Le Musa E Darchitecture:

The Architecture of the French Enlightenment Allan Braham, 1989-01-01 Allan Braham's comprehensive treatment of this brilliant and complex period introduces the reader to the major buildings, architects and architectural patrons of the day. At the same time it explores the broader determinants of architectural production: the rapid economic expansion of Paris and the main provincial centers and the increasing demand for improved public amenities: theaters, schools, markets and hospitals. This generously illustrated book provides a vivid commentary on society and manners in pre-Revolutionary France.

The Museum of French Monuments 1795-1816 Alexandra Stara, 2013 The first volume in two centuries on Alexandre Lenoir's Museum of French Monuments in Paris, this study presents a comprehensive picture of a seminal project of French Revolutionary cultural policy, one crucial to the development of the modern museum institution. The book offers a new critical perspective of the Museum's importance and continuing relevance to the history of material culture and collecting through juxtaposition with its main opponent, the respected connoisseur and theorist Quatremere de Quincy. This innovative approach highlights the cultural and intellectual context of the debate, situating it in the dilemmas of emerging modernity: the idea of nationhood and changing attitudes to art and its histories. Open only from 1795 to 1816, the Museum of French Monuments was at once popular and controversial. The salvaged sculptures and architectural fragments that formed its collection presented the first chronological panorama of French art which drew the public; it also drew the ire of critics who saw the Museum as an offense against the monuments' artistic integrity. Underlying this localized conflict were emerging ideas about the nature of art and its relationship to history which still define our understanding of notions of heritage, monument and the museum.

Charles Robert Cockerell, Architect in Time Anne Bordeleau, 2016-04-15 Speed, acceleration and rapid change characterize our world and as we design and construct buildings that are to last at least a few decades and sometimes even centuries, how can architecture continue to act as an important cultural signifier? Focusing on how an important nineteenth-century architect addressed the already shifting relation between architecture, time and history, this book offers insights on issues still relevant today: the struggle between imitation and innovation; the definition or rejection of aesthetic experience; the grounds of architectural judgment: who decides and how or, fundamentally, how to act, i.e. build, when there is no longer a single grand narrative but a plurality of possible histories. Six drawings provide the foundation of an itinerary through Charles Robert Cockerell's conception of architecture and into the depths of drawings and buildings. Born in England in 1788, Cockerell sketched as a Grand Tourist; he charted architectural history as Royal Academy Professor; he drew to build, to exhibit, to understand the past and to learn from it, publishing his last work in 1860, three years before his death. Under our scrutiny, his drawings become thresholds into the nineteenth century, windows into the architect's conception of architecture and time, complex documents of past and projected constructions, great examples that reveal a kinetic approach to ornamentation and the depth of architectural representation.

The Art of Architecture Exhibitions Jean-Louis Cohen, 2001

Features a selection of exhibitions held at the Nederlands Architectuurinstituut Précis of the Lectures on Architecture
Jean-Nicolas-Louis Durand, 2000-01-01 Jean Nicolas Louis Durand 1760 1834 regarded the Précis of the Lectures on
Architecture 1802 5 and its companion volume the Graphic Portion 1821 as both a basic course for future civil engineers and
a treatise Focusing the practice of architecture on utilitarian and economic values he assailed the rationale behind classical
architectural training beauty proportionality and symbolism His formal systematization of plans elevations and sections
transformed architectural design into a selective modular typology in which symmetry and simple geometrical forms
prevailed His emphasis on pragmatic values to the exclusion of metaphysical concerns represented architecture as a closed
system that subjected its own formal language to logical processes Now published in English for the first time the Précis and
the Graphic Portion are classics of architectural education *Masterworks from the Musée Des Beaux-arts, Lille* Musée des
Beaux Arts (Lille, France), 1992 **Quatremère de Quincy** David Gilks, 2024-05-31 Antoine Chrysosth me Quatrem re de
Quincy 1755 1849 was the most distinguished writer on art and architecture at the end of the enlightenment However as
David Gilks shows in Quatrem re de Quincy Art and Politics during the French Revolution he was never simply an esoteric
antiquarian and theoretician he was also a zealous functionary and skilled publicist whose writings on the arts often served
political purposes Quatrem re de Quincy Art and Politics during the French Revolution demonstrates how Quatrem re s early
writings on art and antiquity formed the foundation for a politics grounded in faith authority and hierarchy that favoured
gradual social and political evolution over destruction and experimentation Gilks then traces how Quatrem re set aside his
antiquarian research and became a royalist politician and publicist during the revolutionary decade Quatrem re feared that
the Revolution would destroy the cosmopolitan republic of letters that had flourished when states across Europe supported
the papacy s rediscovery of the past restoration of taste and revival of learning Yet Gilks reveals that Quatrem re was also a
resourceful and an opportunistic political actor who deployed his opponents language for strategic reasons Gilks therefore
reinterprets Quatrem re s interventions by situating them in their polemical contexts and treating them as contributions to
debates and quarrels by locating his sources and reconstructing his social and political networks The resulting study revises
our understanding of Quatrem re s famous reflections on the Academy of Painting and Sculpture the Panth on art plunder
and museums but it also discovers and sheds light on previously ignored writings Although the study focuses on the period
1789 1799 it examines the second half of Quatrem re s life to substantiate his commitment to crown and altar and show how
he fought against the Revolution s legacy of godless materialism and calculation that was inimical to the arts This is a
thoroughly researched and richly detailed contextual study of the most eventful period in Quatrem re s life but it also offers
an original and unfamiliar history of the French Revolution Gilks integrates the study of political power with the history of
ideas and art history and provides a window into institutional and legal reforms and debates about cultural patronage and
education **The Architecture of Percier and Fontaine and the Struggle for Sovereignty in Revolutionary France**

Iris Moon, 2016-11-25 As the official architects of Napoleon Charles Percier 1764 1838 and Pierre François L'Onard Fontaine 1762 1853 designed interiors that responded to the radical ideologies and collective forms of destruction that took place during the French Revolution The architects visualized new forms of imperial sovereignty by inverting the symbols of monarchy and revolution constructing meeting rooms resembling military encampments and gilded thrones that replaced the Bourbon lily with Napoleonic bees Yet in the wake of political struggle each foundation stone that the architects laid for the new imperial regime was accompanied by an awareness of the contingent nature of sovereign power Contributing fresh perspectives on the architecture decorative arts and visual culture of revolutionary France this book explores how Percier and Fontaine's desire to build structures of permanence and their inadvertent reliance upon temporary architectural forms shaped a new awareness of time memory and modern political identity in France *The Abbé Grégoire and his World* R.H.
