## Le Metro:

*All Poets Welcome* Daniel Kane, 2003-03-26 This landmark book together with its accompanying CD captures the heady excitement of the vibrant irreverent poetry scene of New York's Lower East Side in the 1960s Drawing from personal interviews with many of the participants from unpublished letters and from rare sound recordings Daniel Kane brings together for the first time the people political events and poetic roots that coalesced into a highly influential community From the poetry reading venues of the early sixties such as those at the Les Deux M gots and Le Metro coffeehouses to The Poetry Project at St Mark's Church a vital forum for poets to this day Kane traces the history of this literary renaissance showing how it was born from a culture of publicly performed poetry The Lower East Side in the sixties proved foundational in American verse culture a defining era for the artistic and political avant garde The voices and works of John Ashbery Amiri Baraka Charles Bernstein Bill Berkson Ted Berrigan Kenneth Koch Bernadette Mayer Ron Padgett Denise Levertov Paul Blackburn Frank O'Hara and many others enliven these pages and the thirty five track CD includes recordings of several of the poets reading from their work in the sixties and seventies The Lower East Side's cafes coffeehouses and salons brought together poets of various aesthetic sensibilities including writers associated with the so called New York School Beats Black Mountain Deep Image San Francisco Renaissance Umbra and others Kane shows that the significance for literary history of this loosely defined community of poets and artists lies in part in its reclaiming an orally centered poetic tradition adapted specifically to open up the possibilities for an aesthetically daring playful poetics and a politics of joy and resistance

*Underground Cities* Mark Ovenden, 2019-10-22 With over 60 per cent of the world's population living in cities the networks beneath our feet which keep the cities above moving are more important than ever before Yet we never truly see how these amazing feats of engineering work Just how deep do the tunnels go Where do the sewers bunkers and postal trains run And how many tunnels are there under our streets Each featured city presents a skyline of the underground through specially commissioned cut away illustrations and unique cartography Drawing on geography cartography and historical oddities Mark Ovenden explores what our cities look like from the bottom up      Millennials in America 2017 Robert L. Scardamalia, 2017-10-06 This publication provides a wide range of characteristics profiling the demographic social and economic status of the Millennial generation While the Baby Boom generation occupies much of our social and political dialogue the Millennial generation is actually a larger generation As the Boomers age their numbers will decrease while the Millennials will be the driving social and political force in the coming decades *Millennials in America* focuses on the those born between 1982-2001 *Millennials in America* is an invaluable source for helping people understand what the census data tells us about who we are what we do and where we live Benefits of this publication include It will fill an information gap due to the difficulty in extracting comparative data from the Census Bureau's American FactFinder dissemination system Users

will have comparative data in a single reference volume It will eliminate the need for the data user to understand and manipulate detailed census data files and consolidate disparate tables in AFF This publication utilizes the PUMS data which is the ONLY source of data that can be used to define precise age ranges for the Millennial generation The age detail available for census summary data simply aren t adequate for defining the Millennials and therefore prohibit compilation of characteristics specific to this important generation Features of this publication include Detailed data on 11 subject areas including race educational attainment field of study income mobility status employment status housing and more Each subject area includes data for the United States the 50 states and the District of Columbia 622 counties 331 cities 381 metropolitan areas and 34 micropolitan areas Each part is preceded by highlights maps and figures illustrating how areas diverge from the national norm as well as differences among areas Morgantina Studies, Volume III Ninina Cuomo di Caprio, 2014-07-14

The kilns at Morgantina site of the well known excavations in central Sicily are an outstanding example of multiple potters workshops in use during the late Hellenistic period In fully documenting these ten kilns excavated between 1955 and 1963 Ninina Cuomo di Caprio offers both a representative cross section of the physical setting of ceramic production in this ancient Greek city and evidence for its daily industrial activity She includes detailed plans and section drawings of each kiln and formulates hypotheses on its operation in light of modern thermodynamics The text which is in Italian is preceded by an English language summary Cuomo di Caprio s archaeological study of the kiln structures and their ceramic products is supplemented by such diagnostic tools as thermoluminescence analysis neutron activation analysis X ray diffraction and optical examination by polarizing microscope Opening an entirely new window into the everyday working practices of the Morgantina potters this study demonstrates that they operated at a very sophisticated level selecting and purifying specific clays and adding certain materials to manipulate their working and firing characteristics Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Urban Transportation Abstracts** ,1982 The History of the Rights of Princes in the
