Immortals Of Science Fiction:

The Immortals of Science Fiction David Wingrove, 1980 **The Immortals** James Gunn, 2014-12-02 James Gunn's masterpiece about a human fountain of youth collects the author's classic short stories that ran in elite science fiction magazines throughout the 1950s. New material accompanies this updated edition including an introduction from renowned science fiction writer Greg Bear, a preface from Gunn himself, and Elixir Gunn's short story that introduced Dr. Pearce to another Immortal. What is the price for immortality? For nomad Marshall Cartwright, the price is knowing that he will never grow old. That he will never contract a disease, an infection, or even a cold. That because he will never die, he must surrender the right to live. For Dr. Russell Pearce, the price is eternal suspicion. He appreciates what synthesizing the elixir vitae from the Immortal's genetic makeup could mean for humankind. He also fears what will happen should Cartwright's miraculous blood fall into the wrong hands. For the wealthy and powerful, no price is too great. Immortality is now a fact rather than a dream. But the only way to achieve it is to own it exclusively. And that means hunting down and caging the elusive Cartwright or one of his offspring.

the world of speculative fiction **Science Fiction Shorts: The immortals** Isaac Asimov, Martin Harry Greenberg, Charles Gordon Waugh, 1981 Important Prophecies of the Future Martin K. Ettington, There are many Prophecies and Premonitions from the past which still might happen This book looks at the most important from a variety of sources and attempts to analyze what will really happen and when Being an Engineer and a Clairvoyant has led me to analyze my prophecy experiences and given me a better understanding of how they exist and work My major experiences are reviewed in Chapter 20 along with my explanations of how prophecy really works In the rest of this book we will explore many prophecies from the past which have yet to occur as well as forecasts by current prophets and great thinkers about our future Then we get into a few prophecies by those who had Near Death Experiences NDEs who are therefore closer to their spirit which increases prophetic validity Next I make a few of my own prophecies about our future from looking ahead with my intuition to see what feels right Lastly is an analysis of the prophecies in this book and what we can learn from them

The Timeline of Intelligent Life on Earth Martin K. Ettington, 2022-09-06 I'm fascinated with Ancient History because there are continuous new discoveries which push back the dawn of civilization by thousands of years In the last couple of decades the discoveries at Gobekli Tepe in eastern Turkey pushed back man made structures to the time period of 9 000 11 000 B C Thousands of years before the next known civilizations existed This book includes my research on ancient sites around the world underground structures giants the destruction of civilization about 10 500 B C the real Atlantis and out of place objects which can be millions of years old With this collection of a wide variety of information I decided that what is needed is a full timeline of intelligent life on Earth from millions of years ago to the present There are a lot of gaps in this information but enough records findings and discoveries exist to propose an initial timeline of intelligent life on Earth going back hundreds of millions of years Yes I'm saying intelligent life has existed on Earth that long and since humanity and even primates don't exist in those times at all aliens must have lived on the Earth at that time There are three parts to this book Part One Millions of Years Ago This includes stories of aliens existing on Earth in our history and many out of place objects made by intelligent beings and the fossil record which provides supporting evidence that intelligent life did exist at those times Part Two The Unknown Civilizations of Man Here we have evidence of structures built by man but way before any accepted records that civilization or man made constructions existed Some of these things may go back 100 000 years ago Part Three Post Ice Age Civilizations This part includes evidence that the Younger Dryas event was actually comets striking the Earth which caused major disasters and probably the destruction of civilizations about 10 500 B C My intention is that this timeline will provide a skeleton of mankind and intelligent life's early history on Earth which can be filled in overtime to become much more detailed and prove the truth of this point of view to skeptics worldwide **All About Mars Journeys and Settlement** Martin K. Ettington, This is a 2022 revised version of the book first published in 2020 A lot of new information has become available since then A manned mission to Mars has been the dream of humanity at least since the

nineteenth century when we first saw details of the surface and thought there might be canals filled with water there Here I ve looked at the history of unmanned exploration of Mars over the last fifty plus years proposed missions to Mars Mars Settlements and other major issues regarding traveling to and living on Mars Some proposals have lots of details of proposed scenarios if you want to read all of the engineering and scientific analysis work I grew up in the 1960s when every kid in America was fascinated with the Space program and the Astronauts I also watched not only the Apollo 11 moon landing but all of the successive trips to the Moon and exploration of the surface This may be a lot of the reason I became and Engineer worked as NASA in Houston for several years and applied to the Astronaut Program myself There are some probes which reported life on Mars and then other scientists questioned the results We are still sending unmanned probes today to try to answer those questions

