Immortality Project:

Leaning Out Monica E. Pierce, 2020-03-31 Today's professional women are tired of feeling pressured to Lean In and Have it All. Women's Equality isn't about getting more of us into the corner office or the boardroom. It's about having the freedom to choose our own path. But mainstream messages have lost sight of this and turned our pursuit of professional achievement into a directive rather than a choice. As a result, many women of our generation are now chasing after careers and accomplishments that we may not truly want, all at the cost of our families, our health, and our happiness. Well, instead of striving to have it all, it's time to have just what we want. In this refreshingly honest book, self-proclaimed average working woman Monica Pierce shares her own story of how her professional ambition changed once she admitted she didn't actually want to have it all. Highlights, thought-provoking connections to scientific, philosophical, and social concepts that explain why so many of us are reluctant to Lean In, offers plenty of insight and practical tips to help you right-size your life. **Leaning Out** is a must-read for women who are tired of today's one-sided messages and looking for an alternative perspective.

Wired Humanity Barrett Williams, ChatGPT, 2023-04-17 Step into **Wired Humanity**, the profound exploration of our ever-evolving digital world, a landscape where pixels meet personhood and virtual realities intertwine with the tangible. This compelling eBook delves into the heart of what it means to live, work, and exist in an age where technology goes beyond being a tool; it becomes an extension of ourselves. There is no sphere untouched by the digital revolution. **Wired Humanity** begins with the Digital Identity Paradigm, unraveling the intricate ways in which our identities morph within cyberspace. How do our virtual personas impact the real world, and what does it mean to fragment our sense of self across multiple platforms? As we navigate the complex web of online existence, the substance of who we are shifts in mysterious and sometimes alarming ways. Through a tapestry of thought-provoking chapters, the book guides readers along the razor-thin line between sharing and secrecy in our Data-Driven Selfhood. It offers a rich examination of social media's crucible, where we curate ourselves amidst echo chambers and digital pressures, and ventures into virtual worlds where gaming avatars become vessels for identity exploration and community building. But what of our physical bodies in this augmented age? Venturing into the realms of wearables and augmented reality, **Wired Humanity** probes the ethical quandaries of an increasingly cyborgian existence. As the boundaries blur further, the book scrutinizes the transformation of privacy, the balance of power in a world of pervasive surveillance, and the right to digital anonymity. The narrative also spotlights Artificial Intelligence not merely as a tool but as a mirror reflecting and sometimes distorting our sense of self. As technology redefines the workforce, reshapes education, and reconstructs the financial landscapes, **Wired Humanity** asks pressing questions: Who are we amidst the digits and data? Do our digital livelihoods liberate or ensnare us? Remarkably timely, this eBook delves into the heart of digital citizenship and E-democracy, assessing the rippling impact of connectedness on our political and personal identities. It traverses the ethical terrain of bioinformatics, the convoluted reality of digital relationships, and the frontlines of the battle against propaganda and

disinformation Wired Humanity is not just a book it s a roadmap for navigating the convergence of technology and human experience Are we prepared for the singularity merging with machines or shall we seek solace in digital detox With precise analysis and eye opening insights this work lays bare the emerging contours of a future where humanity is interwoven with the codes it has created Prepare to be challenged enlightened and forever changed as you turn each virtual page and ponder the path ahead for our wired existence

Role Playing Gary Bryant,2017-03-09 In the struggle for human liberation no question is more important than the question of identity The conventional identity so important in protecting our vulnerability during childhood is the chief obstacle to our real Identity much as the dragon of myth and legend guards a hoard of gold The secret to undermining the hegemony of this false identity is to understand it as an activity not an entity an activity comprised of a collection of roles we play in life And in the attempt to obtain this understanding no approach is more relevant or useful than the study of acting a study that explores how an actor learns to inhabit his character roles authentically In the compelling nature of this authenticity we can discover an echo of what it would mean to inhabit our own roles consciously as awakened and so authentic human beings

The Meaning Revolution Fred

Kofman,2018-05-01 Advisor of Leadership at Google and former vice president of leadership at LinkedIn claims that the biggest driver of motivation is the chance to serve a larger purpose beyond our careers and ourselves rather than salary benefits bonuses or other material incentives companies that are able to successfully focus their people their teams and their culture around meaning outperform their competition Fred Kofman s approach to leadership has little to do with the standard practices taught in business school and traditional books Bringing together economics and business theory communications and conflict resolution family counseling and mindfulness mediation Kofman argues in *The Meaning Revolution* that our most deep seated unspoken and universal anxiety stems from our fear that our life is being wasted that the end of life will overtake us when our song is still unsung Material incentives salary and benefits account for perhaps 15 percent of employees motivation at work The other 85 percent is driven by a need to belong a feeling that what we do day in and day out makes a difference that how we spend our time on earth serves a larger purpose beyond just ourselves Kofman claims that transcendental leaders wherever they are in the hierarchy are able to put aside their self interests and help others to feel connected with others on a team or in an organization on a great mission and part of an ennobling purpose He argues that every organization involved in work that is nonviolent and non addictive has what he calls an immortality project at its core And the challenge for leaders is to identify and expand on that core to inspire all stakeholders to take part

LaFleur, 2022-11-03 William LaFleur 1936 2010 an eminent scholar of Japanese studies left behind a substantial number of influential publications as well as several unpublished works The most significant of these examines debates concerning the practice of organ transplantation in Japan and the United States and is published here for the first time This provocative book challenges the North American medical and bioethical consensus that considers the transplantation of organs from brain dead donors as an unalloyed good It joins a growing chorus of voices that question the assumption that brain death can be equated facilely with death It provides a deep investigation of debates in Japan introducing numerous Japanese bioethicists whose work has never been treated in English It also provides a history of similar debates in the United States problematizing the commonly held view that the American public was quick and eager to accept the redefinition of death A work of intellectual and social history this book also directly engages with questions that grow ever more relevant as the technologies we develop to extend life continue to advance While the benefits of these technologies are obvious their costs are often more difficult to articulate Calling attention to the risks associated with our current biotech trajectory LaFleur stakes out a highly original position that does not fall neatly onto either side of contemporary US ideological divides
