Le Destin Des Generations Structure Soci:

Le destin des générations Louis Chauvel, 2002 Les hasards de l'année de naissance marquent le destin des générations. Deux guerres entrecoupées d'une crise économique majeure, une reprise de trente ans, un ralentissement depuis deux décennies, tel est le legs inégalement partagé de l'histoire sociale. Les générations nées avant 1920 subirent un sort difficile. Les suivantes nées jusqu'en 1950 qui connurent les Trente glorieuses au temps de leur jeunesse ont rencontré un destin collectif inespéré : multiplication des diplômes sans dévalorisation forte, mobilité sociale ascendante, salaires et revenus rapidement croissants, meilleure protection sociale, etc. Avec la crise, cette dynamique cesse pour les successeurs arrivés trop tard dans la vie adulte. Première analyse systématique de la structure sociale, la lumière des clivages générationnels, ce livre souligne l'existence d'une fracture qui promet de s'amplifier au début du XXI^e siècle. Cette question est politique car elle est au croisement de la transformation des classes sociales et de l'avenir de l'État providence. Pour dépasser ces périls, il faudrait construire une véritable politique des générations engageant la responsabilité de tous.

The New Generations of Europeans Wolfgang Lutz, Rudolf Richter, Chris Wilson, 2010-09-23 Europe today is characterized by aging populations, changing family patterns, dropping fertility rates, and mass migration. With the potentially massive ramifications, this has for pensions, health, housing, transport, family relations, employment, and other sectors of society. The New Generations of Europeans sets out to assess what it is to be a citizen of a growing EU and what important demographic, social, and economic issues will have to be faced by European decision makers. Edited by leading demographers and sociologists and made up of contributions from respected researchers in the fields of population and society from different parts of Europe, it presents the results of five years of research by the European Observatory on the Social Situation, Demography, and the Family. With the aid of over 100 graphs and tables and a full discussion, this book asks how numerous, fertile, and long-lived the new generations of European citizens will be. The state of families, immigration, and health are all examined especially in the context of the challenges that will be faced in maintaining social cohesion. Crucially, the question of how demographic changes will impact Europe's socioeconomic infrastructure is woven throughout.

The Welfare State in Post-Industrial Society Jason L. Powell, Jon Hendricks, 2009-06-10 In recent years, major social forces such as ageing populations, social trends, migration patterns, and the globalization of economies have reshaped social welfare policies and practices across the globe. Multinational corporations, NGOs, and other international organizations have begun to influence social policy at a national and local level. Among the many ramifications of these changes is that globalizing influences may hinder the ability of individual nation states to effect policies that are beneficial to them on a local level. With contributions from thirteen countries worldwide, this collected work represents the first major comparative analysis on the effect of globalization on the international welfare state. The Welfare State in Post-Industrial Society is divided into two major sections: the first draws from a number of leading social welfare researchers from diverse countries who point to the nation state as case studies.

