Imagining Wild America:

Imagining Wild America John R. Knott, 2009-04-03 At a time when the idea of wilderness is being challenged by both politicians and intellectuals *Imagining Wild America* examines writing about wilderness and wildness and makes a case for its continuing value The book focuses on works by John James Audubon Henry David Thoreau John Muir Edward Abbey Wendell Berry and Mary Oliver as each writer illustrates different stages and dimensions of the American fascination with wild nature John Knott traces the emergence of a visionary tradition that embraces values consciously understood to be ahistorical showing that these writers while recognizing the claims of history and the interdependence of nature and culture also understand and attempt to represent wild nature as something different other A contribution to the growing literature of eco criticism the book is a response to and critique of recent arguments about the constructed nature of wilderness *Imagining Wild America* demonstrates the richness and continuing importance of the idea of wilderness and its attraction for American writers John R Knott is Professor of English University of Michigan His previous books include *The Huron River Voices from the Watershed* coedited with Keith Taylor *Making Nature Whole* William R. Jordan, George M. Lubick, 2011-07-26 *Making Nature Whole* is a seminal volume that presents an in depth history of the field of ecological restoration as it has developed in the United States over the last three decades The authors draw from both published and unpublished sources including archival materials and oral histories from early practitioners to explore the development of the field and its importance to environmental management as well as to the larger environmental movement and our understanding of the world Considering antecedents as varied as monastic gardens the Scientific Revolution and the emerging nature awareness of nineteenth century Romantics and Transcendentalists Jordan and Lubick offer unique insight into the field s philosophical and theoretical underpinnings They examine specifically the more recent history including the story of those who first attempted to recreate natural ecosystems early in the 20th century as well as those who over the past few decades have realized the value of this approach not only as a critical element in conservation but also as a context for negotiating the ever changing relationship between humans and the natural environment *Making Nature Whole* is a landmark contribution providing context and history regarding a distinctive form of land management and giving readers a fascinating overview of the development of the field It is essential reading for anyone interested in understanding where ecological restoration came from or where it might be going *Reimagining Environmental History* Christian Knoeller, 2017-10-11 Christian Knoeller presents a radical reinterpretation of environmental history set in the heartland of America In an excellent model of narrative based scholarship this book dynamically reimagines American environmentalism across generations of writers artists and scientists Knoeller starts out with Audubon and cites Thoreau s journals in the 1850s as he assesses an early 17th century account of New England s natural resources by William Wood showing the epic decline in game and bird populations in Concord This reading of environmental history is replicated throughout with a gallery of novelists poets essayists and other

commentators as they explore ecological memory and environmental destruction In apt discussions of Matthiessen Lopez Wendell Berry William Stafford and many others Knoeller offers vibrant insights into literary history He also cites his own memoir of perpetual development on his family s farm in Indiana enriching the scholarship and making an urgent plea for the healing aesthetics of the imagination Reading across centuries and genres Knoeller gives us a vibrant new appraisal of Midwestern North American interior literary traditions and makes clear how vital environmental writing is to this region To date no one has written such an eloquent and comprehensive cross genre analysis of Midwestern environmental literature

Imagining Native America in Music Michael V Pisani, 2008-10-01 This book offers a comprehensive look at musical representations of native America from the pre colonial past through the American West and up to the present The discussion covers a wide range of topics from the ballets of Lully in the court of Louis XIV to popular ballads of the nineteenth century from eighteenth century British American theater to the musical theater of Irving Berlin from chamber music by Dvořák to film music for Apaches in Hollywood Westerns Michael Pisani demonstrates how European colonists and their descendants were fascinated by the idea of race and ethnicity in music and he examines how music contributed to the complex process of cultural mediation Pisani reveals how certain themes and metaphors changed over the centuries and shows how much of this Indian music which was and continues to be largely imagined alternately idealized and vilified the peoples of native America

Early American Nature Writers Daniel Patterson, 2007-11-30 At a time when the environment is of growing concern to students and general readers nature writing is especially meaningful This book profiles the literary careers of 52 early American nature writers such as John James Audubon Ralph Waldo Emerson Caroline Stansbury Kirkland Thomas Jefferson Henry David Thoreau and Mabel Osgood Wright Each entry is written by an expert contributor and discusses the writer s life and works Entries close with primary and secondary bibliographies and the encyclopedia ends with suggestions for further reading Global warming pollution and other issues have made the environment a topic of constant discussion these days Many environmental concerns were treated by early American nature writers who recognized the beauty of the natural world in an age of commercial expansion Some of the most famous writers of the 18th and 19th centuries wrote about nature and their works are stylistic masterpieces At a time when students are being encouraged to read and write about nonfiction these masterworks of early American nature writing are all the more important This book gives students and general readers a welcome introduction to early American nature writers