The Microscopic World Inside and Around Us Martin K. Ettington, We live surrounded by an invisible world which affects our lives in many ways In this book we will take a journey from barely visible life to cells their structures molecules atoms fundamental particles and even smaller We will explore not just the facts about this small world but also try to unearth interesting facts to ponder too For example what did paranormal investigators believe about the structure of atoms over one hundred years ago And what particles or forces might be smaller than the standard building block particles we know about today Also what are the limitations of the standard model of subatomic particles There are many things in the microscopic world which you might not expect The journey from the small to the infinitely small starts here

The Suppression of Truth in the United States and the World Martin K. Ettington, In today s world we live in a culture of truth suppression This is true in representative democracies like the United States as well as full totalitarian dictatorships like Communist China This book covers many areas of major lies like Global Warming perverted doctrines taught in schools Politics News Suppression Communist China limitations in Spirituality deficit spending and problems with globalism There are many different types of truth suppression and as much as we would like to think that we live in an advanced culture and world this effort by different entities to suppress truth affects our lives negatively in many ways The most direct effect is that we live in fear of the future of our world which is a big lie This suppression also keeps us from fully realizing our spiritual natures and that we do have the ability to accomplish amazing things when we live with full honesty in our lives I believe that individuals are closest to a state of happiness when they live their lives in truth See my book *A New Paradigm of Truth and Happiness* for more information There are actions we can take to correct this situation but they are mass actions which need many persons involved to have a real effect A list of these actions are given later in this book

Strange Tales from National Parks Martin K. Ettington, National Parks here and abroad have an unusual number of strange scary and weird activities going on It may be because these areas cover some of the most hidden and still natural and undisturbed locations in the world These parks offer undisturbed areas where man does not intrude normally and many activities can be hidden there The stories in this book are mostly by Park Rangers who spent years in the outback of these

parks and tell of their unusual and sometimes very scary experiences I've divided up these stories mainly by types like missing persons Bigfoot sightings Aliens and UFOs and more Some experiences are so weird or unusual they were hard to categorize so they are in the chapter titled Random Stories From my own experiences camping the wilderness I know that you need to be prepared for the unexpected All of these stories were reported as true but who is to say what the real truth is

Building Hope and Wonder Among Chaos Martin K. Ettington, This book provides thirty days of ideas to build your hope and to allow you to develop a sense of wonder about the world we live in I've written over one hundred books on a variety of topics from the paranormal to self help books survival and much more I also occasionally get premonitions about danger and many other events in my life Recently I received an intuition to write about Hope After meditating on this topic I realized that this is a big concern of many people in our chaotic world With the Pandemic violence inflation and general stress of our world we all need new insight into having Hope in our lives Interestingly many of the topics I've researched and written about can also provide hope and new paradigms for people The more I've experienced researched and written on many different Out of the Box topics the more I've achieved a state of amazement and wonder about our Universe We live in a truly amazing Universe and realizing this deeply will help our attitudes about our lives *Radionics and Life Force Technologies* Martin K. Ettington, Radionics is the term for machines which manipulate life forces This is often for healing or increasing psychic perceptions The Author is an engineer and has many decades of experience with the paranormal and well as time learning and experimenting with radionics devices from the 1970s While radionics devices are often considered pseudoscience those opinions don't take into account the sensitivities of individuals who have incredible paranormal and healing abilities In my first year of engineering school at Rensselaer Polytechnic Institute in Troy New York I met a man who became my mentor in the Paranormal and other things too This was in 1973 I learned to meditate and how to open my crown chakra to take in vital forces which allowed me to do many things including healing others In addition I also met another middle aged guy at a Psychic Fair in Saratoga Springs New York He was a researcher in the arcane field of Kirlian Photography In this book the history of radionics is discussed some of the major influencers on that history how these devices are used for healing and even some plans for building radionics devices My hope is that this book will give you a good grounding in radionics to learn to use it productively for your own efforts Hollow and Inner Earth Stories and Facts Martin K. Ettington, This book is about legends of the Hollow Earth and other underground cities and civilizations which might all be related The concept of there being a hollow Earth or inner area of the Earth where people have lived and do still exist has been around for hundreds of years Other stories and legends of underground cities are also discussed to show that there are many stories of people and other beings living underground in our past and maybe up until the present era Usually there is some fact as the basis for legends so all these stories make we wonder if there is some reality about civilizations existing underground on this Earth These legends are geographically diverse and from different cultures so maybe there is something to them Near the end of

the book I include some incredible science data about life actually existing miles under our Earth and an example of a real underground city we know about and have visited
