Lay Morals (annotated) Robert Louis Stevenson,2015-10-03 The problem of education is twofold first to know and then to utter Every one who lives any semblance of an inner life thinks more nobly and profoundly than he speaks and the best of teachers can impart only broken images of the truth which they perceive Speech which goes from one to another between two natures and what is worse between two experiences is doubly relative **Lay Morals, and Other Papers** Robert Louis ROBERT LOUIS STEVENSON,2020-08-29 ROBERT LOUIS STEVENSON *Medieval Monasticisms* Steven

Vanderputten,2020-03-23 From the deserts of Egypt to the emergence of the great monastic orders the story of late antique and medieval monasticism in the West used to be straightforward But today we see the story as far messier less linear less unified and more historicized In the first part of this book the reader is introduced to the astonishing variety of forms and experiences of the monastic life their continuous transformation and their embedding in physical socio economic and even personal settings The second part surveys and discusses the extensive international scholarship on which the first part is built The third part a research tool rounds off the volume with a carefully representative bibliography of literature and primary sources

Huff,Martha Stoddard Holmes,2023-05-17 The long 19th century stretching from the start of the American Revolution in 1776 to the end of World War I in 1918 was a pivotal period in the history of disability for the Western world and the cultures under its

imperial sway Industrialization was a major factor in the changing landscape of disability providing new adaptive technologies and means of access while simultaneously contributing to the creation of a mass produced environment hostile to bodies and minds that did not adhere to emerging norms In defining disability medical views which framed disabilities as problems to be solved competed with discourses from such diverse realms as religion entertainment education and literature Disabled writers and activists generated important counternarratives made increasingly available through the spread of print culture An essential resource for researchers scholars and students of history literature culture and education A Cultural History of Disability in the Long Nineteenth Century includes chapters on atypical bodies mobility impairment chronic pain and illness blindness deafness speech dysfluencies learning difficulties and mental health with 37 illustrations drawn from period sources

Invalidism and Identity in Nineteenth-Century Britain Maria H. Frawley, 2010-11-15 Nineteenth century Britain did not invent chronic illness but its social climate allowed hundreds of men and women from intellectuals to factory workers to assume the identity of invalid Whether they suffered from a temporary condition or an incurable disease many wrote about their experiences leaving behind an astonishingly rich and varied record of disability in Victorian Britain Using an array of primary sources Maria Frawley here constructs a cultural history of invalidism She describes the ways that Evangelicalism industrialization and changing patterns of doctor patient relationships all converged to allow a culture of invalidism to flourish and explores what it meant for a person to be designated or to deem oneself an invalid Highlighting how different types of invalids developed distinct rhetorical strategies her absorbing account reveals that contrary to popular belief many of the period s most prominent and prolific invalids were men while many women found invalidism an unexpected opportunity for authority In uncovering the wide range of cultural and social responses to notions of incapacity Frawley sheds light on our own historical moment similarly fraught with equally complicated attitudes toward mental and physical disorder

Dossena, Stefano Rosso, 2016-06-22 Distinctive in its markedly interdisciplinary approach, this book presents studies dealing with literary, cultural, and linguistic history both in Europe and in the US, bringing together scholars from different fields while highlighting features that are shared among their contributions. It offers new insights into phenomena which have generally been underinvestigated, such as the role played by popular culture, music, and the arts in the circulation of information in the construction of popular taste and even in scientific popularisation on both sides of the Atlantic. As for the choice to focus on the nineteenth century, this is dictated by the fact that in those decades, for the first time in history, scientific, technological, and social developments accelerated simultaneously. It is therefore important to see how such new knowledge was circulated among an ever-growing audience by means of different genres and text types, bearing in mind that divisions between the literary and non-literary were hardly as sharp as they are today. The book presents contributions by Robert Louis, Abrahamson, Nicholas Brownlee, Bruno Cartosio, Sonia Di Loreto, Aileen Dillane, Marina Dossena, Kirsten Lawson, Angela Locatelli, William H. Mulligan Jr., Stefano Rosso, and Polina Shvanyukova. **Lay Morals** Robert Louis

Stevenson, 2021-04-15 **Religion and Secularism in France Today** Philippe Portier, Jean-Paul Willaime, 2022-05-02 This volume explores the dynamic life of religion and politics in France. The separation of church and state and the autonomy of school education from religion are the two fundamental pillars of France as a secular republic. The historical construction of French secularism, *laïcité*, was particularly marked by the strong opposition between the state and the Catholic Church. However, the religious disaffiliation of a significant proportion of the French strengthened state secularism, which gradually became more consensual despite some persisting tensions in the school context. Yet in the last decades, several factors have revived public debate on laicity: the quarrel over sects and new religious movements, controversies over Islam (today the second largest religion in France), and more recently, dispute over bioethics. Faced with these challenges, laicity, as well as the religious groups involved, have been changing. The authors of this book, ranking amongst the best French experts in the study of religion and secularism, introduce the reader to a living and lived laicity influenced by the social and religious dynamics of contemporary France. They demonstrate that the configurations of French secularism are both more flexible and complex than they appear to be. The volume investigates the extent to which the French idea of secularization has been pushed to be more thorough and radical in its interaction with its other European counterparts. A key work on French political thought, this volume will be of great interest to scholars and researchers of international politics, political philosophy, political sociology, and religion and politics. *Bulletin of the Brooklyn Public Library* Brooklyn Public Library, 1911 **History of the**

Punishment and Penance Thomas Brian

Deutscher, 2013-01-01 Deutscher examines the records of the bishop's tribunal of the northern Italian diocese of Novara during two distinct periods: the ambitious decades following the Council of Trent 1563-1615 and the half century leading up to the French invasions of 1790s. As the state's power continued to rise during this second time span, the Church was often humbled and the tribunal's activity was much reduced.
