Naked Truths Ann O Koloski-Ostrow, Claire L Lyons, 2003-09-01 The articles in *Naked Truths* demonstrate the application of feminist theory to a diverse repertory of classical art they offer topical and controversial readings on the material culture of the ancient Mediterranean This volume presents a timely provocative and beautifully illustrated re evaluation of how the issues of gender identity and sexuality reveal naked truths about fundamental human values and social realities through the compelling symbolism of the body **The Universal Magazine of Knowledge and Pleasure ...** ,1801 **Beethoven:**

Eroica Symphony Thomas Sipe, 1998 The *Eroica* Symphony is perhaps Beethoven's most provocative work Its unprecedented design and its powerful emotional impact forever redefined the potential of musical expression The work was conceived as a homage to Napoleon Bonaparte but understood for over a century as a passionate rejection of the tyranny he came to represent This book traces the compositional process and puts the *Eroica* in precise historical and aesthetic perspective the political situations that brought about both the dedication to Napoleon and its withdrawal show that Beethoven followed diplomatic developments astutely Early interpretations by Beethoven's contemporaries show that they understood the work's import clearly This study focuses on Beethoven's unique ability to imbue traditional symphonic forms with the idealism of his philosophical mentor Friedrich Schiller **Early Medieval Art, 300-1150** Caecilia Davis-Weyer (red.), Medieval Academy of America, 1986-01-01 Originally published by Prentice Hall 1971

The Routledge Companion to Anglophone Caribbean Literature Michael A. Bucknor, Alison Donnell, 2011-06-14 The *Routledge Companion to Anglophone Caribbean Literature* offers a comprehensive critically engaging overview of this increasingly significant body of work The volume is divided into six sections that consider the foremost figures of the Anglophone Caribbean literary tradition and a history of literary critical debate textual turning points identifying key moments in both literary and critical history and bringing lesser known works into context fresh perspectives on enduring and contentious critical issues including the canon nation race gender popular culture and migration new directions for literary criticism and theory such as eco criticism psychoanalysis and queer studies the material dissemination of Anglophone Caribbean literature and generic interfaces with film and visual art This volume is an essential text that brings together sixty nine entries from scholars across three generations of Caribbean literary studies ranging from foundational critical voices to emergent scholars in the field The volume's reach of subject and clarity of writing provide an excellent resource and springboard to further research for those working in literature and cultural studies postcolonial and diaspora studies as well as Caribbean studies history and geography **On Their Own Terms** Benjamin A. Elman, 2009-07-01 Since the mid 19th century imperial reformers Republicans Guomindang party cadres and Communists have all prioritized science and technology Elman offers an account of the evolution of native Chinese science over four centuries under the influence of missionaries In the end he argues the Chinese produced modern science on their own terms *Mapping Courtship and Kinship in Classical Japan* Doris G.

Bargen,2015-08-31 Literary critiques of Murasaki Shikibu's eleventh century *The Tale of Genji* have often focused on the amorous adventures of its eponymous hero. In this paradigm shifting analysis of the *Genji* and other mid Heian literature Doris G. Bargen emphasizes the thematic importance of Japan's complex polygynous kinship system as the domain within which courtship occurs. Heian courtship, conducted mainly to form secondary marriages, was driven by power struggles of succession among lineages that focused on achieving the highest position possible at court. Thus interpreting courtship in light of genealogies is essential for comprehending the politics of interpersonal behavior in many of these texts. Bargen focuses on the genealogical maze, the literal and figurative space through which several generations of men and women in the *Genji* moved. She demonstrates that courtship politics sought to control kinship by strengthening genealogical lines while secret affairs and illicit offspring produced genealogical uncertainty that could be dealt with only by reconnecting dissociated lineages or ignoring or even terminating them. The work examines in detail the literary construction of a courtship practice known as *kaimami* or looking through a gap in the fence in pre-*Genji* tales and diaries and Sei Shōnagon's famous *Pillow Book*. In Murasaki Shikibu's *Genji*, courtship takes on multigenerational complexity and is often used as a political strategy to vindicate injustices, counteract sexual transgressions, or resist the pressure of imperial succession. Bargen argues persuasively that a woman observed by a man was not wholly deprived of agency. She could choose how much to reveal or conceal as she peeked through shutters from behind partitions, fans, and kimono sleeves or through narrow carriage windows. That mid Heian authors showed courtship in its innumerable forms as being influenced by the spatial considerations of the Heian capital and its environs and by the architectural details of the residences within which aristocratic women were sequestered adds a fascinating topographical dimension to courtship. In *Mapping Courtship and Kinship in Classical Japan*, readers both familiar with and new to *The Tale of Genji* and its predecessors will be introduced to a wholly new interpretive lens through which to view these classic texts. In addition, the book includes charts that trace *Genji* characters' lineages, maps and diagrams that plot the movements of courtiers as they make their way through the capital and beyond, and color reproductions of paintings that capture the drama of courtship.

Roman Gods Michael Lipka,2009 The book is concerned with the question of how the concept of god in urban Rome can be analyzed along the lines of six constituent concepts: i.e. space, time, personnel, function, iconography, and ritual. While older publications tended to focus on the conceptual nature of Roman gods only in those comparatively rare instances in which different concepts patently overlapped, as in the case of the deified emperor or hero worship, this book develops general criteria for an analysis of pagan, Jewish, and Christian concepts of gods in ancient Rome and by extension elsewhere. While the argument of the book is exclusively based on the evidence from the capital up to the age of Constantine, in the concluding section the results are compared to other religious belief systems, thus demonstrating the general applicability of this conceptual approach.

Classicism and Christianity in Late Antique Latin Poetry Philip Hardie, 2019-08-27 After centuries of near silence Latin poetry underwent a renaissance in the late fourth and fifth centuries CE evidenced in the works of key figures such as Ausonius Claudian Prudentius and Paulinus of Nola This period of resurgence marked a milestone in the reception of the classics of late Republican and early imperial poetry In Classicism and Christianity in Late Antique Latin Poetry Philip Hardie explores the ways in which poets writing on non Christian and Christian subjects used the classical traditions of Latin poetry to construct their relationship with Rome's imperial past and present and with the by now not so new belief system of the state religion Christianity The book pays particular attention to the themes of concord and discord the cosmic sense of late antiquity novelty and renovation paradox and miracle and allegory It is also a contribution to the ongoing discussion of whether there is an identifiable late antique poetics and a late antique practice of intertextuality Not since Michael Robert's classic The Jeweled Style has a single book had so much to teach about the enduring power of Latin poetry in late antiquity
