**Development of Person-context Relations** Thomas A. Kindermann, Jaan Valsiner, 2013-06-17 Traditionally

developmental psychology has its focus on individuals. Developmentalists aim to describe regularities in individuals' change and development across time to explain the processes and mechanisms that are involved in producing change and regularity and eventually to design strategies for optimization and modification of developmental pathways. Although the role of contexts has always been of central concern for these purposes, it is nevertheless quite surprising to note that compared to the effort devoted to individuals, relatively little attention has been paid to the study of the nature and organization of their contexts. This volume is an exploration of the idea that how we describe and explain human development will be closely tied to our understanding of what contexts are, how individuals and contexts become influential for one another, what contexts do to and with individuals, and how contexts and their influences change themselves across time. A major theme is whether the traditional dichotomy between individuals and their contexts may be artificial, perhaps culturally biased, and after psychologists have adhered to it for about a century, may have become an impediment to increasing our understanding of developmental processes. With this volume, the editors contribute a serious consideration of development and systematic change to emerging models of person-context relations and provide suggestions about how it may be possible to incorporate these notions in developmental research and theorizing.

#### **Family Systems and Life-span Development**

Kurt Kreppner, Richard M. Lerner, 2013-05-13. This interdisciplinary volume presents international research and theories focusing on the development of the individual across the life span. Centering on family as the key context influencing and being influenced by the developing person, the contributors to this volume discuss an array of theoretical models, methodological strategies, and substantive foci linking the study of individual development, the family system, and the broader context of human development. The volume presents continuing empirical research and theories in the realm of individual and family development and features a developmental contextual view from a process-oriented vantage point.

[Aging and the Life Course](#) Deborah Lowry, 2022-01-10. Aging part II explores the experiences and conditions of aging especially in particular groups, and part III presents current research on older adults' engagement in work, family, social networks, and sex. Finally, Part IV addresses themes of aging and social change.

**The Oxford Handbook of Emotion, Social Cognition, and Problem Solving in Adulthood** Paul Verhaeghen, Christopher Hertzog, 2016-03-09. Over the last decade, the field of socio-emotional development and aging has rapidly expanded with many new theories and empirical findings emerging. This trend is consistent with the broader movement in psychology to consider social, motivational, and emotional influences on cognition and behavior. The Oxford Handbook of Emotion, Social Cognition, and Problem Solving in Adulthood provides the first overview of a new field of adult development that has emerged out of conceptualizations and research at the intersections between socio-emotional development, social cognition, emotion coping, and everyday problem solving. This field roundly rejects a universal deficit model of aging, highlighting instead the dynamic nature of socio-emotional development and the differentiation of individual trajectories of development as a function of variation in contextual and experiential influences. It

emphasizes the need for a cross level examination from biology and neuroscience to cognitive and social psychology of the determinants of emotional and socio emotional behavior This volume also serves as a tribute to the late Freda Blanchard Fields whose thinking and empirical research contributed extensively to a life span developmental view of emotion problem solving and social cognition Its chapters cover multiple aspects of adulthood and aging presenting developmental perspectives on emotion antecedents and consequences of emotion in context everyday problem solving social cognition goals and goal related behaviors and wisdom The landmark volume in this new field The Oxford Handbook of Emotion Social Cognition and Problem Solving in Adulthood is an important resource for cognitive developmental and social psychologists as well as researchers and graduate students in the field of aging emotion studies and social psychology **Meaning and**
