Thinking Above & Beyond Manas

Kapur,2025-03-28 Leadership has always fascinated me not just as a concept but as a lived experience From my days as a student leader at Sri Venkateshwar International School to my journey at the University of Manchester where I have continuously sought to expand my knowledge of psychology and human behaviour leadership has been the common thread running through my experiences I have been fortunate to learn from incredible mentors engage with brilliant minds and witness firsthand how the right guidance and mindset can shape the trajectory of a leader Thinking Above it is a philosophy that I have come to embrace through my own leadership journey I have always believed that leadership is not confined to boardrooms or political stages it begins in classrooms debate teams student councils and the small moments where individuals take initiative The experiences that shape future leaders often begin long before they step into executive roles and that is what I wanted to explore in this book As someone who has been deeply involved in public speaking consulting and organizational psychology I have seen how leadership is a skill that can be nurtured refined and developed It is not an innate gift reserved for a select few rather it is a set of behaviours decisions and values that can be cultivated Through this book I wanted to highlight the journeys of remarkable individuals who started as student leaders and went on to change the world I wanted to examine their successes their failures and the psychological principles that guided them along the way I have structured this book to not only tell compelling stories but also to provide insights into how psychological principles such as emotional intelligence transformational leadership and systems thinking play a role in shaping great leaders My academic background in psychology and my experiences in HR consulting have reinforced my belief that leadership is as much about understanding people as it is about making strategic decisions The case studies in this book reflect that intersection between psychology and leadership illustrating how vision resilience and adaptability can turn a student leader into a global icon To those who are just beginning their leadership journeys I hope this book serves as a source of inspiration To those who are already leading may it challenge you to think above and beyond beyond conventional leadership models beyond traditional expectations and beyond the limitations you might have placed on yourself Leadership is an evolving journey and I am honoured to share what I have learned along the way
