student of philosophy religious studies or theology It is sure to raise provocative issues new to readers regardless of background from those who believe fervently in the reality of an afterlife to those who do not or are undecided on the matter

To many readers the word may come across as a cold aloof and lossy unsettling word Some people hesitate to even say the word That the angel of death can be called Azrael After meeting with our publishing house editor for a long time we had planned to write a series of books on different subjects that would clear up the confusion Although I had been thinking about writing a book about death for quite some time putting it first was unexpected In general I did not think of such an order since all narratives are treated linearly as birth life and last death It suddenly occurred to me that it was more important to put aside the order of books and write about death I guessed that you have more extensive knowledge to write about this subject and that it will attract more attention unlike other books I will prepare However how much a book with death on it will sell is another matter of discussion In addition to interest it seemed to me as an important justification that it could be at the top of an urgent need list Because in this country thousands of people die every day and their relatives witness their deaths Many chronic and severe patients are also waiting for their death and their relatives are waiting with them Or we may come face to face with unexpected sudden deaths At that time death was prepared as a pre writable book on the subject as the first book in the series Death is an emergency for mortals and dying Even in a world of death nothing is as serious and remarkable as death Since the ultimate victory is death it is necessary to give priority to understanding it When was man s first thought about death This is difficult to know but a look at the long history of evolution yields some clues H neanderthalensis one of our relatives in the evolutionary family tree It emerged in the world 350 thousand years ago and their existence continued until 30 thousand years ago Despite their brains being considerably larger than we are now evolution this data confirms once again the importance of function not size of organs these hominids unable to survive and make technical progress seem to think as if they were thinking about death Perhaps because they were ice age people life was difficult for them and they died at an average of 40 Although they had big brains they did not have the clothes they had developed to protect them from the cold Although it has been suggested that Neanderthals buried their dead with religious rituals and floral ornaments it has been suggested that the data found later cannot be interpreted so precisely that the flower pollen found may have been carried there by the wind or that it may have come from the boots of the workers working in the excavation Whatever the story here in the event that a thinking human s hunting friend dies while hunting or his wife with whom he has made love and had a child suddenly dies it is likely that in his moonlit caverns by the waters where did the living running and hunting person go His questioning was by looking at the stars Because only yesterday she was out there hunting with him and looking after his children What had happened to him then that he could not move speak or react Therefore the perception of death is not new to the evolutionary scene It is very likely that it emerged when hominids began to pretend to be someone else to see their own reflection in the water or to remember their dreams But when exactly There is no one you can answer a question like In the later periods when socialization increased with living in groups death began to pass into both mythologies and written documents as a part of life We begin to see the first written documents about death in

the Egyptian society that lived on the banks of the Nile 3500 years ago and then it became a subject in different ways in Sumer Assyria Hittite and all other societies On the other hand the concept of death and after death creates an inseparable unity of questions and question marks seem to lie back to back Where death is mentioned the discussion of an afterlife which starts with death and giving life is also going on With the emergence of monotheistic religions death and afterlife became one of the most important parts of theology for a long time since the afterlife became the promised life With the birth of not only theology but philosophy it became one of the longest and most important topics of discussion Although it was suggested by some philosophers that it would not be the subject of philosophy because it does not belong to life it has become one of the important and even essential topics of philosophy arising from the mind brain soul body discussions For centuries the mind brain and soul body debates continued and still do Although the main question philosophy seeks to answer is how the mind brain connection is achieved whether there is a mind separate from the material flesh and brain after all if there is a structure that exists apart from the material body whatever its name is mind consciousness or spirit what will happen with death comes after Life after death has been an area of interest not only for religions but also for spiritualism and this interest has led to the birth of modern parapsychology Although this trend which started in the West in the 1800s began to reach its consistency in the late 1950s in our country the concept of the afterlife and death remained the main area of interest of spiritualism The answer they were looking for what kind of continuity is there in the afterlife has provided a more moderate approach to the subject of death for the limited number of people who are interested in the subject although they do not directly examine what death is Many professionals have emerged who are committed to learning from the spirits of the psychic dead and understanding the order of the other side Among them there were people who were educated in scientific knowledge schools and even received the Nobel Prize The experiences at the moment of death and the extraordinary events that took place during the deaths were recorded It was tried to be put together in a frame and mold For a long time death was ignored by western philosophers and it was not considered and systematically examined considering it a subjective situation close to metaphysics Even the famous Wittgenstein claimed in his Tractatus that death is not an event of life and that it cannot be talked about meaningfully For example Spinoza says in his Ethics that the free person does not think about death he contemplates on life This saying is also an escape On the other hand for some death is the real muse of philosophy and they mostly focused on concepts such as death anxiety what death is and how people learn about death Conversely August Comte said that if there is only one philosophical truth it is death Socrates accepted philosophy as preparation for death According to him philosophy would not be easily possible without death Voltaire on the other hand says that we do not know what eternal life is while present life is a terrible joke He points out that the human species is the only species that is aware of death and knows that it will die when the day comes Tirasaymakos on the other hand makes a remarkable emphasis in Philaethes speech If my individuality does not continue I will not even give metallicity to what you mumble about as

