The New York Times this breathtaking chronicle of Antarctic exploration was written by expedition leader Sir Ernest Shackleton In 1914 he and his 28-man crew boarded the ship Endurance and sailed away to do something no one had ever done to traverse and chart the mostly unknown territory of the South Pole But within weeks of their arrival their vessel became trapped in ice drifting helplessly for months before sinking and leaving the crew stranded on a melting ice floe This account of the expedition's two-year struggle in one of the world's most uninhabitable regions relates a near-miraculous escape from multiple dangers thousands of miles traveled in lifeboats across tempestuous seas and in unforgiving landscapes of glaciers and icebergs relentless cold and the constant threat of starvation A century later Shackleton's firsthand account of the crew's harrowing experiences and their triumphant survival remains among the most thrilling adventure stories ever told