Imagining 'America' in late Nineteenth Century Spain Kate Ferris, 2016-06-10 This book examines the processes of production circulation and reception of images of America in late nineteenth century Spain When late nineteenth century Spaniards looked at the United States they like Tocqueville saw more than America What did they see Between the glorious liberal revolution of 1868 and the run up to the 1898 war with the US that would end Spain's New World empire Spanish liberal and democratic reformers imagined the USA as a place where they could preview the modern way of life as a political and social model or anti model to emulate appropriate or reject and above all as a 100 year experiment of republicanism democracy and liberty in practice Through their writings and discussions of the USA these Spaniards debated and constructed their own modernity and imagined the place of their nation in the modern world

Eco-man Mark Christopher Allister, 2004 Many canonical literary works look to the wild as the site for establishing a man's selfhood But nature is just as often subjected to his most violent displays of mastery This tension lies at the heart of *Eco Man* which brings together two rapidly growing fields men's studies and ecocriticism **Imagining Latin America** Nicola Jones, 2021 A new and innovative approach to Latin American Studies which makes an important contribution to contemporary debates about cultural appropriation and the integration of immigrant communities The Idea of Nature in Disney Animation David Whitley, 2016-03-03 In the second edition of *The Idea of Nature in Disney Animation* David Whitley updates his 2008 book to reflect recent developments in Disney and Disney Pixar animation such as the apocalyptic tale of earth's failed ecosystem WALL E As Whitley has shown and Disney's newest films continue to demonstrate the messages animated films convey about the natural world are of crucial importance to their child viewers Beginning with *Snow White* Whitley examines a wide range of Disney's feature animations in which images of wild nature are central to the narrative He challenges the notion that the sentimentality of the Disney aesthetic an oft criticized aspect of such films as *Bambi* *The Jungle Book* *Pocahontas* *Beauty and the Beast* and *Finding Nemo* necessarily prevents audiences from developing a critical awareness of contested environmental issues On the contrary even as the films communicate the central ideologies of the

times in which they were produced they also express the ambiguities and tensions that underlie these dominant values In distinguishing among the effects produced by each film and revealing the diverse ways in which images of nature are mediated Whitley urges us towards a more complex interpretation of the classic Disney canon and makes an important contribution to our understanding of the role popular art plays in shaping the emotions and ideas that are central to contemporary experience

Civilizing Thoreau Richard J. Schneider, 2016 7 Nature and the Origins of American Civilization in Cape Cod Part IV America's Destiny and Ecological Succession 8 Thoreau and Manifest Destiny Works Cited Index

American Curiosity Susan Scott Parrish, 2012-12-01 Colonial America presented a new world of natural curiosities for settlers as well as the London based scientific community In American Curiosity Susan Scott Parrish examines how various peoples in the British colonies understood and represented the natural world around them from the late sixteenth century through the eighteenth Parrish shows how scientific knowledge about America rather than flowing strictly from metropole to colony emerged from a horizontal exchange of information across the Atlantic Delving into an understudied archive of letters Parrish uncovers early descriptions of American natural phenomena as well as clues to how people in the colonies construed their own identities through the natural world Although hierarchies of gender class institutional learning place of birth or residence and race persisted within the natural history community the contributions of any participant were considered valuable as long as they supplied novel data or specimens from the American side of the Atlantic Thus Anglo American nonelites women Indians and enslaved Africans all played crucial roles in gathering and relaying new information to Europe Recognizing a significant tradition of nature writing and representation in North America well before the Transcendentalists American Curiosity also enlarges our notions of the scientific Enlightenment by looking beyond European centers to find a socially inclusive American base to a true transatlantic expansion of knowledge

The Pluralist Imagination from East to West in American Literature Julianne Newmark, 2014 The first three decades of the twentieth century saw the largest period of immigration in U S history This immigration however was accompanied by legal segregation racial exclusionism and questions of residents national loyalty and commitment to a shared set of American beliefs and identity The faulty premise that homogeneity as the symbol of the melting pot was the mark of a strong nation underlined nativist beliefs while undercutting the rich diversity of cultures and lifeways of the population Though many authors of the time have been viewed through this nativist lens several texts do indeed contain an array of pluralist themes of society and culture that contradict nativist orientations In The Pluralist Imagination from East to West in American Literature Julianne Newmark brings urban northeastern western southwestern and Native American literature into debates about pluralism and national belonging and thereby uncovers new concepts of American identity based on sociohistorical environments Newmark explores themes of plurality and place as a reaction to nativism in the writings of Louis Adamic Konrad Bercovici Abraham Cahan Willa Cather Paul Laurence Dunbar Charles Alexander Eastman James Weldon Johnson D