immortality He is right but in today's sense individuality means our personality our memory of experience and our awareness of ourselves The other world where this does not exist must not be very desirable More recently the issue of death has become an area of interest in medicine due to the development of organ transplants and the demand for organ harvesting from deceased people Because organs could be taken from people who died not from living people and what exactly death meant had to be defined for physicians For this purpose brain death diagnostic criteria were started to be developed by neurologists in the not too distant 1970s Although these criteria have changed over time the concept of brain death as a general pattern has settled in medicine and has been accepted as the legal definition of death The diagnosis of brain death meant death medically and legally and the same nomenclature is still valid today except for some minor details Again developing health technologies improving the storage conditions of tissues taken from humans and after many animal experiments Can we freeze humans and keep them in order to wake them up again in the future approaches emerged The same question was asked whether it could be done by putting astronauts or passengers to sleep with some kind of deep cooling during sending humans to Mars or distant planets In this case the freezing process which was applied required a definition of death as it required a starting point On the other hand people paid money to wake up after death by freezing himself whole body or just the head in the hope of being cured sometime in the future Body ice cream companies were established in different parts of the world It required a reconsideration of the concept of death when it started as it had to be applied legally as soon as the diagnosis of death was made Parapsychologists were interested in near death experiences but for the last ten years physicians working in hospitals have also started to take part in research topics Discussions began to be published in scientific journals on the subject about why near death experiences could occur and what could happen in the brain neurologically physiologically and chemically at that time In other words death and near death experiences can also be revealed and researched with the scientific method In this way we have come to understand better a concept called clinical death which has been emphasized We have added clinical death to the concept of brain death Spiritualism continue to be a subject of interest and discussion today as it was in the past Aside from saying I used to be this you are not my parents when children are 3 4 years old self helpers and regression healers have come to the point of giving people one or more past lives as gifts The immortality implied by the rebirth cases and the state of being reincarnated in the world after death continue to be an important belief issue both in our country and in the world even today It is a matter of both belief and debate among people at all levels of education More recently recordings of cerebral blood flow and brain waves EEG of deceased persons at the time of death were made and these were published and presented to other scientists for their opinions However physical and physiological examination of deceased persons at the time of death is a very rare situation in science and the first experiments were carried out almost a hundred years ago It was reported in the newspapers that 21 grams were lost from the body with death Even if the film was made in the intervening time the scientific confirmations did not give the same

result But when the movie was released the 21 grams issue occupied the minds and asked Is the soul only 21 grams Oh does it only weigh as much as a piece of chocolate had been asked Since quantum physics pervades our daily lives its implications have made us rethink the issue of death and extinction I haven't observed the same thing for quantum physicists at universities dealing with solid matter A hundred years ago everything was a particle Then it was introduced into our minds that there were no particles but only concentrations of energy Today however we understand that neither particles nor energy concentrations Everything that makes up matter is actually information and temporary existences in the universal quantum field or wave function At that time our structure is not a decaying depleted matter but a structure that has continuity according to quantum physics but only transitions from state to state In this case what would be the meaning of bodily or cerebral death The question was asked and comments were written and drawn by opening the curtain on life after death Therefore the meaning of the word death began to be perceived and felt differently Today the issue of death is one of the most important issues in the minds of modern people whether they live in the village or in the city However it is discussed in the secret subconscious but in open conscious conversations Although most people do not talk about the subject you must have had a mandatory recollection of death either at night or during the death of their relatives or during the burial You have probably asked yourself one or more of the questions you will see in the chapter titles of our book not just remembering You've probably just asked yourself and silently Unbeknownst to anyone Even while thinking about death in your mind you must have thought quietly so that death would stay away In this book we will begin to find answers to questions about death in the minds of readers and perhaps even unintentionally to create new questions We can cause some people to reconsider the truths they believe in Our main aim is to consider and discuss death by considering more scientific information today without ever addressing the theological concept of death and the afterlife The question of why theological debates do not exist in this book is a separate issue and is of interest to theologians In this land where tradition and religion are almost inextricably intertwined thankfully many academic theologians in our universities can make this distinction very well from the perspective of the Qur'an it would be best not to discuss religion and death the afterlife For example a subject such as the promise of Paradise for Abraham is not covered in detail in the book Another issue is what a neurologist who is the author of this book can have to do with death Neurology is a field of medicine dealing with brain and spinal cord diseases After all I am one of the mortals On the other hand neurologists are one of the specialties that diagnose medical death and brain death Neurologists are the first to give consent for organ transplantation when the diagnosis of brain death is made Neurology is one of the specialties with the highest number of deaths and deaths in hospitals Apart from that near death experiences out of body experiences and some other abnormal death related phenomena are related to the nervous system and brain Perhaps most importantly neurologists who are scientists deal with the concepts of consciousness memory and personality All of these things somehow originate in the brain and what happens to them when the brain dies are a question