highlighting how it goes about establishing and revising social welfare provisions The second portion of the volume then moves to a more global perspective in its analysis and questioning of the impact of globalization on citizenship ageing and marketization The Welfare State in Post Industrial Society seeks to encourage debate about the implications of the most pressing social welfare issues in nation states and integrate analyses of policy and practice in particular countries struggling to provide social welfare support for their needy populations IBSS: Sociology: 1999 ,2000-12-07 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge on the social sciences *Made in France* Andy Smith,2021-03-23 How has French society been made by whom and why And how in turn has it influenced the French This book sets out the institutionalized rules and norms that continue to structure France together with the political work that has recently changed or reproduced these power relations Exploring a range of age groups and types of social activity including work business entertainment political mobilizations and retirement *Made in France* examines where significant change has occurred over the last four decades Smith argues that while transformation has occurred in France s financial and education sectors only relatively marginal shifts have occurred elsewhere in French society To explain this pattern of continuity and isolated change the book strongly nuances claims that neo liberalism globalization or a rise in populism have been its causes References to these trends have impacted upon French politics to varying extents Smith argues however France continues to be dominated by issues which are specific to the country and linked to its deep societal structures and history Smith provides a comprehensive account of French society and politics and in doing so proposes an insightful analytical framework applicable to the comparative analysis of other nations **Language and Social Structure in Urban France** David Hornsby,2017-07-05 The coming together of linguistics and sociology in the 1960 s most notably via the work of William Labov marked a revolution in the study of language and provided a paradigm for the understanding of variation and change Labovian quantitative methods have been employed successfully in North America the UK Scandinavia and New Zealand but have had surprisingly little resonance in France a country which poses many challenges to orthodox sociolinguistic thinking Why for example does a nation with unexceptional scores on income distribution and social mobility show an exceptionally high degree of linguistic levelling that is the elimination of marked regional or local speech forms And why does French appear to abound in hyperstyle variables which show greater variation on the stylistic than on the social dimension in defiance of a well established theory that such variables should not occur This volume brings together leading variationist sociolinguists and sociologists from both sides of the Channel to ask what makes France exceptional In addressing this question variationists have been forced to reassess the accepted interdisciplinary consensus and to ask as sociolinguistics has come of age whether concepts and definitions have been transposed in a way which meaningfully preserves their original sense and crucially takes account of recent developments in sociology Sociologists for their part have focused on the largely neglected area of

language variation and its implications for social theory Their findings therefore transcend the case study of a particularly enigmatic country to raise important theoretical questions for both disciplines **Activists Forever?** Olivier Fillieule, Erik Neveu, 2019-01-03 Using a global array of case studies this collection explores the consequences of political involvement on an individual's life **Inclusion and Exclusion of Young Adult Migrants in Europe** Kirsten Fossan, 2016-05-23 Inclusion and Exclusion of Young Adult Migrants in Europe presents analyses of research carried out during the course of the EUMARGINS research project exploring the inclusion and exclusion of young adult immigrants across a range of national contexts including the Nordic welfare states, old colonial countries, Southern European nations and the Eastern European region. Scrutinising legal policy and historical sources as well as participation in labour market and education systems, this volume engages with multiple social arenas and spheres to integrate research and provide a cohesive investigation of the dynamics of each national setting. In addition to the chapters focused on individual national contexts (Estonia, France, Italy, Norway, Spain, Sweden and the UK), the book also provides a comprehensive transnational analysis, developing a comparative perspective and explaining the overarching research framework. A carefully organized and comprehensive exploration of the exclusion and inclusion of young adult migrants in Europe, **Inclusion and Exclusion of Young Adult Migrants in Europe** will appeal to social scientists with interests in migration, population change, integration and exclusion **Education, Occupation and Social Origin** Fabrizio Bernardi, Gabriele Ballarino, 2016-04-29 Questioning the assumption that education is the great social equalizer, this book takes a comparative approach to the social origin-education-destination triangle by examining advantage in 14 different countries, including case studies from Europe, Israel, the USA, Russia and Japan. Contributions from leading experts examine the relation between family background, education and occupational achievement over time and across educational levels, focusing on the relationship between individuals' social origins and their income and occupational outcomes. Providing new theoretical insights, this book eloquently analyzes a variety of barriers to social mobility. Using concepts of compensatory and boosting advantage to explain the intergenerational transmission of social inequality, it refutes the notion of contemporary societies as education-based and meritocratic, showing that in most of the countries studied there is no sign of decreasing intergenerational association despite the expansion of education. With its multitude of pertinent case studies, **Education, Occupation and Social Origin** will be of interest to academics and students of social policy as well as those interested in social inequalities and their evolution over time. It will also be a useful reference for governmental policymakers in the wake of the current economic crisis **Forgetting Items** Baptiste Brossard, 2019-07-31 A book that sits in the upper echelons of social dementia research, an entertaining and revelatory contribution to the field. Symbolic Interaction. Alzheimer's disease has not only profound medical consequences for the individual experiencing it, but a life-changing impact on those around them. From the moment a person is suspected to be suffering from Alzheimer's or another form of dementia, the interactions they encounter progressively change. **Forgetting Items** focuses on that social experience of Alzheimer's.

