prescrire de règles générales de solutions toutes faites de leçons toutes prêtes le propos est d'expliquer les tenants et aboutissants des démarches communicatives interculturelles et cognitives en faveur d'un apprentissage stimulant efficace panouissant La première version de cet ouvrage a été imprimée par l'Académie Royale de Belgique et traduite en chinois D couvrez ce nouvel ouvrage de référence pour les enseignants de FLES qui reprend une approche scientifique des réflexions théoriques et des conseils pédagogiques dans une perspective humaniste o l'enseignant et l'apprenant sont au cœur des préoccupations

EXTRAIT On n'a évidemment pas attendu les professeurs les didacticiens les manuels les laboratoires et les multimédias les stages en immersion pour pratiquer les langues étrangères Les difficultés que l'on dit actuellement prouver pour apprendre et enseigner les langues font oublier que le plurilinguisme est plus ancien plus répandu somme toute plus naturel que le monolingue auquel nous ont condamnés les nations modernes avant que les relations les institutions et les firmes internationales n'obligent maintenant parler de nouveau plusieurs langues La didactique des langues maternelle ou étrangères ne cherche finalement qu'à mieux comprendre pour mieux la contrôler et mieux en profiter notre capacité d'apprendre des langues quelles que soient les circonstances En principe un adulte n'aurait pas plus besoin d'un professeur de langue étrangère qu'un bébé d'un professeur de langue maternelle L'enseignement n'est donc qu'une manière parmi d'autres d'acquiescer une langue étrangère et pas toujours la plus efficace au contraire un didacticien a dû faire remarquer de manière délicate que l'apprentissage des langues n'est un problème que lorsqu'il avait lieu en classe

PROPOS DE L'AUTEUR Jean Marc Defays est professeur de didactique du français langue étrangère et seconde à l'Université de Liège o il dirige également le Département de français de l'Institut supérieur des langues vivantes Il est aussi l'auteur de nombreux ouvrages et articles scientifiques de linguistique et de didactique

Le français et les langues historiques de la France se propose d'examiner dans une première partie la naissance puis l'évolution de la langue française ainsi que son implantation et sa place actuelles dans le monde afin de mieux saisir toutes les implications de son statut officiel de langue de la République. La seconde partie sera consacrée aux langues historiques de la France alsacien almanique et francique basque breton catalan corse flamand francique franco-provençal occitan langues d'oïl bourguignon champenois franc-comtois lorrain gallo normand picard poitevin saintongeais parlers du Morvan wallon et créoles bas-français qui sont aujourd'hui reconnues comme langues de France bien qu'elles aient longtemps été méprisées et combattues. La politique du Conseil de l'Europe et celle du Parlement européen leur sont favorables mais la France qui n'a toujours pas ratifié la Charte européenne des langues régionales ou minoritaires fait preuve de frilosité leur gardant. L'analyse des multiples aspects de la situation linguistique actuelle de la France permettra au lecteur de se faire une idée précise de la richesse et de la valeur du patrimoine culturel du pays et le cas échéant de réviser certains a priori.

Nation-building and Identities in Post-Soviet Societies Andrea Friedli, Aline Gohard-Radenkovic, François Ruegg, 2017 Research by social scientists on multicultural and multilingual post-Soviet societies is manifold. However, there rarely exists a dialogue between academic fields, traditions, and ideologies. This book critically reunites different academic generations and traditions, different disciplines, and different geographical and cultural backgrounds by keeping the plurality of the approaches. The contributions discuss the roles of ideologies, education, and ethnic, linguistic, and religious identities in the post-Soviet nation-building processes. The included case studies show continuities and discontinuities in the ideological and political aspects of nation-building and identity management in post-Soviet societies. Series: Freiburg Studies in Social Anthropology, Freiburger Sozialanthropologische Studien, Vol. 47. Subject: Social Anthropology, Sociology, Politics, Soviet Union.

Multilingualism and Education Gail Prasad, Nathalie Auger, Emmanuelle Le Pichon Vorstman, 2022-06-09 Researchers working at the intersections of language and education reflect on how their life experiences have informed their research.

Teaching Culture in Introductory Foreign Language Textbooks Carol A. Chapelle, 2016-07-30 This book demonstrates how foreign language textbook analysis can inform future materials development to improve foreign language teaching. Through chronological analysis of French textbooks in the United States, this book explores the representations of Canada and Quebec in French beginner textbooks produced from 1960 to 2010. Chapelle couples a large collection of 65 textbooks with a social semiotic qualitative analysis of the genres, language, and images that communicate Quebec's cultural narrative to learners. Findings about the amount and type of content are presented by decade to track the trends in foreign language teaching and changes in Quebec's representation. Particular attention is given to how language politics is presented to students through text and images. This book will be of interest to scholars of Canadian Studies, Quebec Studies, and Second Language Acquisition, as well

as foreign language materials developers Training Foreign and Second Language Teachers Carmen Avram, Pierre Larrivée, 2016-06-22 This book provides a comparative perspective on foreign language teacher training in France Germany Russia Ukraine and Uzbekistan The training process of state secondary school foreign language teachers is considered from two perspectives for each country The current training routes through which necessary teaching qualifications are obtained are described with respect to national policy for foreign language learning the nature of providers and training programme organization and contents with details of any practice These descriptive dimensions are accompanied by an evaluation of the degree to which the training fits the purpose of teaching foreign languages in state secondary schools The descriptive and evaluative approaches to FL teacher training provide a novel overview of the current successes and challenges in the field giving an understanding of terrains not easily accessible to the general English language readership The book highlights elements of good practice found across nations and contributes to shedding light on the enduring mystery of why certain nations seem to be managing multilingualism better than others As such it provides a reference for interdisciplinary discussions between applied linguists education researchers and practitioners and policymakers