on the neurologist's mind For this reason the neurologist who is a physician and scientist does not ask or even can ask where the soul goes when he dies he asks whether consciousness memory personality continues The question to ask is do we die when we die And proving that our existence continues after death means revealing the most important secret for us After all you are mortal as a living being that comes to life When we are born and even from the mother's womb there is a seal on our butt mortal Since we are created and in other words we are not creators we will die According to the Islamic religious belief we will be laid alone on the musalla stone we will be buried under the ground alone Even further our universe will face death at some future time A very dark and incredibly cold universal death Other Realm Research Periods It is possible to divide the researches on the other world into four time periods These periods can be grouped as 1880 1930 1930 1960 1960 1990 and 1990 to present It is the first period between 1830 1930 It is the period of collecting classifying and analyzing the spontaneous experiences of people who have seen the ghosts of dead people The accumulation of knowledge that started with psychics also coincides with this period As the 1930s approached many case examples were accumulated and concepts such as extrasensory perception and super psi were written Although parapsychology resorted to experimental methods between 1930 and 1960 many parapsychologists did not engage in much research and experimentation on the afterlife It can be said that they even neglected such a topic While this period in the West was the period of experimental parapsychology in our country the spiritism movement that was about to end in the West Dr It is the period when it started to grow with Bedri Ruhselman In the next period Dr Ruhselman sifted his flour on spiritism and hung his sieve He had left behind enough knowledge Between 1960 and 1990 methods were developed to prevent telepathy from their living relatives in an effort to gather information from beyond death Information was collected by these methods Death has become the subject of science Especially with the start of organ transplants definitions of what death is and the concept of brain death began to be made Although science was not interested in the afterlife parapsychologists continued to gather information Between 1985 and 1995 many people were trained and emerged in the field of parapsychology in our country New associations were formed and many publishers emerged Since the 1990s the otherworld has continued to be the subject of philosophy and other research fields if not more positively of science In addition to the positive discussions quantum physics was also included in the event Personal developments also did not stay away from the event and made all efforts to send people to the beyond The concept of the afterlife is still one of the taboos for science Well memories can persist somewhere else that persists after physical death Because looking at some case reports some reported incidents should not exist if the materialism is true Darwin's theory of evolution cast doubt on the belief that man has a soul Despite this Alfred R Wallace one of the founding fathers of the theory of evolution was an ardent spiritualist and never deviated from his belief that human beings would exist after death Yet Darwin had encircled the throne on which the soul sat and brought it down But we know that the belief or idea that something resembling this life will continue forever and untimely in the afterlife continues to bother some

