Is There A Universe The Forwood Lectures For 1992:

Is There a Universe? Stanley L. Jaki, 1993-01-01 Is there a Universe Bafflingly scientific cosmologists from Einstein to Hawking have invariably failed to face up to this question This is all the more curious because some of them have claimed to know that the universe can only be such as prescribed by their theories Some even claimed that their expertise enables them to create in theory at least entire universes literally out of nothing For their strange attitudes towards the universe this greatest object of empirical human enquiry scientists have not been taken to task by philosophers No wonder The universe has become orphaned by modern philosophy In this book the author a renowned historian and philosopher of science and especially of astronomy and cosmology probes into this puzzling state of affairs He also points out that slighting the question Is there a Universe has serious consequences for science as well as for philosophy to say nothing of theology Most importantly he shows that it is possible to answer the question Is there a Universe in a convincingly demonstrative way

The Far-future Universe George Francis Rayner Ellis, 2002 Will our universe continue to expand 100 billion years from now Does human life and all intelligence inevitably come to an end as the universe evolves Could our present space be converted catastrophically in to a new kind of space governed by different physical laws Can we construct a theology of the future universe Would the continuation of the universe for eternity be a good thing The Far Future Universe presents eighteen provocative essays offering speculations on various scenarios for the future from the perspectives of cosmology physics biology humanity and theology Other contributors consider global time artificial intelligence religious ideas about the end of the world and the nature of existence Stimulating challenging and exciting these visions of the far future are a starting point for further reflection and speculation