H Lawrence Mabel Dodge Luhan and Zitkala a among others This exploration of the connection between concepts of place and pluralist communities reveals how mutual experiences of place can offer more constructive forms of community than just discussions of nationalism belonging and borders *Imagining the Plains of Latin America* Axel Pérez Trujillo Diniz,2021-04-22 From the Pampas lowlands of Argentina Uruguay and Brazil to the Altiplano plateau that stretches between Chile and Peru the plains of Latin America have haunted the literature and culture of the continent Bringing these landscapes into focus as a major subject of Latin American culture this book outlines innovative new ecocritical readings of canonical literary texts from the 19th century to the present Tracing these natural landscapes across national borders the book develops a new transnational understanding of Hispanic culture in South America and expands the scope of the contemporary environmental humanities Texts covered include works by Ciro Alegr a Manoel de Barros Ezequiel Mart nez Estrada R mulo Gallegos Jos Eustasio Rivera Jo o Guimar es Rosa and Domingo Sarmiento **Nabokov, Rushdie, and the Transnational Imagination** R. Trousdale,2013-07-31 Using Vladimir Nabokov and Salman Rushdie s work this study argues that transnational fiction refuses the simple oppositions of postcolonial theory and suggests the possibility of an inclusive global literature **Imagining America** Alan M. Ball,2004-09-09 In *Imagining America* historian Alan M Ball explores American influence in two newborn Russian states the young Soviet Union and the modern Russian Republic Ball deftly illustrates how in each era Russians have approached the United States with a conflicting mix of ideas as a land to admire from afar to shun at all costs to emulate as quickly as possible or to surpass on the way to a superior society Drawing on a wide variety of sources including contemporary journals newspapers films and popular songs Ball traces the shifting Russian perceptions of American cultural social and political life As he clearly demonstrates throughout their history Russian imaginations featured a United States that political figures and intellectuals might embrace exploit or attack but could not ignore *Our Common Dwelling* Lance Newman,2005-05-12 *OurCommonDwelling* explores why America s first literary circle turned to nature in the 1830s and 40s When the New England Transcendentalists spiritualized nature they were reacting to intense class conflict in the region s industrializing cities Their goal was to find a secular foundation for their social authority as an intellectual elite New England Transcendentalism engages with works by William Wordsworth Henry David Thoreau Ralph Waldo Emerson Margaret Fuller Nathaniel Hawthorne and others The works of these great authors interpreted in historical context show that both environmental exploitation and conscious love of nature co evolved as part of the historical development of American capitalism *Representing and Imagining America* Philip John Davies,2019-06-01 The international authors of this book open a range of windows on our study of the USA **North America's Indian Trade in European Commerce and Imagination, 1580-1850** George Colpitts,2013-11-29 In *North America s Indian Trade in European Commerce and Imagination* Colpitts offers new perspectives on Europe s contact with America by examining the ideas debates and questions arising in the trading that linked newcomers with Native people European capitalization of the

Indian Trade beginning in the 16th century forced newcomers to confront the meaning and legitimacy of traditional gift economies and assess the vice and virtue of the commerce they pursued in the New World Making use of French and English colonization texts published narratives and state colonial papers the author explores how European capital investments credit profits and commercial linkages elaborated and complicated understandings of North American people in the period of colonization

Imagining Extinction Ursula K. Heise, 2016-08-10 We are currently facing the sixth mass extinction of species in the history of life on Earth biologists claim the first one caused by humans Activists filmmakers writers and artists are seeking to bring the crisis to the public's attention through stories and images that use the strategies of elegy tragedy epic and even comedy *Imagining Extinction* is the first book to examine the cultural frameworks shaping these narratives and images Ursula K Heise argues that understanding these stories and symbols is indispensable for any effective advocacy on behalf of endangered species More than that she shows how biodiversity conservation even and especially in its scientific and legal dimensions is shaped by cultural assumptions about what is valuable in nature and what is not These assumptions are hardwired into even seemingly neutral tools such as biodiversity databases and laws for the protection of endangered species Heise shows that the conflicts and convergences of biodiversity conservation with animal welfare advocacy environmental justice and discussions about the Anthropocene open up a new vision of multispecies justice Ultimately *Imagining Extinction* demonstrates that biodiversity endangered species and extinction are not only scientific questions but issues of histories cultures and values