Questions questions and questions Are you ready to ask aloud questions about death talk and discuss scientific information Surprise and bewilderment are the most important stimulant sources that enable learning In your warm brain inside your heads I m sure you have many questions and you don t have the answers What is the death that these people and I will experience Do I really die when I die Or is something going on Is it possible to remain Is there such a thing as I think therefore I am outside of our body Will my personality and memory remain the same after death When death knocks on the door does everyone have to open it or do some return from that door Does a person die because he is sick or because he is alive Is disembodied awareness possible Is there an experience without a brain Does the experience continue after death If it continues is it a continuation of our personality before we die In the next world will we be able to wake up here as we wake up every morning Believing in the afterlife means affirming eternal life but if time has an end how will it be Will we feel alive when our organic body is destroyed Do we change space with death or does our consciousness change environment or state Did we sanctify the afterlife because absence is not a bearable feeling Are near death or near death experiences real Are people who claim to be born again lying or are they mentally ill Soulless immortals are vampires real Are there ghosts that cause spirits to cause confusion in this world Is the life after death only virtual like walking in one s own mind or is it an objective life Will we remember our memories before we die Will it be a private world or a public and open world to all Will everyone have their own dream Is it beyond the knowledge of positive science that works with the senses Can science claim that there is no continuity after death Is burning in hell more acceptable than non existence Is it death that really scares people or is it the possibility of our existence being completely lost Where is the other world as space If the existence of the other world is confirmed will it be necessary to change the marriage vows to forever not until death do us part If we get conclusive evidence that psychics connect with the souls of the deceased on the other side wouldn t we have to develop a new law on the legal rights of the deceased on this side On the other hand if the famous scientists who died are not going to stay in the other world and they pursue discovery and invention there how will the patent right be provided When the certainty of life after death is revealed how will we respond to people who intend to commit suicide and who want death euthanasia in incurable illness and what will be its place in law Again when psychiatric patients come to psychologists and psychiatrists how many souls will they bring with them How will the visit fee be determined in this case and from whom will it be requested There are also questions about the desire for immortality and the psychology of death What psychology enters someone who learns that you have a deadly disease and that you have a number of days left and what stages does he go through emotionally Is the sadness that we mourn after the death normal How long does it take how long does it take to become a diseased condition Even if I cannot become immortal one day if I keep the genetic codes of my brain unchanged can I be brought back to life hundreds of years from now If I want to freeze my brain or body in time so that it does not change is the price different The death words and questions that I write a lot I recommend you to read this book again

Because from the beginning of the topic until the time you read it except you 100 people died in the world and 1 person in Turkey Although the world population is constantly increasing and cities are more crowded this does not mean that there are no deaths The numbers are only increasing because the birth rate is higher than the death rate Cities are growing In the next 100 years the current world population of 7 215 731 300 people will die With the open number these seven billion two hundred and fifteen thousand imperfect people will be included in this number as the author of this book and you as the reader But we re going to die somehow from heart disease but from cancer but from a stroke in the brain or some other disease One end of the storyboard is birth the other end is death Are you ready to watch the end of the movie Is There Death After Life? 6th Edition John A. Lynn, John W. Schoenheit, Mark H. Graeser, 2011-11 Speak to the dead and hear from deceased loved ones Is this possible Are s ances real Is it God s will or a counterfeit What happens when you die Is it the end or is it a temporary pause before a new beginning Do you know that some people on earth will escape death altogether Read on for more detail or buy the book for a life changing read By definition no one can be both dead and alive This book gives biblical answers to the following questions What is death Is death a graduation Is death a friend or foe What is the soul Where are the dead Why does God use the metaphor of sleep to describe death When will the dead awaken What are the practical benefits to believing the truth about this subject After laying the groundwork by answering these questions the book deals with 14 sections of Scripture commonly used to prove that the dead are alive With numerous references to other Christian writings the authors show how Greek philosophers shaped the current evangelical doctrine of the immortality of the soul and they briefly point out how and why the Reformation failed to reform this pagan belief that is now even more firmly entrenched in Christendom Is There Life After Death? Rebecca O'Connor, 2005 Although most religions believe there is life after death no one has been able to prove this point of view Believers describe near death experiences and visits from the dead while skeptics point to scientific explanations and hoaxes Authors in this anthology present both sides of the argument about the afterlife The Everything Guide to Evidence of the Afterlife Joseph M. Higgins, Chuck Bergman, 2011-02-14 Is there life after death Or is the end of our physical existence really the end of us In this thought provoking guide you will examine scientific evidence so you can decide for yourself whether or not there is an afterlife Psychic Cop Chuck Bergman and medium Joseph Higgins attempt to answer questions like Does consciousness survive death Is communication possible between the living and the dead Are mediums real or frauds What happens to us during near death experiences Where do we go when we die Are Heaven and Hell actualities What is life like after death Is reincarnation real and is everyone reincarnated Including an overview of various religious afterlife traditions this guide introduces you to the unlimited possibilities of what we face after our release from the physical world *55 Answers to Questions about Life After Death* Mark Hitchcock, 2009-01-16 Four thousand years ago amid tragic suffering and death Job asked the question of the ages If a man dies will he live again Since the dawn of history the subject of death and the afterlife has been the great

