Is Your Child Walking Right? Andrew K. C. Chong,1986 **On Foot** Joseph Amato,2004-11-01 A sweeping social history on walking from humanity's first steps to modern urban pavement pounders I have met with but one or two persons in the course of my life who understand the art of Walking that is of taking walks who had a genius so to speak for sauntering Henry David Thoreau 1817 1862 Everything is within walking distance if you have the time Stephen Wright 1955 For approximately six million years humans have walked the earth This is the story of how why and to what effect we put one foot in front of the other Walking has been the primary mode of locomotion for humans until very recent times when we began to sit and ride first on horses and in carriages then trains and bicycles and finally cars trucks buses and airplanes rather than go on foot The particular way we saunter clomp meander shuffle plod along jaunt tramp and wander on foot conveys a wealth of information about our identity condition and destination In this fast stepping social history Joseph A Amato takes us on a journey of walking from the first human migrations to marching Roman legions and ancient Greeks who considered man a featherless biped from trekking medieval pilgrims to strolling courtiers from urban pavement pounders to ambling window shoppers to suburban mall walkers Concentrating on walking in Europe and North America and with particular focus on how walking differed according to social class Amato distinguishes how where when who what and under which conditions people moved on foot He identifies crucial transformations in the history of walking including the adoption of the horse by the mounted warrior the rise of public display among European nobility and the building of roads and transportation systems which led to the inevitable ascent of the wheel over the foot

The Parents' Guide to Clubfoot Betsy Miller,2013-03-20 About one in every thousand babies born each year has clubfoot a disorder that affects foot and calf muscles Because treatment usually begins soon after birth and continues for several years parents play a key role in the treatment of clubfoot and need to be able to communicate effectively with their child's doctor The Parents Guide

to Clubfoot is the only book about clubfoot that is written for parents so they can learn everything they need to know about their child's condition. It is an all-in-one resource with medical information, advice from parents, comments from clubfoot experts, and even an illustrated story for preschoolers that parents can read aloud to their children. Written in everyday language, the book covers clubfoot in babies and older children from diagnosis through treatment for mild to severe cases. It provides details on clubfoot, its causes, treatment, and care along with an extensive list of resources and clubfoot assessment aids. In keeping with currently preferred treatments in the U.S., it emphasizes the Ponseti method which minimizes surgery and includes perspectives from Ponseti-trained clubfoot doctors and parents of children with clubfoot. However, separate chapters discuss all pre-treatment and post-treatment care options and one chapter covers surgery and post-surgery care if it becomes necessary. Parents often have a hard time coping with the diagnosis of clubfoot in their newborn children and this book reassures them that the condition is treatable. If treated correctly, the child's foot will look normal and he or she will be fully able to walk, run, and play. Several world-class athletes including Kristi Yamaguchi, Troy Aikman, and Freddy Sanchez were born with clubfoot. The book includes advice from children with clubfoot that highlights the positive effects of having clubfoot as a child, like getting presents after surgery and shows active pictures of them after their treatment. As mentioned, the Ponseti method of treatment, once disregarded as quackery, is the most common method of clubfoot treatment in the United States. It involves a series of casts and braces that slowly reposition the foot. To prevent a relapse, these braces need to be worn until the age of four or five. The book provides instruction, advice, and tips for caring for a child in a cast, putting on the different braces required for the Ponseti method, and solving common problems like bruising. It also includes a useful list of signs that a child's foot is relapsing. The three most important aspects of the book are: 1. It reassures parents that clubfoot is treatable and that with the right treatment, their child's foot will look normal and he or she will be able to walk, run, and play. 2. It is important to find a doctor skilled in treating clubfoot with a nonsurgical approach. This is called the Ponseti method, after the late Dr. Ponseti who developed it. 3. Once a child's foot is corrected, following through with brace wear as directed until the age of four or five is the best way to prevent a relapse in which the foot needs to be corrected again.
