McGrath,2024-03-26 McGrath calls for a full bodied humanism invigorated by both scientific reasoning and religious devotion  
Profound engagement with life defining issues Booklist Richard Dawkins s groundbreaking book The God Delusion created an explosion of interest in the relation of science and faith This often troubled relationship between science and religion was seemingly damaged by the rise of the New Atheism which insisted that science had essentially disproved not just God but also the value of religion There is increasing skepticism towards its often glib and superficial answers and the big questions about faith God and science haven t gone away in fact we seem to talk about them more than ever Alister McGrath s The Big Question is an accessible engaging account of how science relates to faith exploring how the working methods and assumptions of the natural sciences can be theologically useful McGrath uses stories and analogies as well as personal accounts in order to help readers understand the scientific and theological points he makes and grasp their deeper significance An extremely accomplished scientist and scholar McGrath criticizes the evangelism of the New Atheists and paves a logical well argued road to the compatibility between science and faith Some of his main discussion points include There is much more convergence between science and faith than is usually appreciated How the three great models of scientific explanation can be adapted to religious belief Belief in God provides a big picture of reality making sense of science s successes Another deeply felt entry on two divergent yet ultimately compatible ways of engaging the world and understanding reality Kirkus Reviews     [The Big Questions](#) Lama Surya Das,2007-10-02 The best selling author of Awakening the Buddha Within addresses life s most provocative and tantalizing questions simply directly and powerfully Every life is a journey through the unknown Along the way however we tend to encounter the same perplexing questions again and again Some are cosmic enigmas that have always tested the human mind What is my purpose in life What happens after I die Others are puzzles presented by daily life in modern society What if anything justifies assisted suicide What is my personal responsibility to the homeless According to Lama Surya Das one of the foremost Western Buddhist scholars and teachers the more we seek to resolve these mysteries the more fully we live Along with his own personal beliefs the author presents a variety of thoughtful points of view representing different schools of Buddhism other religions spirituality in general and pragmatism The Big Questions challenges readers in the most stimulating and thoughtful way to formulate individual authentic responses to life s big questions     [Big Questions](#) DK,2011-04-18 This book asks the big questions that really make you think about yourself and your place in the world What is the secret of happiness Can computers think What is reality anyway Stretching your brain and firing your imagination the bright dynamic spreads will set your mind racing off along different tangents and into new realms of discovery From personal questions about thoughts and dreams to the wider questions of life the universe and everything this is a journey like no other     [Fresh Takes on the Big Questions](#) James Ferguson,2024-09-12 This book takes a fresh look at a wide range of life s big questions and provides a resource as readers search for answers individually or together in group discussion The goal is to explore how Christian faith relates to aspects of
