***Religion in Science Fiction*** Steven Hrotic, 2014-07-31 *Religion in Science Fiction* investigates the history of the representations of religion in science fiction literature Space travel futuristic societies and non human cultures are traditional themes in science fiction Speculating on the societal impacts of as yet undiscovered technologies is after all one of the distinguishing characteristics of science fiction literature A more surprising theme may be a parallel exploration of religion its institutional nature social functions and the tensions between religious and scientific worldviews Steven Hrotic investigates the representations of religion in 19th century proto science fiction and genre science fiction from the 1920s through the end of the century Taken together he argues that these stories tell an overarching story a metanarrative of an evolving respect for religion paralleling a decline in the belief that science will lead us to an ideal and religion free future Science fiction's metanarrative represents more than simply a shift in popular perceptions of religion it also serves as a model for cognitive anthropology providing new insights into how groups and identities form in a globalized world and into how crucial a role narratives may play Ironically this same perspective suggests that science fiction as it was in the 20th century may no longer exist
