A Topical Approach to Life-span Development John W. Santrock, **Life-Span Developmental Psychology** Paul B. Baltes, K Warner Schaie, 2013-09-11 Life Span Developmental Psychology Personality and Socialization presents papers on personality and socialization The book discusses the history theory and psychological approaches of developmental psychology with focus on socialization and personality development through the life span personality dimensions and theories of socialization and sex role development The text also describes the life span perspective of creativity and cognitive styles continuities in childhood and adult moral development revisited and issues of intergenerational relations as they affect both individual socialization and continuity of culture The interactional analysis of family attachments social learning theory as a framework for the study of adult personality development person perception research and the perception of life span development are also considered The book further tackles the potential usefulness of the life span developmental perspective in education the strategies for enhancing human development over the life span through educational intervention and some ecological implications for the organization of human intervention throughout the life span Developmental psychologists sociologists gerontologists and people involved in the study of child development will find the book invaluable **Life-span Development** Leonie Sugarman, 2004-03-01 This thorough revision of the highly successful first edition of Life Span Development offers the reader a wide ranging and thought provoking account of human development throughout the lifespan The lifespan approach emphasises that development does not stop when we cease to be adolescents but goes on throughout

adulthood and into old age In initial chapters Leonie Sugarman outlines the issues surrounding the notion of development and how it can be studied including reviews of the work of key theorists Erikson Levinson and Gould She goes on to consider the different ways in which the life course can be construed as a series of age related stages as a cumulative sequence as a series of developmental tasks as a series of key life events and transitions or as a narrative construction which creates a sense of dynamic continuity A final chapter looks at how people cope the resources that are available and the theoretical and practical issues regarding interventions to assist them in the process New to this edition is increased coverage of the topical issue of successful ageing and a new chapter on the increasingly popular narrative approach to lifespan development This edition is also more student friendly with exercises in self reflection that encourage the reader to look at the development of their own lives or those of their current or future clients Boxed material highlighting major theories and clarifying concepts is also included This book will be invaluable for students of developmental and occupational psychology and professionals in the fields of health management education and social work *Lifespan Development* Lumen Learning,2020-01-02 Lifespan Development examines the physical cognitive and socioemotional changes that occur throughout a lifetime This course covers the essentials in understanding human development psychological research and theories of growth and development Students will come to understand the lifespan perspective and to analyze growth through each of the major stages of development prenatal development infancy early childhood middle childhood adolescence early adulthood including emerging adulthood middle adulthood and late adulthood The course covers key topics in each of these stages including major developmental theories genetics attachment education learning disabilities parenting family life moral development illnesses aging generativity and attitudes towards death and dying **Life-span Developmental Psychology** E. Mark Cummings,Anita L. Greene,Katherine H. Karraker,2014-01-02 Although there has been a significant increase in studies of stress and coping processes in recent years researchers have often approached these topics from rather narrow and constrained perspectives Furthermore little communication has occurred across disciplines and research directions resulting in the emergence of several relatively isolated literatures An outgrowth of the Eleventh Biennial West Virginia University Conference on Life Span Development this volume emphasizes two major themes the importance of taking a life span approach to the study of stress and coping and the development of new and more complete conceptual models of stress and coping processes The first to approach these subjects from a life span perspective this book includes papers by distinguished researchers from each of the major periods of the life span and brings together the cognitive and socioemotional traditions in the study of dealing with pressures The editors hope that this facilitation of communication among researchers with diverse views will help create a broadening and integration of perspectives *Life-span Developmental Psychology* Paul B. Baltes,Hayne W. Reese,John R. Nesselroade,2014-01-02 What are the changes we see over the life span How can we explain them And how do we account for individual differences This volume continues to examine these questions and to report

