**Life Style and Criminality** Hans Göppinger,2013-06-29 This monograph contains the results of an interdisciplinary study into the life histories of male delinquents Conducted by the Institute of Criminology at the University of T bingen it compares the biographies of young adult inmates with a random sampling of young men from the general population and considers the results in the light of other studies of a similar nature primarily from the Anglo American literature The significance of this study lies not only in the data presented but also in the conclusions the author draws concerning subject matter and methods of criminology as an autonomous integrated science This leads to a practice oriented applied criminology based on the evaluation of specific criminological criteria For the practitioner such an approach allows a differential assessment of the individual offender in the context of his social relationships with conclusions regarding prognosis and therapeutic effects

**Drugs and Crime in Lifestyle Perspective** Glenn D. Walters,1994-03-11 Glenn D Walter s short book Drugs and Crime in Lifestyle Perspective is another gem it works purposefully with the complexity and diversity of the drugs crime linkages and connections insisting that traditional ways of researching and intervening with those caught up in deviant lifestyles where drugs and crime are endemic are unproductive This is a book for thinking practitioners and those concerned with creating local multiagency policy or working with drug users and offenders selling or using drugs It offers no easy assessments or solutions but is the more productive for that Howard Parker in British Journal of

Living Off Crime Kenneth D. Tunnell,2006 This book is an explication of social class and the adjudication of repetitive property offenders within the under class It describes their class informed subculture and near absence of any politicized action or strategy

Ethnicity, Race, and Crime Darnell F. Hawkins, 1995-02-16 This book examines both historical and contemporary patterns of crime and justice among white ethnics and nonwhite racial groups in the United States Researchers have long noted that rates of reported crime and punishment are higher for some ethnic and racial groups in the U S than for others Comparatively high rates of crime have been reported for white ethnic Americans during the past and some groups of racial minorities today These observations have prompted much public debate and acrimony but surprisingly little research Contributors include Thomas A Regulus Joan McCord M Craig Brown and Barbara D Warner Eric Monkkonen E M Beck and Stewart E Tolnay Martha A Myers Gary LaFree Robert D Crutchfield Dorothy Lockwood Anne E Pottieger and James A Inciardi William Chambliss Coramae Richey Mann Theodore G Chiricos and Charles Crawford Zoann Snyder Joy Roland Chilton Raymond Teske and Harald Arnold Pamela Irving Jackson and Darnell F Hawkins **Criminality and Crime** Glenn

D. Walters, 2022-03-09 Walters provides a detailed description of how criminal thinking serves as a vital link between criminality and crime. Criminality, the propensity to become involved in criminal activity, and crime participation in a specific criminal event are normally treated as separate entities. Most criminological theories, in fact, can be classified as either theories of criminality or theories of crime. It is the author's contention that criminality and crime are two sides of the same coin and that criminal thinking can explain both. The first of three sections explores the elements of criminality and crime across biological, social, cognitive, and developmental forms. The second section integrates the individual elements into three models using mediation and moderation methodologies. Two of the models are designed to explain criminality: moral and control, and the third is designed to explain crime decision making. The final section of the book emphasizes application and explains that change is a function of our ability to build competencies in offenders regardless of age. The result is an integrated approach in which criminality and crime are viewed as indispensable parts of a larger theory of criminological development.

*Encyclopedia of Criminological Theory* Francis T. Cullen, Pamela Wilcox, 2010-09-23 Consistently excellent. The level and coverage of the content make this an invaluable reference for students studying criminology or taking criminal psychology modules at degree level and beyond. Adam Tocock Reference Reviews. In discussing a criminology topic, lecturers and course textbooks often toss out names of theorists or make a sideways reference to a particular theory and move on as if assuming their student audience possesses the necessary background to appreciate and integrate the reference. However, university reference librarians can tell you this is often far from the case. Students often approach them seeking a source to provide a quick overview of a particular theory or theorist with just the basics: the who, what, where, how, and why, if you will. And reference librarians often find it difficult to guide these students to a quick one-stop source. In response, SAGE Reference is publishing the two-volume *Encyclopedia of Criminological Theory*, available in both print and electronic formats. This serves as a reference source for anyone interested in the roots of contemporary criminological theory. Drawing together a team of international scholars, it examines the global landscape of all the key theories and the theorists behind them, presenting them in the context needed to understand their strengths and weaknesses. In addition to interpretations of long-established theories, it also offers essays on cutting-edge research as one might find in a handbook. And like an unabridged dictionary, it provides concise-to-the-point definitions of key concepts, ideas, schools, and figures. Coverage will include contexts and concepts in criminological theory, the social construction of crime, policy implications of theory, diversity, and intercultural contexts, conflict theory, rational choice theories, conservative criminology, feminist theory.

**About Criminals** Mark Pogrebin, 2004 *About Criminals: A View of the Offender's World* is a collection of readings that presents recent and important research on criminal behavior. The book takes a naturalistic approach, allowing criminals to discuss their offenses and lifestyles from their own perspective. This method gives criminals

the opportunity to disclose details of their offending behavior and reasons for their participation in crime About Criminals offers a first hand examination of offenders motivations descriptions of how they operate their thoughts about victims and descriptive analysis about their sometimes deviant lifestyles

**Crime and Criminal Justice** Stacy L. Mallicoat, Denise Paquette Boots, 2024-02-19 Crime and Criminal Justice provides accessible and comprehensive coverage of all aspects of the criminal justice system With contemporary examples and effective learning tools the Third Edition helps students go beyond the surface towards a deeper understanding of the criminal justice system

**Criminal Belief Systems** Glenn D. Walters, 2002-09-30 Walters integrates information from traditional criminological models and findings from developmental psychology to form a system of five belief systems self view world view past view present view and future view designed to explain crime initiation and maintenance While reviewing belief systems that support crime Walters also offers a model of change through which belief systems incongruent with crime can be constructed He begins with a review of six traditional criminological models each of which is considered to possess sufficient breadth and substance to advance our understanding of crime Information gathered from these major theoretical systems is integrated with research from developmental psychology to create a system of crime congruent belief systems The belief systems along with recent research on attributions outcome expectancies efficacy expectancies values goals and thinking styles are then used to

construct a general theory of crime and explain four specific categories of crime: violent crime, sexual assault, white collar crime, and drug trafficking. Walters concludes with a model of assisted change whereby belief systems incongruent with crime are initiated and maintained with the intent of helping people abandon crime-congruent lifestyles. This change model revolves around four core elements: responsibility, confidence, meaning, and community, each of which is emphasized in a clinician's interactions with clients seeking to abandon crime-congruent lifestyles. As Walters maintains, belief systems are instrumental in both the development and cessation of crime-congruent lifestyles. Of particular interest to scholars, students, researchers, and practitioners involved with criminology, criminal justice, and clinical and correctional psychology.
