Impossible Worlds The Architecture Of Perfection:

Drawing the Unbuildable Nerma Cridge, 2015-06-12 Architecture is conventionally seen as being synonymous with building In contrast this book introduces and defines a new category the unbuildable The unbuildable involves projects that are not just unbuilt but cannot be built This distinct form of architectural project has an important and often surprising role in architectural discourse working not in opposition to the buildable but frequently complementing it Using well known examples of early Soviet architecture Tatlin s Tower in particular Nerma Cridge demonstrates the relevance of the unbuildable how it relates to current notions of seriality copying and reproduction and its implications for contemporary practice and discourse in the computational age At the same time it offers a fresh view of our preconceptions and expectations of early Soviet architecture and the Constructivist Movement

Graphis, 2001 [Viable Utopian Ideas](#) Art Shostak, 2015-06-11 Utopias whether philosophical literary or actual experiments are attempts to solve all social problems In the wake of the attack on the World Trade Center unfolding corporate scandals and other devastating shocks it is natural to search for practical lessons in utopian literature In this collection noted sociologists renew the call to develop an altruistic social order They address a wide variety of topics as they look for viable utopian ideas that can be applied to today s society Written in an engaging jargon free style and directed to introductory sociology students as well as anyone concerned with social problems the book provides both visionary ideals and insights for pragmatic decision making as we venture into an uncertain future

Impossible Worlds Stephen Coates, Alex Stetter, 2000 This book explores the ways in which real buildings have resulted from visionary ideas and assesses the extent to which these buildings have changed the way people live In three sections the editors Stephen Coates and Alex Stetter have arranged key texts together with a selection of projects which illustrate the ideas and the built realities which followed on from them In the first part Hilary French explores the development of communitarian ideas and the ways in

which utopian thinking has generated new ideas for housing The second section with a major text by Joe Kerr argues that the supposedly ideal housing devised by the proponents of Garden Cities has been Disneyfied and sold to wealthy Americans in a bizarre subversion of the American Dream In the third section Francois Penz and Maureen Thomas explain the influence of film on the development of visionary architecture arguing that unbuilt projects have been just as important as those realised in three dimensions BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved
