book interrogates the uncertain itinerary of the process of social logics discovery In that sense it is a decisive step towards a critical systemization of ongoing theories and practices within the African scientific community The reader can therefore identify the philosophical historical sociological and anthropological foundations of object construction field data exploitation and research results delivery This book explains the importance of the philosophical and social modalities of scientific practice the influence of local historical contexts the different usages of new investigative tools including the audiovisual tools Finally the book backed by classical theories serves as an invitation toward considering scientific commitment to African field research from a reflective perspective
