Apoptosis and Beyond James A. Radosevich, 2018-09-25. These volumes teach readers to think beyond apoptosis and describes all of the known processes that cells can undergo which result in cell death. This two volume source on how cells die is the first comprehensive collection to cover all of the known processes that cells undergo when they die. It is also the only one of its kind to compare these processes. It seeks to enlighten those in the field about these many processes and to stimulate their thinking at looking at these pathways when their research system does not show signs of activation of the classic apoptotic pathway. In addition, it links activities like the molecular biology of one process, e.g., Necrosis to another process, e.g., apoptosis and contrasts those that are close to each. Volume 1 of *Apoptosis and Beyond: The Many Ways Cells Die* begins with a general view of the cytoplasmic and nuclear features of apoptosis. It then goes on to offer chapters on targeting the cell death mechanism: microbial programmed cell death, autophagy, cell injury, adaptation, and necrosis, necroptosis, ferroptosis, anoikis, pyronecrosis, and more. Volume 2 covers such subjects as phenoptosis, pyroptosis, hematopoiesis, and eryptosis, cyclophilin d dependent

necrosis and the role of phospholipase in cell death Covers all known processes that dying cells undergo Provides extensive coverage of a topic not fully covered before Offers chapters written by top researchers in the field Provides activities that link and contrast processes to each other Apoptosis and Beyond The Many Ways Cells Die will appeal to students and researchers clinicians in cell biology molecular biology oncology and tumor biology

Women's Sexuality Across the Life Span Judith C. Daniluk, 2003-06-09 Moving beyond a traditional focus on sexual functioning this book emphasizes the complex interaction of psychological social cultural and biological influences on women's sense of themselves as sexual beings Written for practitioners and educators its goal is to challenge contradictory messages and meanings that cause many women to feel disconnected from their bodies and from their needs and desires Themes explored include the development of sexual awareness and sexuality in childhood and adolescence the critical sexual choices of young adulthood and the multiple transitions characterizing the middle and later years of life The book features creative exercises and interventions to help girls and women construct more affirming sexual meanings

Aging and the Art of Living Jan Baars, 2012-10-01 Baars explores philosophers from Plato to Foucault as they consider the meaning of aging and wisdom in our society In this deeply considered meditation on aging in Western culture Jan Baars argues that in today's world living longer does not necessarily mean living better He contends that there has been an overall loss of respect for aging to the point that understanding and dealing with aging people has become a process focused on the decline of potential and the advance of disease rather than on the accumulation of wisdom and the creation of new skills To make his case Baars compares and contrasts the works of such modern era thinkers as Foucault Heidegger and Husserl with the thought of Plato Aristotle Sophocles Cicero and other Ancient and Stoic philosophers He shows how people in the classical period less able to control health hazards had a far better sense of the provisional nature of living which led to a philosophical and religious emphasis on cultivating the art of living and the idea of wisdom This is not to say that modern society's assessments of aging are insignificant but they do need to balance an emphasis on the measuring of age with the concept of living in time Gerontologists philosophers and students will find Baars discussion to be a powerful perceptive conversation starter
