Laws And Explanation In History:

Laws and Explanation in History William H. Dray, 1957 This book challenges the popular view that the logical structure of explanation in history can in every case be elucidated in terms of subsumption under covering law It argues that departures from this logical model in ordinary historical writing cannot satisfactorily be explained away as incomplete or defective cases and it endeavours to show how the attempt to do this may lead philosophers to read into explanations offered by historians more than is really intended while at the same time important features of what is intended are missed In a series of independent but converging arguments some problems raised by the uniqueness of historical events the rationality of human actions and the logical grammar of casual language are discussed in this connexion and the pragmatic dimension of explanation is also explored Publisher **Laws and Explanation in History** William H. Dray, 1979 Laws and Explanation in History William Dray, 2013 Laws and **Explanation in History** ,1964 *Knowledge and Explanation in History* Ronald F. Atkinson, 1978-11-30 **Laws And Explanation In The Social Sciences** Lee C Mcintyre, 2018-10-08 The first full length defense of social scientific laws to appear in the last twenty years this book upholds the prospect of the nomological explanation of human behavior against those who maintain that this approach is impossible impractical or irrelevant By pursuing an analogy with the natural sciences McIntyre shows that the barriers to nomological inquiry within the social sciences are not generated by factors unique to social inquiry but arise from a largely common set of problems that face any scientific endeavor All of the most widely supported arguments against social scientific laws have failed largely due to adherence to a highly idealized conception of nomologicality allegedly drawn from the natural sciences themselves and the limited doctrine of descriptivism Basing his arguments upon a more realistic view of scientific theorizing that emphasizes the pivotal role of redescription in aiding the search for scientific laws McIntyre is optimistic about attaining useful law like explanations of human behavior

Laws and Explanation in History Dray, William H. Dray,1970 Logic of Historical Explanation Clayton Roberts,2010-11-01 Methodology of History Y. Topolski,2012-12-06 No discipline has been more praised or more criticized than the writing of history Cioero claimed that history teaches men how to live Aris totle denied it the very name of science and regwded poetry as the higher wisdom At various times history has been assigned a command ing or a demeaning statIUs in the hierarchy of sciences Today one can admire the increasing precision and sophistication of the methods used by historian so On the other hand Thucydides History of the PeZo ponesian War still serves as the ideal model of how to reconstruct the historical past Even those who deny the possibility of an objective reconstruction of the past would themselves likie to be recorded by historians objectively or not Dislike of history and fear of its verdict are not incompatible with reverence and awe for its practitioners the historians So man s attitude to history is ambiguous The controversy about history continues Widely differing issues are at stake Historians themselves however are the least engaged in the struggle

Rarely does a historian decide to open the door of his study and join in the melee about the meaning of history More often he slams it shut and returns to his studies oblivious of the fact that with the passage of thne the gap between his scientific work and its audience might widen The historian does not shun the battle he merely chooses his own battleground

International Handbook of Research in History, Philosophy and Science Teaching Michael R. Matthews, 2014-07-03 This inaugural handbook documents the distinctive research field that utilizes history and philosophy in investigation of theoretical curricular and pedagogical issues in the teaching of science and mathematics It is contributed to by 130 researchers from 30 countries it provides a logically structured fully referenced guide to the ways in which science and mathematics education is informed by the history and philosophy of these disciplines as well as by the philosophy of education more generally. The first handbook to cover the field it lays down a much needed marker of progress to date and provides a platform for informed and coherent future analysis and research of the subject The publication comes at a time of heightened worldwide concern over the standard of science and mathematics education attended by fierce debate over how best to reform curricula and enliven student engagement in the subjects There is a growing recognition among educators and policy makers that the learning of science must dovetail with learning about science this handbook is uniquely positioned as a locus for the discussion The handbook features sections on pedagogical theoretical national and biographical research setting the literature of each tradition in its historical context It reminds readers at a crucial juncture that there has been a long and rich tradition of historical and philosophical engagements with science and mathematics teaching and that lessons can be learnt from these engagements for the resolution of current theoretical curricular and pedagogical questions that face teachers and administrators Science educators will be grateful for this unique encyclopaedic handbook Gerald Holton Physics Department Harvard University This handbook gathers the fruits of over thirty years research by a growing international and cosmopolitan community Fabio Bevilacqua Physics Department University of Pavia on History Marnie Hughes-Warrington, 2007-10-31 Fifty Key Thinkers on History is a superb guide to historiography through the ages The cross section of debates and thinkers covered is unique in its breadth taking in figures from ancient China Greece and Rome through the Middle Ages to contemporary Europe America Africa and Australia from Bede to Braudel Marx to Michelet Ranke to Rowbotham Foucault to Fukuyama Each clear and concise essay offers biographical information a summary and discussion of the subjects approach to history and how others have engaged with it a list of their major works and a guide to diverse resources for further study including books articles films and websites Philosophy and Practice in Writing a History of Ancient Israel Megan Bishop Moore, 2009-07-01 An examination of current methodologies for writing Israel s history **Cognitive and Instructional Processes in History and the Social Sciences** Mario Carretero, James F. Modality and Explanatory Reasoning Boris Kment,2014-09-18 Since the ground breaking work of Saul Kripke David Lewis and others in the 1960s and 70s one dominant interest of analytic philosophers has been in modal truths which concerns the questions of what is possible and what is necessary However there is considerable controversy over the source and nature of necessity In Modality and Explanatory Reasoning Boris Kment takes a novel approach to the study of modality that places special emphasis on understanding the origin of modal notions in everyday thought Kment argues that the concepts of necessity and possibility originate in a common type of thought experiment counterfactual reasoning that allows

us to investigate explanatory connections This procedure is closely related to the controlled experiments of empirical science Necessity is defined in terms of causation and other forms of explanation such as grounding the relation that connects metaphysically fundamental facts to non fundamental ones Therefore contrary to a widespread view explanation is more fundamental than modality The study of modal facts is important for philosophy not because these facts are of much metaphysical interest in their own right but because they provide evidence about explanatory relationships In the course of developing this position the book offers new accounts of possible worlds counterfactual conditionals essential truths and their role in grounding and a novel theory of how counterfactuals relate to causation and explanation