delineating the ways disease symptoms manifest and are understood through the interactions between patients and the people around them Mapping out those interactions takes readers through the offices of geriatricians into patients narratives and interviews with caregivers down the corridors of nursing homes and into the discourses shaping public policies and media coverage Revealing the everyday experience of Alzheimer s helps us better understand the depth of its impact and points us toward more knowledgeable holistic ways to help treat the disease Considers the social aspect of dementia by considering how symptoms are expressed by the individual and understood interpreted by those close to them The author s goal is to help us understand common experiences associated with dementia and ways to interpret those experiences through the lens of sociology ISCHP International Society of Critical Health Psychology **The Routledge Companion to**

Bourdieu's 'Distinction' Philippe Coulangeon,Julien Duval,2014-10-30 This edited collection explores the genesis of Bourdieu s classical book Distinction and its international career in contemporary Social Sciences It includes contributions from contemporary sociologists from diverse countries who question the theoretical legacy of this book in various fields and national contexts Invited authors review and exemplify current controversies concerning the theses promoted in Distinction in the sociology of culture lifestyles social classes and stratification with a specific attention dedicated to the emerging forms of cultural capital and the logics of distinction that occur in relation to material consumption or bodily practices They also empirically illustrate the theoretical contribution of Distinction in relation with such notions as field or habitus which fruitfulness is emphasized in relation with some methodological innovations of the book In this respect a special focus is put on the emerging stream of distinction studies and on the opportunities offered by the geometrical data analysis of social spaces **Violence Between Young People in Night-time Leisure Zones** Amadeu Recasens,2007 This penetrating study

of the violence associated with juvenile leisure activities combines research from six European countries Belgium France Italy Portugal Spain and the United Kingdom to gain insight into the cause of the violence and to formulate effective strategies for solving the growing problem Separate diagnoses made by the different investigative groups serve to enrich and complement each other providing a more complete image of the factors involved in conflicts occurring in these contexts as well as supplying the appropriate preventative measures This study brings a new understanding to the underlying causes of the violence and presents an eye opening look at the problems faced by today s youth culture **The Arab Revolution of 2011** Saïd Amir Arjomand,2015-03-17 Comparative analysis of the 2011 Arab Spring uprisings How do we make sense of the Arab revolution of 2011 What were its successes its failures and significance in world history The Arab Revolution of 2011 brings together a broad range of perspectives to explain the causes processes and consequences of the revolution of 2011 and its critical implications for the future The contributors in this major addition to the sociology of revolutions step back from the earlier euphoria of the Arab Spring to provide a sober analysis of what is still an ongoing process of upheaval in the Middle East The essays address the role of national armies and foreign military intervention the character and structure of

old regimes as determinants of peaceful or violent political transformation the constitutional placement of Islam in post revolutionary regimes and the possibilities of supplanting authoritarianism with democracy The revolution of 2011 is also examined within a broad historical perspective comparing the dynamics of revolution and counterrevolution in countries such as Tunisia Egypt and Libya with such epochal events as the European revolution of 1848 and Russia in 1917 **Young Business Leaders** Mette Zølner, 2009 In a world of sweeping economic political and social changes what happens to our values norms and identities In particular what happens to the identities of those actors who are exposed to the forces of globalisation How do they make sense of their personal and professional lives when they must think globally and act locally This book investigates these questions through an empirical analysis of the identities and lives of young business leaders in a France that has undergone considerable institutional changes over the last 70 years The analysis offers an original perspective by investigating a case of puzzling robustness namely the identity carried by a particular group of young business leaders Centre des jeunes dirigeants d'entreprise Since its founding in 1938 this organisation has put forward the ideal that businesses should go beyond furthering the particular interests of their owners and aspire to work for the common good of society For the individual business leader this implies a need to reconcile two objectives contributing towards making society a better place creating utopia and ensuring that his/her business is viable ensuring utility On the basis of a thorough historical and sociological analysis this book sheds light on how to understand robustness in values and identities in a world of sweeping changes Moreover it takes the reader on a fascinating journey into a sector that is largely outside the attention of both the media and scholarly literature the life worlds of young leaders of small and medium sized companies in France

