Reprints of Rare Tracts & Imprints of Ancient Manuscripts, &c, 1848 *Reprints of Rare Tracts & Imprints of Ancient Manuscripts, &c* Moses Aaron Richardson, 1848 An Introduction to the Study & Collection of Ancient Prints William Hughes Willshire, 1874 **An Introduction to the Study & Collection of Ancient Prints** William Hughes Willshire, 2024-08-03 Reprint of the original first published in 1877 A Concise History of Ancient Israel Bernd U. Schipper, 2020-04-28 The history of biblical Israel as it is told in the Hebrew Bible differs substantially from the history of ancient Israel as it can be reconstructed using ancient Near Eastern texts and archaeological evidence In A Concise History of Ancient Israel Bernd U Schipper uses this evidence to present a critical revision of the history of Israel and Judah from the late second millennium BCE to the beginning of the Roman period Considering archaeological material as well as biblical and extrabiblical texts Schipper argues that the history of Israel in the preexilic period took place mostly in the hinterland of the Levant and should be understood in the context of the Neo Assyrian expansion He demonstrates that events in the exilic and postexilic periods also played out differently than they are recounted in the biblical books of Ezra and Nehemiah In contrast to previous scholarship which focused heavily on Israel s origins and the monarchic period Schipper s history gives equal attention to the Persian and early Hellenistic periods providing confirmation that a wide variety of forms of YHWH religion existed in the Persian period and persisted into the Hellenistic age Original and innovative this brief history provides a new outline of the historical development of ancient Israel that will appeal to students scholars and lay readers who desire a concise overview **The Routledge Handbook of the Senses in the Ancient Near East** Kiersten Neumann, Allison Thomason, 2021-09-30 This Handbook is a state of the field volume containing diverse approaches to sensory experience bringing to life in an innovative remarkably vivid and visceral way the lives of past humans through contributions that cover the chronological and geographical expanse of the ancient Near East It comprises thirty two chapters written by leading international contributors that look at the ways in which humans through their senses experienced their lives and the world around them in the ancient Near East with coverage of Anatolia Egypt the Levant Mesopotamia Syria and Persia from the Neolithic through the Roman period It is organised into six parts related to sensory contexts Practice production and taskscape Dress and the body Ritualised practice and ceremonial spaces Death and burial Science medicine and aesthetics and Languages and semantic fields In addition to exploring what makes each sensory context unique this organisation facilitates cross cultural and cross chronological as well as cross sensory and multisensory comparisons and discussions of sensory experiences in the ancient world In so doing the volume also enables considerations of senses beyond the five sense model of Western philosophy sight hearing touch taste and smell including proprioception and interoception and the phenomena of synaesthesia and kinaesthesia The Routledge Handbook of the Senses in the Ancient Near East provides scholars and students within the field of ancient Near Eastern studies new perspectives on and conceptions of familiar spaces