Life After Life - Lifting the Veil on Death Rajendra Kher, 2019-04-20 Two great truths govern human existence impermanence is the law of the Universe and therefore it is inevitable but the jeewatma soul is permanent and lives forever When one views human existence from the perspective of this knowledge then the only certitude is that there is no death With the materialization of the Universe the wheel of time was set in motion imprinting preordained impermanence Yet despite the world s impermanence Man is offered the opportunity of acquiring knowledge and achieving spiritual growth within his lifespan The cosmic soul momentarily adopts a human body to experience advancement in human form But when the jeewatma departs the physical body from one of the five koshas sheaths it is released from this confinement and bondage into the joyful revelation of its true nature The soul experiences divine love and achieves a state of timelessness The demise of the human body thus becomes the moment for joyful fulfillment when the jeewatma achieves ultimate growth and eternal beauty Though the human form and external body decays the jeewatma or the subtle body soul remains intact in its true and original form Litterateur Rajendra Kher has spent long years studying the subject of death He has researched both ancient and modern references as well as the Vedas Upanishads Bhagavad Gita Srimad Bhagvatam and various mythological literature in his attempt to unravel and comprehend death and life after life He has also analyzed the personal experiences of rishis scholars masters and yogis adding his findings to the book to make it comprehensive The gift contained in these pages is the lifting of the veil on death In so doing

it frees each of us from unknown fears and dread about death and dying enabling us to experience instead true happiness and the grace of living

There Is Life After Death Roy Abraham

Varghese,Raymond A. Moody,2009-10-25 Is death the end Or to put it another way do we survive bodily death Some shrug their shoulders and declare we simply can't know Others just say no And a few flying their philosophical colors pretentiously profess to not even understand the question Curiously the overwhelming majority of human beings throughout the course of history have taken it for granted that death is not the end that there is a life after death This striking and seemingly instinctive belief has been embodied in the religious traditions and philosophical reflections of most cultures There Is Life After Death is the first of its kind in that it assembles and analyzes a comprehensive range of data on life after death and then provides the framework needed to understand the data No previous book has presented such concrete evidence evidence based on the accounts of eyewitnesses as well as on data derived from diverse sources through out the world and history supporting the exi

Jan Patočka and the Phenomenology of Life After Death Gustav Strandberg,Hugo

Strandberg,2023-12-12 This volume contains for the first time in English Jan Patočka's seminal essay The Phenomenology of Afterlife as well as contributions surrounding and analyzing this text In his essay Patočka reflects on our relation to the dead and on how the departure of a loved one affects our continued existence The premise of Patočka's investigation is that our existence always takes place by and through an originary and reciprocal being for others The contributors in the volume extend the field of inquiry into the wider phenomenological and post phenomenological discussion of death by being cognizant of how works of literature can broaden our understanding of the care of death grief forgiveness and non reciprocal love Also included are reflections on issues of philosophical anthropology community collective memory and the ecstatic nature of life issues that can all be related back to Patočka's initial reflections but which nonetheless radiate into a myriad of directions This volume appeals to students and researchers in the field

Pieces of the Puzzle One title four volumes and countless stories that tell of both the mysterious and miraculous aspects to our world and us An epic adventure for the soul Volume 3 The Afterlife and Infinite Beyond The reality of an afterlife is what we can if only first believe and perceive of it to be *Death and the Afterlife in the New Testament* Jaime Clark-Soles, 2006-11-15 Clark Soles began this project in order to answer the question What exactly does the New Testament say about death and afterlife It turns out that it says both more and less than one might hope or expect By more she means that every time the subject of death and what happens after death arises it is clear that the authors interests far exceed answering that single question Their comments emerge from the concerns and experiences of living Christian communities they relate to a larger theological and pastoral agenda and their primary focus remains life on earth and the proper living of it The texts say less than one may hope because no author sets out to answer my question directly There is no systematic theology in the New Testament regarding death and afterlife Certainly resurrection appears throughout though differently emphasized and interpreted Beyond that the fascinating aspects of the question are in the details of the texts Therefore the appropriate question as it turns out is not What does the New Testament say about death and afterlife but what do various New Testament texts say about it Others have sought to unify the New Testament witness glossing over the individual pictures presented by the New Testament authors Clark Soles revels in the snapshots of the individuals and am less interested in the family photo Clark Soles inquires into the specific language that each author uses regarding death and afterlife She explores anthropology cosmology eschatology and where relevant theology and Christology Finally Clark Soles suggests ways that the stated views function in each situation *Life And Death At Paloma* Jeffrey Quilter, 2005-02-15 Gold pomp and circumstances surrounded the mummies of Inca emperors but the elaborate funerary rites at the end of prehistory were only part of a tradition that began thousands of years earlier Life and Death at Paloma the first in depth treatment of burials from a preagricultural South American village analyzes the life of its people during a revolutionary time in prehistory the transition from a hunting gathering fishing way of life to a more sedentary horticultural society Drawing upon the data that he collected as part of the University of Missouri s excavations at Paloma Jeffrey Quilter gives us the first study of preceramic Peruvian life through his analysis of this site s graves and contents His extensively illustrated book is also the first attempt to infer social organization from such data for this period circa 5000 to 2500 B C in Peru In addition he presents the only available summary and discussion of the known preceramic interments from western South America Coastal Peru is