Life Course, Work, and Labour in Global History Josef Ehmer, Carola Lentz, 2023-09-18 This multidisciplinary volume offers unique perspectives across the globe and throughout the centuries on the complexity of the nexus between work and the life course For industrialized regions from Germany and Western Europe to China and Japan it questions the widespread notion of an overall growing working life course instability since the 1970s For unindustrialized or industrializing regions from West Africa to state socialist East Central Europe as well as for transnational and transcontinental labour migrations it shows the enormous influence of the extended family and wider kin on individual pathways into and out of work For early modern Europe India and China and up to twentieth century state socialism and to current welfare states it stresses and concretizes the crucial impact of age and gender for both societal labour relations and individual work related decision making With all chapters based on original research the volume reflects a close cooperation between historians anthropologists and sociologists Its multidisciplinary approach finds expression in its methodological plurality reaching from archival research and sophisticated statistical analyses to biographical interviews and participant observation This mix allows to grasp the interaction between societal change and individual agency Gentrifications Marie Chabrol, Anaïs Collet, Matthieu Giroud, Lydie Launay, 2022-10-14 Offering an original discussion of the gentrification phenomenon in Europe

this book provides new theoretical insights into classical works on the subject Using a thorough analysis of the diversity of the forms places and actors of gentrification in an attempt to isolate its DNA the book addresses the place of social groups in cities their competition over the appropriation of space the infrastructure unequally offered to them by economic and political actors and the stakes of everyday social relationships **Age, Period and Cohort Effects** Andrew Bell,2020-11-05 Age Period and Cohort Effects Statistical Analysis and the Identification Problem gives a number of perspectives from top methodologists and applied researchers on the best ways to attempt to answer Age Period Cohort related questions about society Age Period Cohort APC analysis is a fundamental topic for any quantitative social scientist studying individuals over time At the same time it is also one of the most misunderstood and underestimated topics in quantitative methods As such this book is key reference material for researchers wanting to know how to deal with APC issues appropriately in their statistical modelling It deals with the identification problem caused by the co linearity of the three variables considers why some currently used methods are problematic and suggests ideas for what applied researchers interested in APC analysis should do Whilst the perspectives are varied the book provides a unified view of the subject in a reader friendly way that will be accessible to social scientists with a moderate level of quantitative understanding across the social and health sciences

Youth and Work in the Post-Industrial City of North America and Europe Laurence Roulleau-Berger,2003 In North American and European cities youth live in precarious social and economic conditions The issue of employment has become a political problem In this volume sociological economical and ethnographical perspectives are used to explain ethnic discrimination inequalities at school unemployment and marginalization Work remains a central value in young peoples lives who not only are victimized but also try to find escapes Originally in French this extended and updated book contains contributions by Enrico Pugliese Saskia Sassen Min Zhou Francois Dubet Paul Anisef Paul Axelrod Ida Susser and others

The France of the Little-Middles Marie Cartier,Isabelle Coutant,Olivier Masclet,Yasmine Siblot,2016-08-01 The Poplars housing development in suburban Paris is home to what one resident called the Little Middles a social group on the tenuous border between the working and middle classes In the 1960s The Poplars was a site of upward social mobility which fostered an egalitarian sense of community among residents This feeling of collective flourishing was challenged when some residents moved away selling their homes to a new generation of upwardly mobile neighbors from predominantly immigrant backgrounds This volume explores the strained reception of these migrants arguing that this is less a product of racism and xenophobia than of anxiety about social class and the loss of a sense of community that reigned before **Management and Diversity** Jean-Francois Chanlat,Mustafa Özbilgin,2017-10-20 International Perspectives on Equality Diversity and Inclusion examines the complex nature of equality diversity and inclusion in the world of work through interdisciplinary comparative and critical perspectives