advances in empirical research within life span development increasing its interdisciplinary nature The relationships between individual development social context and historical change are salient issues discussed in this volume as are nonnormative and atypical events contributing to life span change *Life-span Development* Leonie Sugarman,2004-03-01 This thorough revision of the highly successful first edition of Life Span Development offers the reader a wide ranging and thought provoking account of human development throughout the lifespan The lifespan approach emphasises that development does not stop when we cease to be adolescents but goes on throughout adulthood and into old age In initial chapters Leonie Sugarman outlines the issues surrounding the notion of development and how it can be studied including reviews of the work of key theorists Erikson Levinson and Gould She goes on to consider the different ways in which the life course can be construed as a series of age related stages as a cumulative sequence as a series of developmental tasks as a series of key life events and transitions or as a narrative construction which creates a sense of dynamic continuity A final chapter looks at how people cope the resources that are available and the theoretical and practical issues regarding interventions to assist them in the process New to this edition is increased coverage of the topical issue of successful ageing and a new chapter on the increasingly popular narrative approach to lifespan development This edition is also more student friendly with exercises in self reflection that encourage the reader to look at the development of their own lives or those of their current or future clients Boxed material highlighting major theories and clarifying concepts is also included This book will be invaluable for students of developmental and occupational psychology and professionals in the fields of health management education and social work Family Systems and Life-span Development Kurt Kreppner,Richard M. Lerner,2013-05-13 This interdisciplinary volume presents international research and theories focusing on the development of the individual across the life span Centering on family as the key context influencing and being influenced by the developing person the contributors to this volume discuss an array of theoretical models methodological strategies and substantive foci linking the study of individual development the family system and the broader context of human development The volume presents continuing empirical research and theories in the realm of individual and family development and features a developmental contextual view from a process oriented vantage point **Life-Span Development and Behavior** Paul B. Baltes,David L. Featherman,Richard M. Lerner,2014-02-04 This serial publication continues to review life span research and theory in the behavioral and social sciences particularly work done by psychologists and sociologists conducting programmatic research on current problems and refining theoretical positions Each volume introduces excellent peer reviewed empirical research into the field of life span development while presenting interdisciplinary viewpoints on the topic Often challenging accepted theories this series is of great interest to developmental personality and social psychologists **Life-Span Developmental Psychology** Nancy Datan,Leon H. Ginsberg,2013-10-22 Life Span Developmental Psychology Normative Life Crises is a compilation of papers that deals with various points of view between the academic perspective studies in developmental

psychology and applied perspective and the practical efforts of social workers to help individual clients Part I discusses normative life crises from the two perspectives that include human behavior theory in social work education This part also includes an interdisciplinary approach covering developmental social sociological economic and psychological fields Part II covers the normative life crises in individual development such as discussions on death ego development and a practitioner's response on models of ego development The book also discusses an abstract model versus an actual individual experience in dealing with crises as well as the meanings of adaptation and survival during old age Part III presents the normative life crises in the family circle covering topics such as parenthood sex roles depression widowhood and an example of situational stress Part IV deals with the normative life crises and the social system including socialization life course changing work cycles and public policy on death This book will prove valuable for psychologists psychiatrists sociologists social workers and behavioral scientists Life Span Development Robert S. Feldman, 2010-08-22 For Human Development Lifespan

Development courses organized topically Life Span Development A Topical Approach is based on the chronologically organized highly popular Development Across the Life Span is be approximately 20% shorter than traditional lifespan books and organized topically Life Span Development A Topical Approach maintains the student friendliness that has been the hallmark of Feldman's other development textbooks It is rich in examples and illustrates the applications that can be derived from the research and theory of lifespan developmentalists It pays particular attention to the applications that can be drawn from theory and research in the field To optimize student learning and to provide instructors with maximum flexibility the book uses a modular approach Consequently rather than facing long potentially daunting chapters students encounter material that is divided into smaller more manageable chunks modules Presenting material in small chunks represents a structure that research long ago found to be optimum for promoting learning This book is available with MyDevelopmentLab which includes a full eText videos self tests flashcards and MyVirtualChild the interactive simulation which allows you to raise a virtual child from birth to age 18 and monitor the effects of your parenting decisions MyDevelopmentLab does not come automatically with the text so please be sure you check to ensure that an access code is included before placing your order The book by itself has a different ISBN number than the book MyDevelopmentLab You can also purchase a MyDevelopmentLab access code online at www.mydevelopmentlab.com Visit the Feldman preview website to view a sample chapter www.pearsonhighered.com/showcase/feldman What to know more Click here to visit the publisher's website and learn more about this book <http://www.pearsonhighered.com/educator/product/LifeSpanDevelopmentATopicalApproach/9780205759569/page> Lifespan Development Barbara M. Newman, Philip R. Newman, 2012 Newman and Newman use a chronological approach to present development across the life span drawing on the psychosocial theory of Erik Erikson to provide a conceptual framework for the text The authors address physical intellectual social and emotional growth in all life stages focusing on the idea that development results from the interdependence of these areas at every stage and placing

special emphasis on optimal development through life *The Handbook of Life-Span Development, Volume 2* ,2010-08-09 In the past fifty years scholars of human development have been moving from studying change in humans within sharply defined periods to seeing many more of these phenomenon as more profitably studied over time and in relation to other processes The Handbook of Life Span Development Volume 2 Social and Emotional Development presents the study of human development conducted by the best scholars in the 21st century Social workers counselors and public health workers will receive coverage of the social and emotional aspects of human change across the lifespan **Lifespan Development** Leo B. Hendry, Marion Kloep, 2002 Takes a lifespan approach with much greater emphasis on adulthood and old age than many other developmental books This reflects the continual increase in this portion of the population in present day society Uses one central model the challenge risk model throughout to tie all the different stages of the lifespan together making this topic much less confusing for students Introduces other theoretical models where appropriate to provide a balanced view of approaches to the subject Includes world wide research findings and examples Considers developmental psychology as an interdisciplinary topic looking at motor cognitive and social skills together rather than as unrelated topics Thomson