Life After Life Mark Meynell,2024-06-20 The resurrection of Jesus Christ is compelling because it puts everything into perspective In the middle of desperation there is hope After tragedy there can be redemption Even in the face of death there is a promise of new life In *Life After Life* Mark Meynell begins by unpacking how Jesus resurrection from the dead fulfilled God's plan of salvation It then explores the ways in which the eternal life won by Christ is available to us even now through the Holy Spirit Finally readers are invited to imagine how this life might continue into a heaven and an Earth that have been gloriously remade In Christ we can all be raised to life So let a fresh vision of the Resurrection encourage you to live boldly with purpose and hope

Inculturation as Dialogue Chibueze C. Udeani,2007 Although Africa is today often seen because of its large number of Christians as the future hope of the Church a closer examination of African Christianity however shows that the Christian faith has not taken deep root in Africa Many Africans today declare themselves to be Christians but still remain followers of their traditional African religions especially in matters concerning the inner dimensions of their lives It is evident that in strictly personal matters relating to such issues as passage rites and crises most Africans turn to their African traditional religions As an incarnational faith part of the history of Christianity has been its encounter with other cultures and its becoming deeply rooted in some of these cultures The central question remains Why has the Christian faith not taken deep root in Africa This volume is concerned with answering this question

Understanding Death as Life's Paradox Brayton Polka,2019-04-30 This book focuses on death as life's paradox in order to test to put on trial what it means for us human beings to exist No one of us chooses to be born Yet having been born we must choose to have been born to live to exist To exist is to choose to exist To choose to exist is to live with our choices This text argues that death is the limit of life that we can live freely and lovingly at once justly and compassionately solely within the limit of death It shows that we can develop a comprehensive conception of life and also of death solely insofar as we learn to overcome the dualistic opposition between philosophy and theology that continues today to falsify our understanding of not only the secular but also the sacred

Marriage and Life After Death Anthony Onyekwe,2015-01-29 In Africa the emphasis on family marriage and offspring suggest that there is a kind of an unwritten ancestral law that imposes on every male the duty of begetting a son The reason is because the core of African soteriology is centered on offspring The predicament of the childless couples therefore stems from the desire for immortality and salvation that culminates in the admission of the dead into the ancestral world This quest for salvation and immortality constitute social emotional psychological and spiritual problems for Christian as well as non Christian childless couples

Death, Society, and Human Experience Robert Kastenbaum,Christopher M. Moreman,2024-03-28 The 13th edition of *Death Society and Human Experience* provides a panoramic overview of the ways that we are touched by death and dying both as individuals and as members of society A landmark text in the field the

authors draw on contributions from the social and behavioral sciences as well as the humanities including perspectives offered through history philosophy religion literature and the arts to provide thorough coverage and understanding of topics associated with the end of life and death and dying By approaching the subject from multiple angles the authors explain the various ways that individual cultural and societal attitudes influence both how and when we die and how we live and deal with the knowledge of death and loss Originally written by Robert Kastenbaum a renowned scholar who developed one of the world's first death education courses Christopher M Moreman who has worked in the field of death studies for two decades has updated this edition In addition to infusing his close areas of focus both in afterlife beliefs and experiences and how these might affect how people live their lives he's weaved in new coverage of current affairs including The impact of COVID 19 on experiences of death bereavement mourning and more Expanded legalization of physician assisted dying in the United States and several countries Changes in bereavement rituals and traditions stemming from technology use and social media With additional content and classroom extensions available online Death Society and Human Experience remains a thoughtful exploratory and impressively comprehensive overview for undergraduate and graduate courses in death dying and bereavement
