Implementing A Human Development Strategy:

Implementing a Human Development Strategy Keith Griffin, Terry McKinley, 1994-11-12 Readers will find in these pages a very lucid creative and highly readable version of many of the ideas that have taken shape through the medium of the Human Development Reports during the last four years. Busy policy makers all over the world will find this an indispensable primer. Mahbub ul Haq from the preface. This book introduces the basic concepts of human development and presents policy guidelines for implementing a human development strategy in developing countries. Human development is seen both as an end in itself and as a means to increase the capabilities of people. The role of the state, the market and of people's participation in such a strategy are described. Specific chapters discuss the structure of incentives, allocation of public sector resources, structural reforms, the relationship of human development to environmental issues and finance and administration.

The Cuban Revolution as Socialist Human Development Henry Veltmeyer, Mark Rushton, 2011-11-11 The book argues that the Cuban Revolution warrants a closer look as a model of socialist human development. A re-reading of the Cuban Revolution from this angle engages unresolved issues in the theory of socialist humanism and the notion of human development popularized by the United Nations Development Programme, i.e. predicated on capitalism. UNDP economists and other agencies of international cooperation for development give a human face to a capitalist development process that is anything but humane. Socialism in Cuba has taken a very different form, socialist human development than it did elsewhere in the twentieth century. The Cuban Revolution's unique characteristics enabled it to survive adverse conditions, a near perfect storm that still threatens its evolution. *Studies in Development Strategy and Systemic Transformation* K.

Griffin, 2000-05-15 *Studies in Development Strategy and Systemic Transformation* contains eleven essays by Keith Griffin on many of the contemporary leading issues in economic development. Topics covered include the role of culture in long term economic growth, globalization and economic governance, human development and the effects of the distribution of productive wealth on the pace of development. There are also discussions of alternative reform strategies in the transition economies and of an investment led strategy of structural adjustment in Sub-Saharan Africa. **An Introduction to the**

This approach forms the foundation of Advancing Human Development Theory and Practice. It traces the evolution of approaches to development showing how the Human Development approach emerged as a consequence of defects in earlier strategies. Advancing Human Development argues

that Human Development is superior to measures of societal happiness It investigates the determinants of success and failure in Human Development across countries over the past forty years taking a multidimensional approach to point to the importance of social institutions and social capabilities as essential aspects of change It analyses political conditions underlying the performance of Human Development and surveys global progress in multiple dimensions such as life expectancy infant mortality and education and outcomes whilst reflecting on dimensions which have worsened over time such as rising inequality and declining environmental conditions These deteriorating conditions inform Advancing Human Development s account of the challenges to the Human Development approach covering the insufficient attention paid to macroeconomic conditions and the economic structure needed for sustained success *Sustainable Human Development* M. Transforming the War on Drugs Annette Idler,Juan Carlos Garzón

Vergara, 2021-12-01 The war on drugs has failed but consensus in the international drug policy debate on the way forward is missing. Amidst this moment of uncertainty, militarized lenses on the global illicit drug problem continue to neglect the complexity of the causes and consequences that this war is intended to defend or defeat. Challenging conventional thinking in defense and security sectors, *Transforming the War on Drugs* constitutes the first comprehensive and systematic effort to theoretically, conceptually, and empirically investigate the impacts of the war on drugs. The contributors trace the consequences of the war on drugs across vulnerable regions including South America and Central America, West Africa, the Middle East, and the Golden Crescent, the Golden Triangle, and Russia. It demonstrates that these consequences are global. The war's local impacts on human rights, security, development, and public health are interdependent with transnational illicit flows. The book further reveals how these impacts have influenced the positions of governments across these regions with significant ramifications for the international drug control regime. Crucially, it shows that at a time when global order is in flux, critically evaluating the regime's securitization through the war on drugs provides key insights into other global governance realms.

Human Development in the Era of Globalization J. K. Boyce, Keith B. Griffin, James K. Boyce, 2006 This volume provides a very high quality set of papers on the relationship between globalization and human development. Any one with interest in this wide-ranging subject matter would find the volume an interesting and engaging read. *Global Business Review* Honoring Keith Griffin's more than 40 years of fundamental contributions to the discipline of economics, the papers in this volume reflect his deep commitment to advancing the well-being of the world's poor majority and his unflinching willingness to question conventional wisdom as to how this should be done. Four overarching themes recur in Keith Griffin's work, and this book: the need to both eradicate poverty and redress inequalities in the distribution of wealth within and among nations; the impact of growth on inequality and conversely inequality's impact on growth; the political economy of policy making; and the need for openness to heterogeneity in both analytic tools and in policy recommendations. The volume begins with an introduction by the editors, followed by a paper by Keith Griffin. In succeeding chapters, the contributors explore strategies for reducing poverty and inequality and provide perspectives on issues such as human development, the rural-urban divide in China, and biodiversity and sustainability. Students, researchers, policymakers, and NGO analysts exploring issues in development economics, development studies, alternative economic systems, globalization, environmental sustainability, inequality, and well-being will find this book of great interest.
